
Making the Canadian Dollar Go Farther than Ever Before

IN the purchase of the common commodities of life, the Canadian dollar has decreased in value during the past decade.

But, in the purchase of an automobile, the dollar is now worth one hundred to two hundred per cent *more* than it was seven to ten years ago—is worth more, in fact, than ever before in history.

While constantly raising the quality standard of its products, General Motors of Canada has increased the purchasing power of the Canadian car-buyer's dollar. . . .

. . . by the economies of volume purchasing and production,

. . . by the close co-ordination of resources and facilities,

. . . by improved labor- and time-saving methods of manufacture,

. . . by sharing with Canada the savings effected by increased production.

In quality and in value, the Canadian dollar now goes farther than ever before in the purchase of a General Motors car.
