A Silver Anniversary

The silver anniversary of the Mission Band of the Methodist church was celebrated on Tuesday of last week. Mrs. Belfry presided at the afternoon session. The music was provided by members of the Band, and was excellent and generous. Mrs. W. A. Armstrong, the Superintendent for seventeen years, distributed fifteen life membership certificates, then she called Mrs. W. H. Thurston to the platform, where she was presented with a sheaf of beautiful roses by two of the youngest life members of the Band, little Bettie Murray and Billie Hyland. Mrs. Thurston was altogether taken by surprise, but thanked the donors for the beautiful sentiment expressed by the flowers. "A rose to the living is more than sumptuous wreaths to the dead." Mrs. Thurston organized the Band 25 years ago, and was the only charter member present on Tuesday. Mrs. (Rev.) Kemp of Toronto, Cor. Sec. of the M. B. of Toronto Conference, was present and gave an excellent address, taking as a foundation stone, "whatsoever thy hand findeth to do, do it with thy might." Mrs, Erskine, superintendent of the Markdale Band, came down and brought about fifteen members and gave a short talk. Tea was served in the Sunday school room. The tables were in the form of a cross, the central decoration being a handsome birthday cake with 25 burning colored candles upon it. The hidden ring was secured by little Miss Stephenson of Markdale.

The pastor, Rev. C. A. Belfry, presided at the evening meeting. The address of the evening was given by Mrs. J. H. Rutherford Owen Sound District Superintendent, directed to the boys and girls, and was extremely interesting to the older people. Mr. Wes. Armstrong operated a lantern and Mrs. Harker of Hamilton explained a large number of views of the W. M. S. work as they were thrown upon the canvas.

FORGOT HE CHANGED HIS HAT

Aged Restaurant Patron Makes Search for Straw Toppiece, But Finds Own Derby.

Nice old gentleman in the restaurant, with a long line of hat trees running down the center. His dinner finished, he picked up his check and turned to the hat tree back of him and took down his hat, or the hat he had no doubt was his, but when from force of habit he looked inside of it to make sure he found that it wasn't his hat at all!

So he put that hat back on the tree and tried the next most likely one, but with the same result, and it was the same with all the hats on the tree, which he looked into one by one until he had looked into all excepting a black derby, which he did not inspect, for what he was looking for was a straw.

But then, to leave no stone unturned, he took down that black derby and looked into it; and, good gracious! that was the hat he was really looking for; that black derby hat he was now looking into was his very own.

He smiled as he put it on. He had changed that morning from straw to felt and then had forgotten all about it.

PITCAIRN ISLAND IS LONELY

Natives Occupying Spot, Peopled by About 150, Have Degenerated Through Intermarriage.

Home is where the heart is, but the heart picks out some most unusual locations at times. Rather near, as Pacific ocean distances go, to the Society islands, is Pitcairn island. It is certainly a lonesome spot, says the New York Sun, and as far back as 1856 the British authorities decided that it was no fit place for human habitation. So, the descendants of the mutineers of the "Bounty" who had settled there in 1790 were transferred that year to the more inviting Norfolk island. Several families, however, were so homesick that they went back to Pitcairn.

The population from these few families has now increased until about 150 people are on the island. Through intermarriage and other evils of isolation these islanders have degenerated and their retrogression undoubtedly will end in their extermination.

Phonograph Repeats Record.

When the needle comes to the end of its travel and the music ceases the owner of a phonograph equipped with a new attachment, says Popular Mechanics magazine, takes no heed, and a moment later the machine is playing the same air over again. This interesting result is achieved by means of a metal arm pivoted at a point outside the turntable, its inner end resting upon the projecting tip of the spindle. At the end of the record the traveling sound box engages a trigger which actuates a vertical screw, and the metal arm rises, lifting the needle from the record. The sound box slides back along the inclined arm to its starting position, the descending arm replaces the needle accurately in the outer groove, and the music goes on.

Wealth in Waste.

The foundation of some of the most prosperous corporations were laid in utilization of what was formerly waste. The field is still open to the southern pine lumbermen. The annual cut averages 15,000,000,000 feet, board measure, and for one foot that goes to the lumber piles two go to waste. Chemists would say this was not waste, but wasted raw material for vast quantities of paper, twine, bags, pulp boards, turpentine, rosin, pine oil, charcoal, tar, varnish, ethyl alcohol and acetic acid. Yet lumbermen throw away this great source of wealth and complain of the high cost of producing lumber.—Wall Street Journal.
