98% Metal

A MAXWELL is 98% metal, and the very best metal that metallurgists can specify. Pound for pound it equals the metal in any car built.

The Maxwell is made of light-weight but strong metals.

They had to be light because the mission of the Maxwell is economical transportation.

They had to be strong because the Maxwell is built to carry just as heavy a passenger load over the same roads and at the same speed as any car, despite its price or size.

Any engineer will tell you that in getting that rare combination of strength with lightness high prices must be paid for the metals.

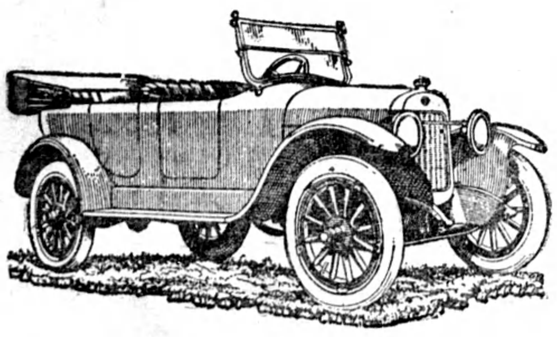
Their use, however, repays the makers of the Maxwell in many ways because each car each day is winning friends.

To-day these friendships, expressed in terms of cars, are well on the road to 400,000.

You cannot go back of these numbers any more than you can go back of the fact that the sun rises in the morning.

They tell the story; and it's largely a story of what the Maxwell is made of—fine metals.

The Maxwell is waiting for you in our showrooms. Come round and get behind the wheel. To-day.



E. E. WATSON, Agent,
Priceville, Ontario

A despatch from Clarksburg says: While motoring down the mountain at Kirkville, a few miles from here, on Saturday, Messrs. Chisholm and Brown, High School Principal and Assistant of Thornbury, had a very narrow escape from death. They were travelling, they say, at about 60 miles an hour, when at a sharp turn in the road, the brakes refused to work. Their car left the road, jumped a deep ravine and crashed through the bushes and shrubs and two wire fences, struck and uprooted a small tree, and overturned. Chisholm, who was driving, was thrown clear of the car, while Brown was pinned underneath. Brown is badly bruised and shaken up, but no bones are broken, while Chisholm is only nursing a few bruises.

John Mitchell, who was injured some weeks ago when a Hydro pole on which he was working, fell over a cliff at Niagara Falls, is home in Dundalk on a visit. His right hand and wrist were badly torn requiring thirty stitches. The wound is healed but the hand and arm are very stiff yet.—Herald

Rod and Gun

Among the other interesting stories and articles of outdoor life in Canada that appear in Rod and Gun in Canada for May, is one entitled "A Wonderful Salmon Expedition." This describes an expedition after the "big fellows" in Newfoundland. For the fisherman there are two other stories: "Falling From Grace" and "The Heart Cure" in this issue of Canada's outdoor magazine. "Hunting the Black Duck" and "The Parson Goes Hunting" as the titles indicate, are hunting stories that will appeal to the devotee of rifle and shot gun. Great interest is being shown in the big game hunting articles written by A. Bryan Williams; one installment of his splendid series of articles appears in this issue. Fishing Notes and Guns and Ammunition Department, as well as the other departments, are up to their usual high standards. Rod and Gun in Canada is published monthly by W. A. Taylor, Limited, Woodstock, Ont.

Fire At Desboro

The village of Desboro, situated sixteen miles east of here was visited by a disastrous fire on Sunday when the saw and grist mill of R. Milburn, and the house of Wm. Gobert were totally destroyed. The fire was first discovered in the grist mill and quickly spread to the sawmill and cleaning mill, all under one roof. In a very short time the building was a mass of flames, as it was of frame construction. Many gathered to render aid, but nothing could be done, as there is no fire protection in the village. A shed near the mill was also destroyed. Mr. Milburn carried no insurance and his loss will be over $7,000. Mr. Gobert had $800 insurance. The cause of the fire is a mystery, but it is thought that a spark fell in the sawdust.—Tara Leader.

Emerson Libby, age 18, whose parents live at Clinton, was electrocuted in Owen Sound last week. The young man was on a scaffolding about eight feet above the sidewalk and was apparently holding on to an iron pipe in which were a number of electric wires, with his right hand and in reaching to paint a spot to the left his left hand touched an unprotected end of wire several feet away. The iron pipe was grounded and 550 volts went through him.

Boar for Service

The undersigned has a thoroughbred Yorkshire Boar for service on lot 11, con. 8, Osprey. Terms $1.50.

Out of the Present into the Past

IT is interesting to note the excellent preservation of some old family residences. So well do they "fit into the picture" that except for their architecture one might almost imagine them the product of the present age, yet in reality they stand as silent tributes to the wise precaution against decay and deterioration on the part of a former generation.

Any house that is worth building should also be worthy of preservation by means of paint. The maximum of protection is found in

B-H "ENGLISH" PAINT
70% Pure White Lead (Brandram's Genuine B.B.)
30% Pure White Zinc
100% Pure Paint

The formula (70% Brandram's Genuine B.B. White Lead and 30% Pure White Zinc) produces a paint with a fine, smooth surface that does not crack, chip or peel and a surface protecting film that will defy the elements.

Investigate B-H "English" paint—you'll find most Canadians use it because of its economy and lasting qualities. A trial will make you a convinced adherent to this brand that goes so far and lasts so long.
