WM. KAITTING, licensed Auctioneer for the counties of Grey and Simcoe. Farm and Stock sales a specialty. Terms moderate, satisfaction guaranteed. Arrangements for dates may be made at the Advance office, or Central telephone office Feversham or by addressing me at Feversham, Ont.

D. McPHAIL, Licensed Auctioneer for the County of Grey. Terms moderate and satisfaction guaranteed. The arrangements and dates of sales can be made at THE ADVANCE office. Residence and P.O., Ceylon, Telephone connection.

Mr A. H. Chamberlain, promoter and manager of the Chamberlain Coal, Oil and Development Co., Limited, of Shelburne, has sold his holdings in the above named company to Shelburne parties and will devote all his time in future to the Orangeville Oil and Gas Syndicate. Mr Chamberlain states he has nearly all his leases blocked up now in such shape that he will be ready to receive applications for shares of the Orangeville Oil and Gas Development Syndicate by the 12th of July. A competent civil engineer is expected to make a survey of the holdings this week after which the report of Mr Monroe will be completed and ready for publication—Banner.

Boar For Service

Yorkshire Boar For Service—Lot 39, con. 4, Artemesia.
2 m —WALLACE FISHER, Prop.

Insurance Is Good, But—

Insurance will, in a measure, repay you for loss from fire due to lightning.

But *it will not prevent the fire.*

It takes the DODD System of Lightning Protection to do that.

In the past thirty years over 300,000 buildings have been rodded by the DODD System and in not a single instance is there a record of the DODD System properly installed, having failed to prevent damage by lightning.

The fact that you haven't yet suffered loss by lightning only means that you are fortunate, not that you are proof against it. ***Ask us today what it will cost you to have DODD protection.***

THE

Flesherton Advance

An independent newspaper published every Thursday at the office, Collingwood Street, Flesherton. Subscription price $1.50 per annum when paid in advance; $2.00 when not so paid. $2.00 to United States. Advertising rates on application. Circulation over 1100 weekly.

W. H. THURSTON EDITOR

CEYLON

Mr Jas Sargeant and mother spent a couple of days in Owen Sound last week.

Mr and Mrs A Sinclair and children and Mr and Mrs W Fawcett and babe spent the 1st of the week at Wasaga Beach.

Mr Donald McLeod is spending a week with his daughters in Toronto.

Mr and Mrs Leslie Marshall returned Saturday to their home in Toronto after spending a week with the latter's parents, Mr and Mrs Wilson McMullen.

Mrs Herbie Fisher and babe of Toronto visited her mother, Mrs A McLeod, here.

Mrs J W Cushnie of Toronto is holidaying at Mr R. Cook's.

Dr and Mrs Holmes of Owen Sound and Mr and Mrs Fred Chislett and son of Listowel were hurriedly called to the bedside of their mother, Mrs T Chislett, who is very ill. Later—Mrs Chislett took a stroke last week and passed away at 2 o'clock a. m. on Tuesday at the age of 66 years. The deceased lady was sister of Mrs Kurstedt and Mr Down of Flesherton. Much sympathy is extended to the family.

Miss Millie Cook spent a few days last week in the hospital at Owen Sound.

Mrs Ramsy of Southampton and Mr and Mrs Hugh Bailey of Shrigley are holidaying under the parental roof.

Mr S Hemphill and son, John, Miss Maud Hemphill and Miss Brown motored to Owen Sound the 1st of the week.

Mr Wm White spent the weekend in Owen Sound.

Mr Jas Ashdown was in town part of last week.

LATE POTATO SPRAYING

Best Fungicides and Insecticides For This Work.

Bordeaux Mixture for Late Blight and Rot — How and When to Spray Effectively — How to Increase Crop Yields.

(Contributed by Ontario Department of Agriculture, Toronto.)

