RHEUMATIC PAINS DUE TO THIN BLOOD

Relief Comes Through the Use of Dr. Williams' Pink Pills.

The most a rheumatic sufferer can hope for in rubbing something on the swollen, aching joints is a little relief, and all the while the trouble is becoming more firmly rooted. It is now known that rheumatism is rooted in the blood, and that as the trouble goes on the blood becomes still further thin and watery. To get rid of rheumatism, therefore, you must go to the root of the trouble in the blood. That is why Dr. Williams' Pink Pills have proved so beneficial when taken for this trouble. They make new, rich blood which expels the poisonous acid and the rheumatism disappears.

There are thousands of former rheumatic sufferers in Canada, now well and strong, who thank Dr. Williams' Pink Pills that they are now free from the aches and pains of this dreaded trouble. One of these, Mrs. W. F. Tait, McKellar, Ont., who says:—"I am one of the willing ones to tell you of the great benefit I received from the use of Dr. Williams' Pink Pills. After lying in bed for seven weeks suffering untold agony with inflammatory rheumatism, relief finally came through the use of this medicine. I could not move in bed only as they lifted me, and I could only sleep when opiates were given me. The medical treatment I was taking seemed of no avail. Then I was advised to try Dr. Williams' Pink Pills, and soon I began to get relief. After taking six or eight boxes the rheumatism was banished and I had never felt better in my life. It is several years since this happened and I have had no return of the trouble since. I may add that I recommended the pills to two of my friends who were suffering with rheumatism and the pills were equally effective in both cases."

Try Dr. Williams' Pink Pills for anaemia, rheumatism, neuralgia, indigestion or nervousness. Take them as a tonic if you are not in the best physical condition and cultivate a resistance that will keep you well and strong. You can get these pills through any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Poincare Looks to U.S. For New Wine Market

Premier Raymond Poincare, who is reputed to be reasonably dry and usually drinks water, is nevertheless solicitous of the prosperity of the French wine industry and does not despair of America changing her ways in respect to prohibition.

"All countries have the right to legislate as they see fit," he told an audience in the southern French wine region, "but it isn't forbidden to hope that some day even America will admit there is truth in the saying of a charming Anglo-Saxon poet concerning wine: 'I am health; I am Heart; I am Life' which he quoted in good English."

He went on to say that "if wine were harmful it would be known. One would have known it long ago."

He said the recently created International Wine Bureau was at work and "we will continue to defend wine and seek to convince those who speak ill of it."

A tourist once happened to meet the usual "oldest inhabitant" of a village. In the course of conversation he asked the ancient how old he was. "I be just a hundred," was the reply "Well, I doubt if you'll see another hundred years," said the tourist, trying to make conversation. "I don't know so much about that, master," was the hopeful response. "I be stronger now than when I started on my first hundred."

Another advantage Noah had was that he didn't have to bring out a new model ark every year or two.

Red Rose Tea is guaranteed in every way. Order a package to-day. Use any portion of it, and if you are not entirely pleased you may return the balance to your grocer and your money will be refunded. 9-E

OWL LAFFS

BY O.W.L. (ON WITH LAUGHTER)

Ask me another: What smells the most in a packing house? Answer: Your nose.

Manager—"How did you come to leave your last place?"
Clerk—"I was discharged."
Discharged- What for?"
"Doing well."
"Impossible. Where were you?"
"In a hospital."

Smart—"What's the difference between a hair-dresser and a sculptor?"
Slow—"I dunno; what?"
Smart—"A hairdresser curls up and dyes and a sculptor makes faces and busts."

Most people are willing to take all the credit when they are successful and blame fate for all the unlucky breaks.

Teacher—"Johnny, can you tell me what a hypocrite is?"
Johnny—"Yes, mam. It's a boy what comes to school with a smile on his face."

When one is too good he's good for nothing.

You cannot get anywhere quarreling with the public. The thing to do is show them.

If happiness be the aim of life; of what use is education unless it makes for happiness?

Don't guy the fat man who wears a belt and suspenders. He is an ardent advocate of safety first.

"Dad, I've decided to become an artist."
"No objection, provided you don't draw on me."

When we command Satan to get behind us it's often with the hope that he'll push us into doing something we want to do but shouldn't.

"Before we were married, you called me an angel. Now you don't call me anything."
"Well, that evidences my self-control."

A determined man can do more work with a rusty monkey-wrench than a loafer can with a whole hardware store.

Too Much So.

