Chalmer's Church Votes Unanimously To Stay With Church Union

Chalmers Presbyterian church held its anual congregational meeting on Thursday afetrnoon last, when the financial report of the past year was presented. The report showed receipts of $1326.05 and a balance remaining on hand of $280.17. Building account receipts, $268.48, balance on hand $14.05. Women's Missionary Society receipts, $112.56, and bale $30.05. Guild receipts $70.37, with balance on hand of $13.97. The Sunday school report showed receipts of $169.31 and a balance on hand of $30.27. The Ladies' Aid receipts were $341.14, and cash on hand of $136.12.

Chalmers Presbyterian church, Flesherton, is practically unanimous in favor of church union. At a congregational meeting held in the church on Thursday afternoon last the matter was decided by an open vote, when only one dissentient hand was raised.

In the election of officers Mark Stewart, A. M. Gilchrist, T. W. Findlay and W. J. Meads were put on the Board of Managers. Mr. Chas. Stewart was re-elected chairman of the Board and A. Gilchrist was re-elected Secretary-Treasurer. J. E. McKee and W. J. Meads were re-eleced auditors. John Stewart, George Stewart, W. F. Chard and J. L. McMullen were appointed ushers. Mrs. Jos. Blackburn was again appointed organist. Mrs. A. E. McCallum was appointed assistant organist. Mrs. T. W. Wilson was again appointed convenor of the flower committee and was given hearty thanks for her highly prized services in the past.

Priceville Fair Officers Have Been Elected

The adjourned annual meeting of the Priceville Agricultural Society was held on Monday Feb. 2nd with a fair attendance of members. Pres. D. McMillan opened the meeting and a large amount of buisness was transacted. One resolution authorized the holding of a crop competition in white oats during 1925

The Womans Institute have made arrangements to work in conjuction with the Fall Fairs Association Board during the present year, and the as follows—

Hon. Pres. D. McMillan
President W. E. Curran
1st Vice Dan Campbell
2nd Vice-Pres. Wm. Burnett.
Sec.-Treas.—T. A. M. Ferguson.
Directors—Dr. O. E. Carr, Thos Nichol, L. McArthur, David Nichol, H. R. McLean, A. B. McDonald, W. R. Meads, John Burnett, W. W. Ramage, Andrew Hincks, Thos. McDougall.

Messrs. F. Aussem and T. McDougall were appointed auditors for 1925.

A meeting of the Board will be held in a few days to arrange for improvements to buildings and grounds.

Mr. S. J. Semple of Flesherton won first prize for a single carriage horse, but in some way his name was not published in the list of winners.

Rev. W. E. Curran while in Toronto for a few days attended the Fall Fairs Convention on Wed. and Thurs. of last week, as a delegate from the Priceville Agricultural Societ y.

THOS. TUDOR DIED LAST WEEK

Mr. Thomas Tudor, for a number of years a resident of Eugenia, died at the home of his son, Henry, Eugenia, on Friday last at the age of 81 years. Mr. Tudor was a very highly respected resident of that place. The funeral took place to Salem burial ground on Monday.

—WM. KAITTING, Auctioneer.

A unique municipal election is reported from the village of Tweed, Ont. Every vote on the list was polled. This is a record worth noting.

GROWING THE WALNUT

A Tree That Is Desirable Both for Nut and Wood

Southwestern Ontario Can Grow Them—The Walnut Tree Described —Plant Hardy Grafted or Budded Stock—Best Varieties for Ontario.

(Contributed by Ontario Department of Agriculture, Toronto.)

Ontario grown, soft shell walnuts of excellent quality have been produced in the Niagara Peninsula. A few trees have given good crops for thirty years or more. The number of producing trees that we know of now is 165, and these are located in a district fifty miles long and twenty miles wide, an odd tree here and there in the dooryard or the orchard of well kept premises. Trees are fruiting as far east as Clarkson on the north shore of Lake Ontario.

Southwestern Ontario Can Grow Nuts.