EARLY spraying with Bordeaux mixture and Paris green or arsenate of lead protect potato plants from Early Blight and Potato Beetles. Later sprayings are required as an insurance against Late Blight and Rot of Potatoes, which is the most serious disease of potatoes in Ontario. This disease usually appears about the middle of July if the weather is at all damp. Therefore, it is necessary to begin spraying for it about the 10th of July. Bordeaux mixture is the only satisfactory fungicide for the control of Late Blight and Rot of Potatoes. A poison should be added when necessary for Potato Beetles, arsenate of lead paste, 3½ lbs. to each 40 gallons of the liquid spray, or Paris green 2 lbs. to 40 gallons, or a mixture of 2 lbs. of arsenate of lead paste and 1 lb. of Paris green to 40 gallons. The number of sprayings required will depend upon the season, the wetter the weather the larger the number. In wet weather spraying should be done at least once every ten days or two weeks. Do not put off spraying because it looks like rain. If the spray is on the plants half an hour before the rain comes it will be dry and sufficient of it will stick to prevent infection which takes place during or soon after rain. Most of the failures to get results from spraying are due to the fact that the spraying is done after rather than before rain.

Thorough spraying only is effective, and this requires sufficient Bordeaux mixture. For the late sprayings from 75 to 100 gallons or even more should be applied per acre at each spraying. Thorough spraying means the covering of every portion of the potato plants with Bordeaux mixture in the form of a fine mist. This can only be done when the solution is applied with a good pressure so as to insure covering every portion of the plant. The best results are obtained when a potato sprayer is used fitted with a T-joint attachment so as to insure covering both surfaces of the leaves at each spraying. When the plants are large it has been found that it pays to go over each row twice at each spraying. Spraying must be continued throughout August and part of September, even though the plants close in and cover the ground between the rows. Not as much harm as might be expected will be done by the wheels and the increase in yield and soundness of the crop will more than compensate for whatever loss there may be. For convenience in spraying, rows of potatoes should be at least thirty inches apart. Spraying for Late Blight and Rot is an insurance which few can afford to neglect.—Prof. J. E. Howitt, O. A. College, Guelph.

RURAL LEGISLATION

Well Worth a Second Glance From Farmers.

Cream and Milk Purchasing—Dog and Sheep Protection—Sale of Formaldehyde — Marketing Loan —Prevention of Bee Diseases.

(Contributed by Ontario Department of Agriculture, Toronto.)

FOLLOWING are brief outlines of some of the provisions of certain bills passed at the last session of the Legislature, and which touch very closely the interests of farmers of the Province, furnished by the Agricultural Gazette of Canada:

Cream and Milk Purchase Act.

This is a measure designed to protect the producers of cream in the matter of test. It provides that all cream purchased in a wholesale way shall be purchased on a basis of the butter-fat content, and that all milk that is paid for on a butter-fat basis shall be tested by the Babcock method. At the present time, of course, practically all cream purchased by wholesale is bought on a basis of its butter-fat content, so that the chief purpose is to standardize the test and see that the producer gets a fair test. The Act and Regulations prescribe the method of testing and also provide that the shipper shall be entitled to a statement in detail of the quantities of cream received and the amount which each tested. The inspectors are given authority to enter factories at all hours and make tests, and also look over the books of the companies, and check up the quantities of cream received and the manner in which it is disposed of.

Dog Tax and Sheep Protection Amendment Act.

The dog nuisance is so general and so serious to owners of sheep that there is an effort almost every session to further strengthen the legislation to protect sheep owners from losses by dogs. The act introduced at the recent session provides that all dogs in the province shall wear tags, to be secured from the officers of the municipality. Any dog found off the premises of its owner and not under the control of any person and not wearing a tag may be killed by any person, and there is also a fine to the extent of at least $10 for those who fail to secure tags. This section, however, does not come into effect until April 1, 1921, so as to give people concerned proper notice.

Another amendment gives the councils of counties power to take over all dog taxes collected and to pay out the losses which may be incurred through damages to sheep. At the present time these losses are borne entirely by the townships, which also receive and control the revenue from the dog tax.

The Sale of Formaldehyde.

