ABOUT SWEET CLOVER

Hints Regarding the Cutting, Curing and Siloing.

Should Be Cut Before Blooming—In Filling the Silo Tramp Well—Some Farmers Recommend the Use of Salt—Old Dobbin Steals a March on the Tractor.

(Contributed by Ontario Department of Agriculture, Toronto.)

Sweet clover should be cut for hay in the green sappy state just before blooming. If cut for hay, great care should be taken to properly cure it. It would seem that the best method is to coil it in the field and dry it thoroughly before drawing it to the barn. Wet, damp or poorly-cured hay provides ideal conditions for the development of mould.

As sweet clover hay is difficult to cure under the best conditions a very good means of preserving it would seem to be in the form of silage. The experience of the last year, however, has revealed the fact that certain precautions are necessary in making silage if it is to come out of the silo green, succulent, and free from mould:

When to Cut for Silage.

Sweet clover for silage should be cut at the same time as for hay, i.e., just before blooming. The binder should be followed as closely as possible with the waggons and the sweet clover put into the silo at once. It should not be left lying on the ground for even a day, especially during hot, dry weather. The knives of the cutting box should be set to cut the sweet clover as fine as possible. If for any reason the feed seems dry a stream of water should be run into the cutting box, for it is essential to have the sweet clover well moistened so that it can be well packed in the silo.

Clover Should Be Carefully Tramped.

One of the most important steps in the making of good silage is to be sure that it is spread evenly and tramped thoroughly in the silo. Seventy-five per cent. of the failures in making first-class silage last year were due to insufficient packing. At least two men—preferably more—are necessary to properly tramp sweet clover in the silo. Great care should be taken to see that it is particularly well tramped around the edge. Neglect to properly pack the silage was quite apparent throughout the country this spring, and it was not always in ratio to the number of men in the silo. One farmer said he had two men in his silo while it was being filled last summer, and he could not explain why one half of his silage was rotten from the top to the bottom, and that on the opposite side from the blower pipe. The condition was easily explained, however, when it was realized that the two men had stood on either side of where the cut food was blown in, and had simply forked it over to the other side and did not bother tramping at all. Because sweet clover has a hollow stem and has not the weight that cut corn has it requires to be packed more firmly to prevent the development of mould.

Some Farmers Recommend the Use of Salt.

The use of salt either in curing the hay or in the silo is strongly recommended by some farmers, and if the sweet clover is not being handled under the most favorable conditions it would probably help in curing of the fodder.

In conclusion, it may be well to sum up the four important steps that must be followed if the sweet clover is going to be ensilaged in the best possible manner.

(1) It should be cut before blossoming.

(2) It should not be allowed to lie in the field after being cut.

(3) It should not be cut fine.

(4 It should be tramped well.—Ontario Agricultural College, Guelph.

Old Dobbin Steals March on Tractor.

"Tractor manufacturers and horse breeders associations may urge the relative merits of tractors and horses as sources of farm power with all the eloquence of which they are capable," declares G. A. Pond, in charge of the cost accounting section at Minnesota University Farm, "but the farmer who has both available keeps his eye steadfastly on the relative prices of kerosene and oats and adjusts his power supply accordingly."

Recently summarized data collected showed but 298 hours of use per tractor in 1921 as compared with 415 hours the year previous, a decrease of 28 per cent. The use of horse labor, on the other hand, increased an average of 610 hours per farm during the same period.

The fact that tractor fuel declined only 29 per cent. in price while horse feed decreased 55 per cent. partly explains the change.

In the Orchard.

The foliage of stone fruits, as cherry, plum, and peach, is on the whole quite tender, and the arsenical sprays should be employed with caution. Arsenate of lead is least likely to do harm, though more than two applications, especially to peach, may cause shotholing, dropping of leaves, and burning of fruit.

The care of the home orchard provides for spare time congenial and profitable occupation for those who enjoy seeing things grow.

Important In Chicken Yard.

The health of our family depends largely upon the kind of feed that is given them and the way it is served. It is just as important to feed right in the chicken yard. Have the right kind of feed and see that it is not tainted in any way.

Will Artemesia Township Commence Reforestation?

Letter From Department of Agriculture -- Will Supply Trees-- Council Minutes

This Council met at the Town Hall, Flesherton, on the 3rd inst., the members all present with the Reeve presiding. Minutes read and adopted.

