Inspector N. W. Campbell is at present engaged meeting the school boards of his inspectorate with a view to explaining the advantages of the new school law. He met the Flesherton board Monday afternoon. Mr. Campbell, as one of the framers of the Act, is in a position to give the why and wherefore of each clause in the measure. He has been over the better part of three townships and says he has yet to meet the board that was dissatisfied after hearing the measure explained. One of the principal causes of complaint is what is known as the minimum clause. On this head he says that Alberta and the Northwest provinces are draining Ontario of its normal-trained teachers. These teachers are trained at large expense to this province for maintenance of schools and the west reaps the advantage, while our youths are trained by a lower grade of teachers, and twenty years from now the result would be deplorable and our educational standard lowered. With big salaries in the west it is absolutely necessary that the teaching profession should be put on a higher plane in Ontario with more remunerative salaries so that our home-normal-trained teachers will remain with us. Mr. Campbell will meet every board in his inspectorate by request of the government.

Wounds, Bruises and Burns.

By applying an antiseptic dressing to wounds bruises, burns and like injuries before inflammation sets in, they may be healed without maturation and in about one-third the time required by the old treatment. This is the greatest discovery and triumph of modern surgery. Chamberlains Pain Balm acts on this same principle. It is an antiseptic and when applied to such injuries causes them to heal quickly. It also allays the pain and soreness, and prevents any danger of blood poisoning. Keep a bottle of Pain Balm in your home and it will save you time and money, not to mention the inconvenience and suffering such injuries entail. For sale by H. E. Douglass and W. E. Richardson.

From the Armstrong Colony

Strongfield, Sask., Sept. 24, 1906.

Editor Advance,—

The article which appeared in your paper of August 30th referring to the Armstrong colony has been brought to our notice, and we, the undersigned residents of this colony, consider the same misleading and would beg space in your paper to place the truth before your readers. In the first place none of us ever "anathematized" the day we came to the west. Regarding Mr. Lawler's statement about the land being covered with boulders, it is untrue. There are in places some stone, which can be cleared off at a cost of from 10 cents to 40 cents per acre according to location. This condition that we state is not an unusual thing, but is quite common in good wheat-growing districts throughout the west. with regard to your statement "There are also other causes of complaint" we are sorry it is so indefinite we cannot reply to it, but we would say, as a people we are satisfied with the general condition of things, with bright prospects for the future, and we venture to state that nowhere in the west can be found a colony 17 months old that has made better progress.

Haldimand County Councillor tells how Psychine cured his Lung Troubles

"I contracted a series of colds from the changing weather," says Mr. Bryce Allen, a well-known resident of Jarvis, Ont., and a member of Haldimand County Council for his district, "and gradually my lungs became affected. I tried medicine and doctors prescribed for me, but got I no relief. With lungs and stomach diseased, nervous, weak and wasted, I began to use Psychine. With two months' treatment I regained my health. To-day I am as sound as a bell, and give all the credit to Psychine."

There is a proof of what Psychine does. It not only cures Colds and kills the germs of LaGrippe, Pneumonia and Consumption, but it helps the stomach, makes pure, rich blood and spreads general health all over the body. You will never have Consumption if you use