For some years past the Department of Agriculture and many leading farmers have been advocating the use of formaldehyde for the treatment of seed grain for smut. Frequent complaints were heard that as formaldehyde was only handled in drug stores, it was not convenient in many rural sections where drug stores were often ten or twelve miles apart. It was found that all that was needed was a slight change in the Pharmacy Act which would put formaldehyde in the same class as Paris green and other poisons that are handled by hardware stores or general stores. It is, of course, provided that formaldehyde can only be sold in sealed packages carefully labelled "Poison" so that the handling may be properly safeguarded.

The Marketing Loan Act.

This is an important measure intended to grant financial assistance to organizations of producers incorporated under the Companies Act who desire to construct and operate seed centres or potato warehouses. A loan up to fifty per cent. of the value of the land, building, and equipment may be made, provided that such loan does not exceed the sum of $3,000 in any one case. This loan is free of interest for a period of two years, but fifty per cent. must be repaid in five years, and the balance at the end of a further period of five years. The act provides the usual machinery for the safeguarding of the investment. This measure is introduced in response to an indication that there is a real need in Ontario for encouraging the development of local seed centres where modern equipment for cleaning seed grain can be established, and in this way a market secured for the good seed produced in many sections. Similarly, there are indications that several sections would like to erect potato warehouses in order to carry their product for a longer period, instead of forcing it all on the market in a short time, thereby placing the stock under control of the dealer and speculator.

Better Prevention of Disease Among Bees.

A measure passed having for its object the prevention of the spread of diseases among bees provides for the enlargement of the scope of the act which has been on the statute books for some time. The old act, however, is confined to foul brood. While this is one of the most serious diseases of bees, there are other that have developed later that require the attention of the inspector. The amended act also provides that bees or appliances from apiaries where disease has exitsed may be moved on certificate from the Provincial Apiarist. Formerly there was prohibition against moving bees or appliances under any condition.

Cheapest Car Transportation on Earth

THE FORD CAR

A number of good second-hand cars on hand. A full line of accessories for Fords and repairs for I. H. C. Farm Implements.

Agents for all varieties of

I. H C. FARM IMPLEMENTS

WE SELL **GILSON** "Goes Like Sixty" FARM EQUIPMENT

BACKED BY SIXTY YEARS' EXPERIENCE! DOMINANT IN QUALITY AND SERVICE!

Sixty years of leadership—of giving good value, heaping satisfaction and real service! That's why the Gilson name wins respect and confidence from coast to coast. That's why we are proud to sell this dependable farm equipment.

THE GILSON ENGINE

All Sizes

Costs You Nothing

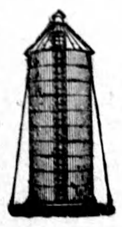
The famous Gilson "Goes Like Sixty" Engine—any size for any purpose—can be purchased on the easy payment plan. Let it pay for itself. Its economy and dependability have made it the biggest selling engine in Canada. Let us demonstrate on your farm.

"THE WONDERFUL GILSON"

"The Wonderful Gilson" stands supreme. More Gilson Silo Fillers were sold in Canada last year than any other make. It is guaranteed to be the lightest running blower-cutter made.

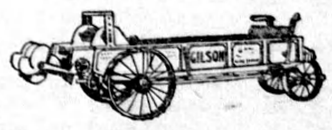
Be independent—get a Gilson Silo Filler and fill your own silo—with your own engine, 4 h.p. or larger—at the proper time, when your corn has the greatest feeding value.

HYLO SYLO



The Hylo Sylo insures sweet, fresh, succulent ensilage down to the last forkful. It is built to last indefinitely. Exclusive patented features of design and construction explain why the Hylo is chosen by the discriminating farmer. Pays for itself in the first season. Then year after year, pays 100 per cent. profit on your investment. Can you beat it?

THE GILSON SPREADER



Manure is the best fertilizer. You have it. Use it! The best Manure Spreader made is the Gilson. Why? It has a wide spread. It is low down. It has light draft. It will take a real load. It is free from clutches, gears and all complicated parts.

Call and see our nearest dealer, name below. He will save and make you money on the equipment illustrated and on Gilson Threshers, Dixie-Ace Tractors, Wood Saws, Grinders, Pump Jacks, Belting, etc. Write for Catalog.
