Ault's Railroad Horse-power Overs hoThresherand Separator.

For Two Horses: Thresh from 150 to 175 bushels per day—Price $160 or £40 currency.

For One Horse: Thresh from 60 to 100 bushels per day—Price $130 or £32 10s. currency.

THESE Machines have been arranged with the strictest regard to economy, and every exertion has been made so as to simplify the machinery that any person of common intelligence can work them and repair them, in case of accident. It is well known, that on a Railroad a Horse can move a much greater load than in any other manner. This principle has been adopted in these Machines. The horse power is, in fact, a moveable Railroad—the weight of the Horse does nearly all the work, and so easily do they run, that when once in good working order, and well greased, it is always necessary to use the brake before they can be stopped. It will thus be seen that these Machines have the following advantages over those already in use:—They are Cheaper, and not liable to accident. They enable a farmer to do his own Threshing at leisure times and in wet weather, without being dependent on extra help. They take no room and can be easily moved from place to place.—From the simplicity of construction any part can be replaced, and duplicate parts had from the Agents, and the nearest mechanic can replace the broken portion. They enable a farmer to thresh his grain as he requires it—either for the grain or the straw.

THESE MACHINES may be worked with three or four men, and if not found to do they work as represented may be returned within 60 days, and the payment refunded.

May be had at the factory of the inventor,

Sydenham, Co. Frontenac.

IMPORTANT TO HOUSE KEEPERS.

Something better and more economical than Soda, Cream Tartar, or any other preparation in existence for Baking.

DURKEE'S CHEMICAL YEAST, or BAKING POWDER—For raising Bread, Biscuit, Fried Griddle and Johnny Cakes, Puddings, Pot-Pies, Corn Bread, Sweet Cakes, Apple Dumplings, Pastry, &c., &c. This article is one that every

Family, Hotel, Boarding House,

Eating Saloon, Ship, Steamboat, Vessel, Canal Boat, &c., will find, upon a careful trial, to be the *very thing needed every single day of their existence.*

Its most important advantage over the old system, are—

1. It saves the expense of milk, eggs, shortening, spoiled bread, and the trouble and expense of procuring good yeast,—water only being necessary.

2. No time is required for the dough to rise before baking; consequently bread may be made in a few minutes.

3. A cook can always depend upon having light sweet, tender and palatable bread and biscuit whether the flour be of the best quality or not.

4. Bread made by this process is much more nutritious, easier of digestion, better fitted for a weak stomach, sweeter, whiter and lighter, than when made with yeast.

5. The bread made by fermentation, does not afford the same amount of nourishment to the system, that it does when made with this compound; because the vegetable acid contained in fermented bread, prevents the proper action of the gastric fluid upon it, and consequently, acts only goes to nourish the body, while the acid tend to produce dyspepsia and its attendant evils.

This article has been thoroughly tested, and is universally liked. When used according to directions, it is *warranted* to suit.

☞ Be careful to ask for DUREE'S BAKING POWDER, and take no other, and you will not be deceived. Principal office, 139 Water-street New York. Sold by the best grocers and druggists generally.

Cancer and Rupture Cured.

IF those who suffer will not listen to a few words to get help, how will they bear many to th se afflicted with Cancer, Ulcers, Rupture, or *Breach*, and all kinds of old, eating sores, from any cause. A few words to all such of you who are clasped in strong bands of steel to obtain relief, and find none, I would say, come to one who possesses a remedy to cure nearly all who have a breach or rupture, no matter of how long standing. Lay aside your iron band or truss, and I will bring you out well and sound with mild treatment. Cancers and Ulcers cured in their most aggravated forms.

This dangerous disease grows in the form of *Pimples, Warts, Scales, Tumors, Ulcers, Eating Sores and various other ways.* The premonitory symptoms of Cancer in the incipient state, are an itching in the part affected sometimes an unusual heat, attended with a twitching and a sensation felt as if there was a spider or a fly crawling over the part; then succeeds shooting and darting pains at intervals of a day, sometimes, and becomes more frequent as the disease progresses.

To-morrow is no day to apply for cancers.

Several hundred cases have been cured in the last five years by this treatment. Ninety-one cases cured from one hundred and ten in the last six months.

NAMES AND RESIDENCES OF A FEW CASES LATELY CURED.—Miss Campbell, Brandon, Vermont, 16 years standing, three large cancer ulcers on the leg. The most astonishing cures lately affected ever known in America on Samuel Slecum, of Providence, R. I., a rupture of six years standing. BRITANNIA LIFE ASSURANCE COMPANY,

No. 1 Princes treet, Bank, London

CAPITAL, ONE MILLION.

EMPOWERED BY SPECIAL ACT OF PARLIAMENT 4 Vic. Cap. 9.

THE great success of this Institution in Europe and the numerous Policies, issued by the different Agencies in Canada, evidently show that the advantages of Life Assurance are daily becoming more and more appreciated by those who feel the necessity of making some provision for their families, or securing the amount of debts due by or to them in case of premature death. The rates of the *Britannia* are the lowest which can be offered consistently with security to the Assured, and the subscriber begs respectfully to invite the attention of the inhabitants of Kingston to the numerous Tables of Rates, specimens of which may be seen at his office.

The income of the Company, independently of the large subscribed Capital, is between Eight and Ninety Thousand Pounds, Sterling, per Annum, and of this the greatest part is continual accumulating for the payment of losses.

A party effecting an Assurance with this Company, may do so for a fixed sum, payable at his or her death, without participating in the profits, and thereby secure *an immediate Bonus* by not paying more than is absolutely required to provide for the risk—but if participation in profits is preferred by any party, there are 'Mutual Tables' adopted by the Company, which offer an annual division of the Profits, and which being supported by the other Branch of the Institution, hold outa very safe and profitable inducement to the person wishing to Assure.

All claims payable within THREE MONTHS after proof of death. No proof of birth is required at the time a claim is made; the age of the Assured being, in every case, admitted in the Policy, cannot, under any circumstances, be afterwards called in question. Policies effected by parties on their own lives are not rendered void in case of death by duelling or the hands of justice. In the event of suicide, if the Policy be assigned to a *bona fide* Creditor, the sum assured will be paid without deduction: if the Policy be not assigned the full amount of Premiums received thereon will be returned to the family of the Assured.

The necessary forms, and every requisite information, as to the mode of effecting Assurances, may be obtained either by letter or personal application to

Agent at Kingston.