"But, my dear madam, what is the matter with this photograph? It looks exactly like you."
"Why, it has me looking exactly like a perfect old grouch."

A Pretty Way to Serve Strawberries

A simple and pretty way to serve large strawberries is to leave the hulls on and arrange them in a circle on individual plates around a cone of sugar. Eash berry is taken by the hull, dipped in the sugar and eaten from the fingers. A few strawberry leaves on a glass plate make an attractive background for the luscious berries.

Smoking should not be permitted in barns or other buildings where combustible material is stored. Keeping the alleys and floors of those buildings tidy will aid in fire prevention.

When Bruin Makes Friends

Visitors to Jasper National Park, which is Canada's largest and finest national playground, situated in the heart of the Rocky Mountains, have a splendid opportunity of studying the habits of wild animals. For Jasper National Park is a game sanctuary in the finest sense of the word, and guns and hunting dogs are forbidden within its boundaries. It is of interest to observe the manner in which the animals recognize this. Though it is only comparatively few years since this great sanctuary was set aside, the shy deer and mountain sheep are no longer shy, the black and brown bears have become daily visitors to village and to hotel grounds, and the animal population of the park is increasing by leaps and bounds.

However, it is Bruin who demonstrates perhaps most forcibly, how the animals have come to regard man as their friend instead of as their enemy. Now it is a daily event to have one or more bears visit the Lodge grounds in search of the titbits which they know tourists love to feed to them. Nor is it unusual for a golfer playing over the magnificent scenic course which has been laid out in the Athabasca Valley, to meet a bear at the turn of the fairway, or to find a shy deer viewing him with interest as he gets down to line up his putt on one or another of the greens.

A short time ago, it was estimated that the mountain sheep population of this 5,300 square mile national park was over 10,000, with an equal number of deer, while the bears are numbered in thousands and are seen at almost any turn of the road. And when once a bear cub has developed a taste for sugar, he is a confirmed visitor to the Lodge grounds.—Cana-National Railways photograph.

MISTAKES MOTHERS MAKE IN CARE OF LITTLE ONES

Many mothers give their children solid foods at too early an age and say proudly that their babies "eat everything that grown up people do." Such a course is almost certain to bring on indigestion and lay the foundation of much ill-health for the little one.

Other mothers administer harsh, nauseating purgatives which in reality irritate and injure the delicate stomach and bowels and at the same time cause the children to dread all medicine.

Absolutely no meat should be given to a child until it reaches the age of 18 months, and then only if approved by the doctor. For medicine, all strong, disagreeable oils and powders should be abandoned and Baby's Own Tablets given instead.

Baby's Own Tablets are especially made for little ones. They are pleasant to take and can be given with absolute safety to even the new-born babe. They quickly banish constipation and indigestion, break up colds and simple fevers and make the cutting of teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

English Police Get Glowing Tributes

With Only a Shred of Evidence, Two Malefactors Are Brought to Justice

London.—Remarkable tributes to English police efficiency and the speedy detection and apprehension of criminals was paid by the press, following Mr. Justice Avory's sentencing the two slayers of Constable Gutteridge, who was shot down in the performance of his duty. The crime was committed by motor-car thieves in the darkness of a lonely country road on Sept. 27.

No one was arrested for many months. Scotland Yard, with only a shred of evidence to guide them, arrested the suspects on Jan. 20, and, step by step, built up a conclusive case. The jury quickly found them both guilty after a five-day trial and the court imposed the extreme penalty, thus ending what The Times leader characterizes as "the most remarkable trial for murder in recent years. . . . In no case within living memory have the police shown more ability in the detection of obscure and apparently inexplicable crimes. . . .

"Convictions obtained at a long interval after a crime has been committed are of special value for the protection of society. They bring home to the most undesirable criminals that the arm of the law is long and escape from arrest and from suspicion for many months cannot free them from the haunting dread that retribution will reach them in the end."

Mr. Solomon went for a tram ride one day, and had to stand up. Presently a passenger got in, and the conductor shouted: "Will you move up a bit, please?" "Certainly, with pleasure," said Mr. Solomon. This happened again and again, until he reached the end of the car. Then the conductor came up for his fare. "Vat," cried Solomon, "you vant my fare? Vi, I've valked all the vay."

The practice people get in working cross-word puzzles should aid them in making out tax returns.

