(National Crop Improvement Service.)

Canadian oats lead the world for quality and are in great demand for seed in every civilized country, but oats generally receive little attention and are raised in a haphazard sort of way. Very few farmers put in seed plots, although there is no other crop which responds so readily to intelligent selection and treatment.

Careful experiments have proven conclusively that the formaldehyde treatment of the seed for smut frequently increases the yield more than would be naturally expected from simply replacing smutted heads with sound ones.

This is probably due to the fact that the grain is attacked by other seed-borne parasites which are as effectually checked as smut, adding to the general health of the grain.

Seed Grain Fundamentals.

1. Select the variety for your neighborhood best adapted to soil and climate. If it is decided to put in both an early and late oat, do not get them mixed. It will be fatal to both.
2. Fan and grade your seed until you have removed all shriveled and broken kernels, sticks, chaff and weed seeds.
3. Test your seeds for germination in a wet blotting paper and plant only strong-sprouting seed.
4. Treat your seed grain with formaldehyde to prevent smut and other diseases.
5. Put oats in early.

Flesherton H. S.

Kilsyth	Oct 6, 7
Markdale	Oct 11, 12
Priceville	Oct 6, 7

Meaford is having trouble with speed artists on their new roadway.

Neil McCallum of Bentinck had three ribs broken. As he was jumping out of a wagon his foot caught in the wheel and threw him to the ground.

Orlando Preston of Owen Sound fell 40 feet over a ledge of rocks west of Owen Sound, lighting on his head between two rotten logs, and he will live.

George Miles of Durham, section foreman on the C.P.R, met with a bad accident when a freight train collided head on with his lorry on which he was riding. His right leg was broken at the thigh, left collar bone fractured and a number of ribs broken, one of which penetrated his lung.

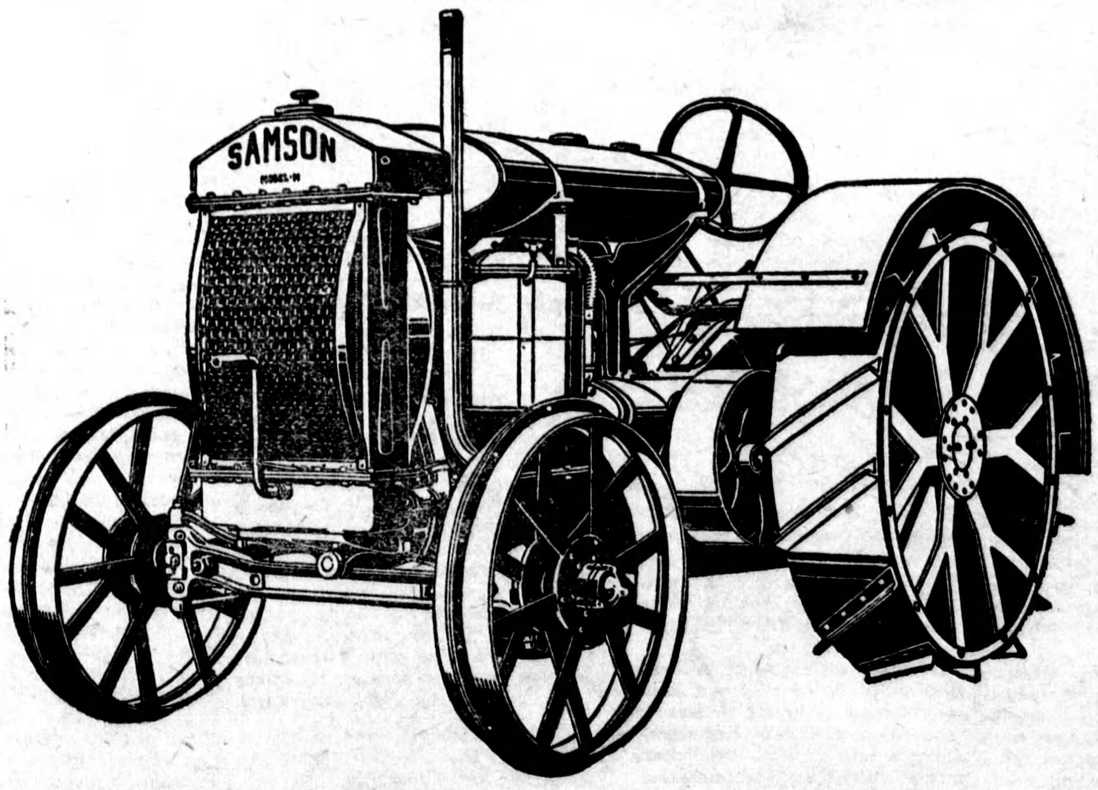
THE PRICE IN KEEPING WITH CROP PRICES

RIGHT now you are confronted with the same kind of problem that your father decided when he discarded the scythe for the mower and reaper. It is the problem of more and better work in less time and at a lower cost--it is the problem of making and saving the crop irrespective of seasonable variations--the problem of realizing a profit even under the most adverse market conditions.

The profits of the future must come through greater efficiency. Lower costs mean greater profits.

Thousands of far-sighted farmers have successfully solved their problems by installing SAMSON equipment.

At the new price, thousands of others will reduce their costs and increase their profits through the use of the efficient SAMSON.



See us for SAMSON terms which are based on an intimate understanding of the present agricultural situation. We have a special easy payment plan which fits your present conditions.

Take advantage of SAMSON economies. Let us demonstrate the SAMSON right on your own farm.

Put the SAMSON tractor to work earning more money for you without delay. PAY AS IT PAYS.

There are similar reductions on the entire Samson Line including Motor Trucks, Plows, Harrows, Cultivators Planters, Listers and Weeders. See us for new price list and full information