A claim from Mrs S Hill was presented certified by W. J. Bowes, a valuator. Letter from Agricultural Department regarding reforestation, recommending that the Council purchase not less than five nor more than ten acres on some prominent road in the township. The department would plant the trees and the timber to be the property of the corporation. No action was taken at this meeting,

W G Morgan wrote the Council in reference to opening certain streets in Eugenia. This was laid on the table.

Bylaw No 6, appointing R C McKnight township Engineer and No 7 appointing overseers, fence viewers and pound-keepers were introduced and passed in the usual form.

A letter from the Hydro Commission re service at Ceylon was read.

Mercer — Williamson — That W J Bowes' name be added to the list of sheep valuers for 1923.—Carried.

Carruthers—Hogarth—That W Magee be paid $1.20 for gravel used by overseer on road in 1922.

Mercer—Williamson—That Mrs S Hill be paid $30 for two sheep killed by dogs, certified by Mr. Bowes, valuator.—Carried.

Hogarth—Carruthers—That Geo Beecroft be refunded $2 for dog tax for 1922 his dog having been killed before Court of Revision.—Carried.

Carruthers—Hogarth—That in reference to the letter from Hydro Commission re Mrs Collinson's Hydro service at Ceylon this Council is of the opinion that the contract was executed in good faith and not objected to in reasonable time. The Council thinks that the contract should stand.—Carried.

Mrs. James Madden

Another of the pioneers of Osprey has passed away in the person of Mrs. James Madden of the 8th line. The deceased was born in Wicklow, Ireland, and when very young came out to Canada. Several years after she married James Madden of Osprey, on whose farm they hewed out a home, where she lived until her death. Her husband preceded her some sixteen years ago. She was of a kind hearted and hospitable disposition but has been in feeble health for years. She is survived by six children—Mrs. Culletin of Toronto, Mrs. Moison of Collingwood, Mrs. McNulty of Buffalo, Mrs. O'Brien of Khedive, Sask., Didge and Edd, who live on the homestead, besides five grandchildren. The funeral took place on Wednesday of last week to the Melancthon R. C. cemetery, of which church she was a devoted member. Rev. Father Callahan of Dundalk conducted the funeral services. The pallbearers were George Burke, Guy Kaitting, Pete Somers, Mark Murphy, James Burns and Thomas Bemrose.

The sympathy of the community is extended to the bereaved family.

W.M.S. Election of Officers

At the meeting of the Women's Missionary Society which was held in the parsonage last Thursday the following officers were elected:—Pres., Mrs. W. H. Thurston; 1st Vice Pres, Mrs. H. Down; 2nd Vice Pres., Mrs Wm. Wilcock; Rec. Sec., Mrs. Holland; Cor. Sec, Mrs. W. Miller; Treas., Mrs. Cargoe; Supt. of Christian Stewardship, Mrs. W. Armstrong; Stranger's Sec, Mrs Mitchell; Supt. of Mission Band, Mrs. E. C. Murray.

Father Time put another over on Miss Eva House, daughter of Mr. Freeman House last week. She retired on Wednesday evening, saying to herself that she would be a year older on the morrow, but in the morning the calendar swore it was not her birthday, whether she was a year older or not. Can you beat it? As a matter of fact she has to wait till Leap year comes again before she will have an excuse for the cake with the candles on. That's what we call a scurvy trick, throwing an odd day in for extra measure every four years, and then giving it to people for a birthday.—Meaford Mirror

A HIGH GRADE SCHOOL
ELLIOTT Business College
Yonge and Charles Streets, Toronto
Open all year. Demand for our graduates during the last sixteen months more that double our supply. Enter now, write for full particulars.
W. J. ELLIOTT, PRINCIPAL

Will Be Out of College

W. A. Heard, of Toronto Medical College, who has recently undergone an operation for adenoids and tonsils, is recovering nicely. He will not be able to continue his studies in medicine for this year on account of loss of time during his illness, but will, as soon as his health permits, take a position in a continuation school. Bill should make good as a High School teacher, as his record has been good, both in High School and college. He is also a good athlete, being the winner of the gold medal at the High School Meet in Durham last year. —Markdale Standard

[Will at one time attended the Flesherton high school.]