The Niagara Peninsula and the counties bordering Lake Erie have a climate more favorable to production of the soft shell walnut than certain districts in Europe where nuts are grown to take care of the local market demand. There are large areas of deep, rich soil in the district north of Lake Erie east to the Niagara river and west to the Detroit river that will grow acceptable soft shell walnuts, and Japanese Heart Nuts. Why not keep the $5,000,000 at home? There is satisfaction in saving money, and there is more satisfaction in sitting before the home fireplace on winter evenings cracking the fruit of our own labor. In about 100 Ontario rural homes this is being done now. The flickering wood fire is pleasant in itself, but a plentiful supply of walnuts at hand, easy to crack and sweet to eat, will help one to enjoy life.

Thousands of rural homes can have walnuts, providing of course that the home is located in the Lake Erie counties, or in a district where the climate will permit the full development of the peach.

The Walnut Tree Described.

The walnut tree, when dormant, will stand heavy frosts in midwinter, but it will not stand late spring or early autumn frosts. Areas reasonably free from frost during the period April 20th to October 10th alone should be considered. The soft shell walnut grows to be a very large tree, is of the deep, tap-rooted type, hence the soil must be deep enough and rich enough to support a big tree. A good surface soil of clay loam or sandy loam that is underlain by a deep, porous, sandy sub-soil in which the water table is below fifteen feet, a soil that is rich, cool and moist, but not wet, will produce the finest specimens of walnut trees. However, the range of soil types on which the walnut tree grow is quite large, since this tree is to be found growing on sandy, gravelly and clay loams, and succeeding in proportion as these soil types furnish depth for root room, plant food and moisture.

Use Hardy Grafted or Budded Stock.

To be successful the walnut tree must be a vigorous grower, of a variety that blossoms moderately late, a self-pollinator, and it must yield an abundant annual crop of desirable nuts. These factors are best obtained by planting hardy grafted or budded stock. The native black walnut has the hardy and vigorous characteristics, it is most desirable as a root system for a soft shell English walnut. Get your start by growing seedling black walnuts up to a size suitable to graft. Three-eighths of an inch in size does very well, then whip graft a scion obtained from a hardy soft shell tree, making an entirely new top. The black walnuts for seedlings can be planted in the autumn or spring. If kept until spring lay away in cold, moist sand. Plant the seed with the pointed end up, two inches deep in good garden soil. Keep the soil well raked and free from weeds. The little trees will be large enough for grafting at the end of the second season, or when growth is starting the following spring. The grafting of the walnut offers more difficulties than apple grafting, requiring greater care. The following conditions are essential to success; fully dormant wood for scions, the cambium of stock and scion must be brought into exact contact, the work must be done as the leaf buds of the tree to be grafted on are unfolding, a condition that varies with individual trees. The cleft in the stock or amputation and the shaping of the scion should be such as to give a perfect fit. The exposed surface of the stock and scion must be held and protected by tape and wax, the entire scion should be waxed over, the scion wood should be secured two or three weeks before required and kept in cold, moist sand. The scion wood should be firm and have a very small pith cavity. Both seedling and grafted trees usually bear at eight years.

Best Varieties for Ontario.

The Japanese Walnut or Heart Nut will stand lower temperature than the Soft Shell English Walnut. It, too, is of good quality and easy to crack. A tree planted twelve years ago at Scotland, Ontario, gave two bushels of free from the husk nuts last year. Some of the older English soft shells in the Niagara Peninsula have yielded as high as twelve bushels of nuts in a single season. A few soft shell walnut trees will add value, beauty and usefulness to any farmstead.—L. Stevenson, Department of Extension, O. A. C., Guelph.

If a little flour paste, say a pint to each pailful, is added to the white wash used on the inside of the poultry house it will stick better and look well longer, adding half an ounce of carbolic acid to each pailful will also hold insect enemies in check.

Small Advertisements

LOST OR STRAYED

LOST—At the railroad crossing at Ceylon about January 19th, iron claw bar. Finder please communicate with Jas. Sargent, Ceylon.

LOST—Purse containing important papers and small sum of money, on the Collingwood gravel about a month ago. Finder please notify Tucker Phillips or leave at this office.
