Why Ford Predominates

The Empire Builders

From time immemorial, Britons have gone forth and pioneered the remote corners of the earth.

In the face of seemingly insuperable difficulties they have built up a world-wide trade—trade that grew and flourished in spite of the limitations of those primitive burden-bearers, the native carriers, the mule train and the camel caravan.

Ford carries the burdens of Empire trade on the hill-trails of India, on the African veldt, on the sheep-stations of Australia and New Zealand, on the plantations of Ceylon and Burma, on the rubber estates of Malaya and on the jungle-paths of Borneo.

Universal usage under all these conditions has stamped the Ford as dependable transportation.

Made in Canada for the Empire

The Ford car is completely made in Canada with the exception of parts to the value of $15.02.
