BASEBALL

RECORD OF CENTRE GREY LEAGUE

Official standing of the teams, Aug. 30

	Won	Lost	P.C.
Ceylon	9	2	.818
Dundalk	9	2	.818
Vandeleur	7	3	.700
Flesherton	7	5	.583
Rocklyn	3	6	.333
Eugenia	2	7	.222

Dundalk 9, Eugenia 0

In an exhibition game of ball at the U F O picnic in Eugenia on Tuesday of last week Dundalk trimmed Eugenia by the score of 12-9. The fixture was to have been a league game, but Eugenia again defaulted by having a couple outside players on the line up.

Dundalk are now tied with Ceylon for the League leadership, Vandeleur are now second.

The Ceylon Vandeleur game, which was to have been played at Ceylon on Monday, has been postponed on Vandeleur's account, the second time. The game, however, will be played this Thursday afternoon at Ceylon. Game called at 3 o'clock. Umpire Arthur Wilson of Owen Sound will handle the game. There should be a big crowd present to see this game.

Jack Dow, Flesherton, Ab Buchanan, Vandeleur, Jack and Don McLeod and Elmer Muir of Ceylon have been playing with Durham juniors in the North Wellington League this year. Durham lost out in the finals to Stratford.

Durham lacrosse team are going right ahead in the semi-finals this year. On Labor Day they defeated Orillia 8-1 on the Durham grounds, winning the round by seven goals. The first game at Orillia was a tie, 3-3.

Feversham lost out in the football tournament at Owen Sound on Monday. They won their game from Balaclava, but lost in the final to Strathavon 1-0.

HONEY FOR SALE

Any amount of honey for sale in large and small amounts, 20 cents per pound. Reduction on large quantities.—Jos. Buchanan, Flesherton.

Clarksburg Camp Meeting

The Gospel Workers (D.V.) will hold their annual camp meeting at Clarksburg from Tuesday, Sept. 9, to Sunday, Sept. 18, inclusive. Rev. David Anderson will be with us. We are expecting special help with the singing. Four services will be held each day at 9 and 10.30 a.m. and at 2.30 and 7 p.m. A hearty welcome is extended to all.

To find a crock of home brew by the road side and to pick it up and then be fined $200 and costs just for keeping it safe was the fate of a young man by the name of Mutton in the Owen Sound police court last week.

Came Astray

Came to my premises the fore part of the summer, one yearling steer. Owner is requested to prove property, pay expenses and take the same away.

Grain Smut Explosions

(National Crop Improvement Service.)

"In the Pacific Northwest, wheat smut spores live over winter in the soil and the ordinary treatment with formaldehyde is not effective unless there has been a rotation of crops which causes the smut spores to die.

"As a consequence, dense clouds of smut spores, which may be seen for miles, arise from the threshers and spread wheat contagion over the entire country," says Mr. P. Schleussner, Perth Amboy Chemical Company.

"Sometimes when this smut cloud is properly mixed with air, a piece of wire or nail will strike a spark in the separator and the result is an explosion worse than a thirteen-inch gun, blowing machines to pieces and often killing and injuring the crew.

"The wheat smut tax amounts to millions of dollars. It is in most instances entirely preventable by treatment of the seed, but so serious has it become that the American Department of Agriculture has a separate grade for smutted wheat.

"It will be well for the Canadian farmers to prevent smut from ever getting entrenched while it is comparatively easy."

Safeguarding Inspection

(National Crop Improvement Service.)

"Grain inspection has been reduced to a fine art. In order to avoid dispute, a sample is taken from the car of grain at the terminal market and is divided into two homogenous halves by means of an ingenious separator into which the sample is poured.

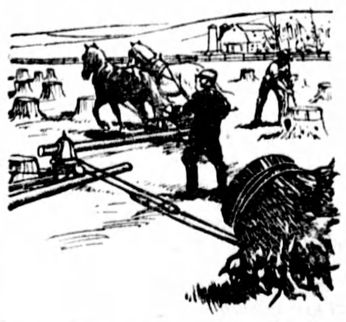
"This divides and mixes the grain so evenly that the two portions may be weighed without the variance of more than a few grains," says Chief Culver, of the Toledo Produce Exchange.

"The object of this is that when the grain arrives at its destination and the buyer should complain of its quality, a re-inspection can always be demanded from the identical sample from which the first inspection was made.

"These reserve portions are kept for several months and in case of export, they prove invaluable in settling all complaints as to quality.

"Inspection nowadays is all official and the inspector cannot be tampered with because he has no idea whose grain he is inspecting. Grain inspection is as reliable as the coinage of silver."

