SECOND GAME
Dr. Murray's Cossacks
vs.
Barney Welton's Pirates

Winners of each game play off for Champ. Come and boost your team. Skating after the games.

Admission: 15 cts. Children under 12 10 cts.

NOTICE TO CREDITORS

IN THE ESTATE OF LOUISE DUCKETT, late of the Township of Artemesia, in the County of Grey, married woman, deceased.

NOTICE is hereby given that all persons having claims against the estate of the said late Louise Duckett, late of the township of Artemesia, are required on or before the 31st day of January, 1927, to send to William Ernest Morgan, Eugenia P.O., Ont., or James Leonard Latimer, Eugenia P. O., Ont., or to the undersigned, their solicitors, full particulars of their claims duly certified. AFTER such mentioned date the assets of the said estate will be distributed amongst the parties entitled thereto, having regards only to the claims of which the executors, or their solicitors, shall then have notice.

Dated at Owen Sound this Third day of January, 1927.

MIDDLEBRO' & BURNS
Executors' Solicitors,
OWEN SOUND, ONT.

There are two million bushels of grain in storage in boats in Owen Sound harbor.

Mrs. Donald Sinclair, the first white child born in Brant Township, died recently at Walkerton.

SENT TO KINGSTON.

From the Meaford Express.

On Tursday morning last County Constable Harvey Doherty was successful in rounding up the third member of the gang, who have terrorized this community with their thefts and thieving during the past few weeks. While making a search for loot on the farm of Jack Jamieson, 7th line, who with his brother-in-law Carr, were taken into custody a week or more ago. County Constable Doherty and A. W. Stevenson got track of their partner Corbett and successmorning at the home of Mr. Wm. Quinn, Griersville, where he had applied for a meal. While thus engaged Corbett wsa placed under arrest and brought to Meaford where he was turned over to County Constable Denton and conveyed to Owen Sound, where on Friday mornin ghe was given three years in Kingston penitentiary for his part in the various robberies that have been pulled off in North Grey during the past two months. Jamieson and Carr were sentenced to two years after having pleaded guilty to eight charges out of the nine preferred against them.

The Meaford police were successful in capturing the desperadoes and the credit of their capture goes to some boys who took the number of their car while they were engaged in ransacking the mill of the Meaford Milling Co. The auto numbers were given to Mr. Stevenson by the boys, who saw the car in town on Friday, the night after the mill property had been entered. The car left town that afternoon and Mr. John Rogers' store at Woodford was ransacked the same night. The community is well rid of the trio and much credit belongs to the local constables, Mr. Stevenson and the boys for the big round up in the annals of police work here.

THE TRUCK STALLED.

Louis Mitchell and George Collins, who were driving a truck from Oshawa to Meaford, had their truck stall on a railway crossing at Thornbury, when a freight train came along and struck the stalled truck, smashing it beyond repair. Both men were thrown out, but no bones were broken. They were taken to Collingwood hospital.

SEED CLEANING PLANTS.

An absence of efficient seed cleaning machinery at convenient points has had a depressing effect on the production of registered seed grain in Canada. To overcome this hindrance the Cereal Division of the Experimental Farms has given close study to the various types of cleaning machines and established both at the Central Farm and at the Branch Farms cleaning plants of the best types. These plants are being used not only for the cleaning of the seed grown on the Farms but they are placed at the disposal of farmers for a fee sufficient to cover the cost of operation. The service last year at the Central Farm at Ottawa amounted to the cleaning and grading of more than 6,000 bushels of seed grown in the Ontario district. So gratifying is the work done by these machines that a number of the farmers have established for themselves and their neighborhoods seed cleaning plants of similar type.

SOY BEANS IN ONTARIO

NEW LEGUME CROP GROWN IN LAKE COUNTIES.

Value as Meal, Oil Cake and Silage and Some Points About Difficulties and Advantages.

(Contributed by Ontario Department of Agriculture, Toronto.)

Profitable live stock farming depends in part on economical feed production. The soy bean has proven to be a very useful crop in the lake counties, as a source of hay, silage and grain feed.

The chief value of the soy bean in Ontario will be as a hay crop. Feeding trials have demonstrated that well made soy bean hay has a feeding value that is slightly less than good alfalfa. In seasons of probable feed shortage the soy bean can be used as an emergency hay crop to greater advantage than any other plant used for the purpose. Dairy cattle, sheep and beef cattle do well on the hay, eating it up clean with the exception of the coarse parts of the stalk.

