If your stomach troubles you do not conclude that there is no cure, for a great many have been permanently cured by Chamberlain's Stomach and Liver Tablets. Get a free sample at W. E. Richardson's or H. L. Douglass' drug store and give them a trial. They also cure constipation and biliousness.

The day has long gone by when the newspaper asks for advertising patronage on the plea that the business men ought to support a local newspaper. No self respecting newspaper to-day wants any advertising business as a mere gift of charity or from any generous but mistaken sense of local pride. Newspapers of the present generation solicit advertising on a business basis only and with the distinct understanding that they can and they will give value for every dollar paid to them by advertisers if—and here is the hub of the matter—if the advertiser pays as much attention to the preparation of his advertisement as the newspaper does to the display and circulation of it afterward. Advertising is no longer an experiment, a device external to one's business, a mere something to be trifled with in chance opportunity as a possible means of helping trade a little at times. In this day and generation advertising is just as much a part of the business of merchandising as buying and laying in the stock. It is an incidental part of the process of selling, and a very important part too. If the merchant will give one-tenth part of the careful thought to the conduct of his advertising that he does to the careful selection of the goods he wants to sell he will find that advertising does pay.