Yank Out the Stumps



(National Crop Improvement Service.)

"Our tillable lands have gone and with a further growth and development of the world, we must utilize every waste acre. Stump pulling is a vital problem to the man who is farming in a cut-over country, to the man who is paying taxes on idle stump land and to the man who is seeking a rich farm at a comparatively low price.

"The neatest, quickest and most economical way of clearing out stumps and roots, is with a stump-puller and wire rope," says Mr. R. S. Rider, president, Canadian Steel & Wire Co.

"The use of a pulley block so designed that any number of them can be used to double, triple, or quadruple the power of the machine, will conquer the most stubborn stumps without fail.

"When dynamite is used, the roots are left to be grubbed out or pulled out by team, all of which is slow, hard work. With the stump-puller and a wire rope, the job is clean and complete.

"A good stump-puller will pay for itself in the saving of hand labor on a few acres of ground, to say nothing of the increase of crop values. You can use it in the wet season when you can work at nothing else. In fact, the machine works easier when the ground is wet.

"We need every acre."

THE
Flesherton Advance

An independent newspaper published every Thursday at the office, Collingwood Street, Flesherton. Subscription price $1.50 per annum when paid in advance; $2.00 when not so paid. $2.00 to United States. Advertising rates on application. Circulation over 1100 weekly.

FAIRS ADVERTISE YOU

Both the Community and the Exhibitor Get Publicity.

It Pays to Let Others Know That You Have the Goods — Fighting the Hessian Fly—The Silo a Proven Utility.

(Contributed by Ontario Department of Agriculture, Toronto.)

To the general farmer who grows good grain for seed, to the specialist in garden and truck crops, and particularly to the live stock man, the Fall Fair offers an opportunity. It pays to advertise; the Fair is the place where the people see the goods produced, and seeing is believing. Moreover, the papers report the winnings, and through these the exhibition gets a large amount of advertising free which would otherwise cost him a considerable amount of money. Winning in close competitions under a competent judge adds dollars to the value of stock shown and increases the market price of any commodity, as well as giving the exhibitor a standing not only in his own community but over a section of country corresponding to the size and influence of the show at which prizes are won. The Fair is a good place to make sales. Prospective buyers see the good exhibits made and enquire about the breeding stock at home. Stockmen show at Fairs largely to make sales rather than to win prizes, although the latter is a factor in the sales and they are not disappointed as evidenced by the growing interest in the Fall Fair. Showing at the Fair, coupled with a judicious newspaper advertising policy, which should never be neglected, is good business. The two go together and work hand in hand. It pays to let others know of your good stock. Use printers' ink and show at the Fall Fair.—Wade Toole, O. A. College, Guelph.

FLESHERTON, - Phone 30J - ONT.

What are you worth to your community? Give the matter a little serious reflection. Would you be missed if you died or moved out? Do you persistently refuse when asked to assist or "throw cold water" on enterprises designated for the public good? Is your whole spare time taken up with sporting, or are you assuming responsibilities in bettering conditions right in your own neighborhood? These questions are put forward because of the prevailing backwardness of so many to busy themselves for the advancement of practical efforts to inspire and carry to a successful issue matters of interest to the community—Exchange.

SAMSON TRACTOR

The Tractor With The Steady Stream Of Power

THE SAMSON TRACTOR is just the Tractor you have been looking for. Strong and powerful, compact, and built right as all **SAMSON TRACTORS** are built, it sells at a price low enough for the most conservative farmer.

For such work as plowing, discing, harrowing, spreading manure, cultivating and other field work it is an ideal Tractor. You can also do all kinds of belt work with it such as running a thresher (and we positively guarantee the **Samson** to run a 28" Threshing Separator satisfactorily) operating a silo filler, grinding grain, sawing wood.

The SAMSON TRACTOR being a General Motors product, is up to the usual high class General Motors standard as regards design, workmanship and materials. The powerful motor used in this Tractor is especially built for tractor work, and the entire Tractor—motor, transmission, etc., is built complete in the **Samson** factories.

Platform, fenders, magneto, governor, air cleaner, Impulse starter, etc., are regular equipment with the **SAMSON TRACTOR.**

The SAMSON TRACTOR has won out in many competitive tests with other Tractors. It wins because of its surplus power and its high efficiency for belt and draw-bar work.

Come in and see this **SAMSON TRACTOR**, or we would be glad to give a demonstraction on your own farm on either belt or draw-bar work. We carry a complete stock of parts, always ready to keep the **Samson** power continuous.