Soy bean meal as a stock food has a value comparable to linseed meal or cotton seed meal. It is fully as rich in digestible, crude protein as linseed meal and even higher in this property than cotton seed meal. For dairy cows soy bean meal can be used instead of either linseed or cotton seed meals, where the concentrate is not required in excess of two pounds per day.

Soy bean meal makes a good protein rich addition in fattening beef cattle and sheep, having for this purpose a value equal to linseed meal. Soy bean meal can be used in growing young pigs, but it should not be fed in excess. If fed in conjunction with tankage or skim milk to pigs that have free access to a mineral mixture it gives best results. Soft pork may result from excessive soy bean feeding. Soy bean meal should be freshly ground. Old meal becomes rancid due to the high oil content. It is good practice to mix other grains with the soy beans at time of grinding. Dry, starchy grains like corn, oats or barley will take up the excess oil, thereby aiding in the grinding process and keeping qualities of the meal.

Soy Bean Oil Cake.

About 300 pounds of oil may be pressed out of a ton of soy beans. The hard, dry cake that is left after pressing is ground up leaving a product known as soy bean oil meal or oil cake. As a feed for dairy cows this mill product has a value equal to the best grades of linseed meal. As a feed for swine, soy bean meal furnishes one of the best protein rich concentrates available. One hundred pounds of soy bean oil meal replaced 83 pounds of tankage and 22 pounds of corn, in feeding experiments. From this its high value as a pig feed can be appreciated.

Soy Beans for Silage.

Soy beans in combination with corn in the proportion of one ton to three tons of green corn makes an excellent silage. Ensiled alone the soy bean does not make a very palatable silage, and should therefore always be mixed with corn or other starchy plant, as sorghum, sunflower, or clover.

Harvesting Soy Beans.

The soy bean is a crop comparatively new to Ontario. It has its peculiarities and is not the easiest crop to cure as hay. Late seeded and late ripening, it is ready to harvest from August 10th on. Weather conditions in late August and September are not as a rule favorable to good hay making. The nights are cooler, days shorter and moisture more abundant than in July, when the clovers are harvested.

For Hay.

Good hay curing weather is the first requisite for good soy bean hay. The pods should be partially filled, and the leaves tight, to make the best colored, nutritious and palatable hay. A hay that is green in color and has a sweet and pleasant aroma and is free from mould can only be made during favorable weather. The cutting should be done not later than August 15th regardless of the stage of plant development. Every day after August 15th leads the haymaker nearer to the production of mouldy and undesirable hay. The soy bean crop for hay should be handled in such a way as to save all the leaf possible and give a bright green hay. The best machine for this work is the sweep rake reaper, it having the advantage of delivering the bean stalks into small piles which will cure without further labor. The ordinary mower may be used for cutting the crop and the side-delivery rake to roll the bean stalks into windrows, where they can cure after being put up into very small cocks. All handling while curing must be done while the leaves are still green or damp. The grain binder has been used to harvest the crop for hay with good success when the weather was favorable. In damp weather the bundles will mould if not opened and the centres exposed to the air and sun. Soy beans will shed considerable rain if put up in cocks while still a little green. Curing in the swath and the use of the hay tedder is not to be recommended because of the great loss of leaves and poor color produced. After making, it is best before drawing in to barn or stack to turn the cocks over and expose to the sun for a few hours.

Threshing Soy Beans.

The best machine for threshing is the regular pea and bean thresher. The ordinary grain thresher can be used successfully providing the cylinder speed is reduced to 400 or 500 revolutions per minute; and all concaves and some of the cylinder teeth removed if the beans are dry and brittle. A corn shredder has been used for bean threshing successfully. After threshing the seed should be stored in shallow bins and shovelled over frequently until all surplus moisture has been removed. Care in storage is necessary or mouldy beans will result.—L. Stevenson, O. A. College, Guelph.

Small Advertisements

LOST — From a cutter when a horse ran away at Ceylon on Friday, Dec. 24, overcoat. Finder please leave with The Advance or with the mail carrier on R. R. No. 3, Proton.

STRAYED — One pig from Lot 34, Con. 11, Artemesia, on or about the 18th of December. Please notify Bert Magee, Eugenia. Phone Feversham.

LOST — About December 17th a pair of horn rimmed spectacles with horn legs, double sight. Finder will please leave with Robt. Purvis at Eugenia and receive reward, or at The Advanec office.