Germany Builds New Ports for Air Traffic

Berlin.—The month of March saw 1,430 airplanes start from or land at the great Tempelhof airport in Berlin, carrying 3,239 passengers and almost thirty-four tons of baggage, freight and post. Air travel is increasing steadily from all German stations, compelling everywhere a corresponding enlarging of existing ports and the creation of new ones. The present landing place on the Oberwiesenfeld in the northwestern part of Munich, comprising about 200 acres, is being transformed into a modern airport. Air traffic in Silesia is also making great strides, an dthe coming summer will see eight lines in operation.

Announcements of participation in the "Ila," the great international air traffic exposition to be held in Berlin from October 7 to 28, have been received from so many countries, including the United States, that the two great auto halls on the exposition grounds will not be large enough to contain all the exhibits, and it will be necessary to use a third great hall which is now being built. The exposition will be by far the greatest of its kind ever held.

Somebody says there'll never be a monument to an unknown politician. Still, if they ever find a politician admitting he's unknown, he'll be worth a monument.

How Much Water Should Baby Get?

A Famous Authority's Rule

By Ruth Brittain

Baby specialists agree nowadays, that during the first six months, babies must have three ounces of fluid per pound of body weight daily. An eight pound baby, for instance, needs twenty-four ounces of fluid. Later on the rule is two ounces of fluid per pound of body weight. The amount of fluid absorbed by a breast fed baby is best determined by weighing him before and after feeding for the whole day; and it is easily calculated for the bottle fed one. Then make up any deficiency with water.

Giving baby sufficient water often relieves his feverish, crying, upset and restless spells. If it doesn't, give him a few drops of Fletcher's Castoria. For these and other ills of babies and children such as colic, cholera, diarrhea, gas on stomach and bowels, constipation, sour stomach, loss of sleep, underweight, etc., leading physicians say there's nothing so effective. It is purely vegetable—the recipe is on the wrapper—and millions of mothers have depended on it in over thirty years of ever increasing use. It regulates baby's bowels, makes him sleep and eat right, enables him to get full nourishment from his food, so he increases in weight as he he should. With each package you get a book on Motherhood worth its weight in gold.

Just a word of caution. Look for the signature of Chas. H. Fletcher on the package so you'll be sure to get the genuine. The forty cent bottles contain thirty-five doses.

Telephone Service Slow; Chinese Wreck Exchange

Verbal abuse of telephone "centrals" when connections are not forthcoming is for General Li Yun-chang as inadequate way to express exasperation.

This war lord, who commands the 35th Division of General Chu Yu-pu's ill-disciplined Chihli army, had trouble getting a conection through the Tientsin head office exchange. After exhausting a stock of expletives learned in the rugged Shantung Mountains General Li sent soldiers of his bodyguard to the exchange to show that he was not to be trifled with. The soldiers assaulted several Chinese operators, smashed equipment and interrupted service for more than three hours of a busy afternoon.

The exchange is in Chinese territory just outside the boundary of the Italian concession, but it serves a large portion of the foreign areas. The Chinese operators could not be persuaded to return to their posts until the company's foreign engineers arrived, took charge and made the necessary repairs.

Dictator Chang Tso-lin at Pekin has ordered an investigation of the affair.

Minard's Liniment for Toothache.

"I didn't like your prayer this morning," said the deacon. "No?" answered the minister. "And what was the matter with it?" "Well, in the first place, it was too long; and, apart from that, it contained two or three expressions which I thought were scarcely warranted." "I am sorry, deacon," the minister replied, "but it might be well to bear in mind that the prayer wasn't addressed to you."

Firestone

Tread is Scientifically Designed

When Firestone engineers were developing the Balloon Tire they found it necessary to design a tread altogether different from that required by High Pressure Tires.

The Firestone tread was not designed with large, massive projections for appearance or to make plausible sales argument. On the contrary, the projections of the cross-and-square tread are small and the rider strips narrow, permitting the tread to yield to irregularities and cling to the road, giving the greatest non-skid surface. This tough, pliable tread has the wear-resisting qualities that give thousands of extra miles of service and save you money.

Your nearest Firestone Dealer will gladly supply your needs and give you the better service that goes with these better tires.

"PINKHAM'S COMPOUND IS WONDERFUL"

Read This Letter from a Grateful Woman

Vanessa, Ont.—"I think Lydia E. Pinkham's Vegetable Compound is wonderful. I have had six children of which four are living and my youngest is a bonnie baby boy now eight months old who weighs 23 pounds. I have taken your medicine before each of them was born and have certainly received great benefit from it. I urge my friends to take it as I am sure they will receive the same help I did."—MRS. MILTON McMULLEN, Vanessa, Ontario.

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour.

Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.
