To The Electors:

Ladies and Gentlemen,—

Do you ever stop and think in this Provincial Election that the dice are loaded against Rural Ontario. Ferguson is walking arm in arm with great urban centres. He has yielded to them on the liquor question and has flagrantly disregarded the right of Agriculture. He shrinks from the verdict he deserves from Rural Ontario by holding elections when he thinks that the roads are at their worst. On December 1st it should not be a question of party loyalty but rather condemnation for a government that has flouted the will of the people, and we've used democracy as a smybol of the past.

Yours sincerely,

F. R. OLIVER.

THE MILIONAIRE'S SECRET.

To be a millionaire, a man must not only get rich; he must be able to stay rich. A certain well known millionaire, when asked how he stayed rich, said: "I invest my money only in sound, established companies."

That man has learned a valuable secret. But a man's money, however much he has, is never worth so much to him as his mind, his intelligence.

Has it ever occurred to you that you should invest your intelligence just as carefully as you invest your money?

Why not invest your intelligence in a sound company by subscribing to the Youth's Companion? It is the oldest magazine for young people in the world—and nearly the oldest of all the American magazines. It is also one of the most interesting. Practically every famous author of the past hundred years has written at one time or another for the Companion. Only this fall, for example, the Companion published a new story by Jack London. Do you like stories of adventure? Mystery? Romance? They are all in the Youth's Companion.

Here are the terms of an investment guaranteed to be profitable:

1. The Youths' Companion—52 issues in 1927, and
2. The remaining issues of 1926.

All for only $2.

3. Or include McCall's Magazine, the monthly authority on fashions.

Both publications only $2.50.

To Presere the Duck

The Migratory Bird Convention States will help to preserve the duck in its customary haunts, but the government of Manitoba has a novel scheme for persuading this bird to extend the territory which it frequents. Bags of wild rice have been sent to the airmen of the forest patrol at their base at Cormorant Lake, just beyond The Pas., and it will be sown from the air. In the autumn the duck comes south from The Pas to feed on wild rice. There seems to be no reason why wild rice will not also grow in the marshes north of the fifty-third parallel and beyond The Pas. If the hope is realized it will extend considerably the feeding ground of the duck. Incidentally, it will slso provide an additional food supply for muskrats, whose pelts form already an important part of the annual fur production of the province.

The Suez canal is being enlarged to make its depth not less than forty feet. This change and a former one from an original depth of twenty-six feet and a width of seventy-two feet have been necessary because of the larger size of steamers and the increased traffic. The canal is one hundred and four and one-half miles long. It has no locks. A trip through the canal takes sixteen hours. About 4,600 boats pass through it in a year.
