The new White Star liner Laurentic, 19,000 tons, completed late in 1927 especially for the St. Lawrence route, which arrived in Montreal on May 9 on her maiden voyage to St. Lawrence ports. With the White Star liner Albertic she shares the honor of being the largest cabin liner ever to come up the St. Lawrence to Montreal.

British Experts Trace Mystery of Red Hair

London.—The mystery of red hair, and why it is prevalent in certain families may be illuminated as one of the results of a survey now being conducted by British education and health authorities.

An anthropometric committee is collecting data from all parts of Britain on the physical characteristics of school children. The effects of environment on physique will thus be further revealed.

The committee's findings may explain why there are so many strongholds of the red-headed in Scotland, and why a vein of red-haired people runs through some counties in England and Wales while in other localities the "reds" are as rare as albinos.

How Titian Painted His First Picture

An Interesting Story for Our Children Who Like Painting

Titian the famous Venetian artist, painted his first picture with flower juices squeezed from Italian wild flowers on the wall of his father's cottage in a tiny village in northern Italy, Mary Newlin Roberts tells us in "Child Life Magazine."

"One hot day in spring on his way from school," writes Mrs. Roberts, "little Titian Vecelli clambered up the rocky slope of the hill where he lived and gathered bunches of wild flowers. When he reached the walls of his home he put the flowers down carefully in the shade and then he noticed his hands and sat up and stared. His brown fingers and palms were stained with every kind of color—purple and yellow and green and red and blue.

"Now it would be interesting to any boy to see that the stems of some Italian wild flowers and blossoming weeds hold juices that stain when they are squeezed hard by strong fingers on a hot day, but to little Titian Vecelli it meant far more, for the sight of the colors sent him dreaming at once. The tints on his hands reminded him of the fresco in the chapel and he rose slowly to his feet and glanced about with eager, wistful eyes. Nobody was at home and it was very quiet on the hilltop, and the bit of cottage wall nearby seemed waiting for something.

"Then Titian Vecelli set to work, all by himself in the shadow of the cottage wall, squeezing and staining any way that he could with his fingers and a little stick, painting his first picture so many years ago. Very slowly on the dull bare wall, a picture came to life. Figures seemed to spring out by magic under the small deft fingers of the boy. He was so very busy that he did not see his father come up behind him and stand with hands upraised in amazement, nor did he see his teacher, Signor Rostelli, climbing up the hill. He stood as quietly as Signor Vecelli and watched in silent amazement the picture on the wall growing bit by bit.

"At last when the sun had set, little Titian found that he could squeeze no more stains from the juicy, aromatic stems, and so with a sigh he backed away to look with rapture at the transformed wall. 'Had I the true colors of a painter, 'twould have more depth,' he breathed. 'But even so I am happy.' And backing farther still he collided with his father and Signor Rostelli who had drawn nearer and nearer."

"D'you hear Payne advertised for a wife?" "No! what happened?" "Got ten replies from men saying he could have theirs."

She (demurely)—"Do you consider my legs long?" He—"Madam, I assure you I never even look."

Many of Canada's leading social and sporting clubs use Red Rose Orange Pekoe Tea exclusively. The added strength and inimitable flavor of Red Rose Orange Pekoe make it last longer, go farther and taste better. Packed in damp-proof aluminum. 13EW

A REAL NERVE TONIC

The Source of All Nervousness is Weak, Watery Blood.

Many people, both men and women, find themselves run down through overwork, or anxieties. Such sufferers find themselves tired, low-spirited and depressed. Their nerves seem to be worn out and they suffer from headaches and other nerve pains. All this comes from starved nerves.

Doctoring the nerves with poisonous sedatives is a terrible mistake. The only real nerve tonic is a good supply of rich red blood. Therefore to relieve nervousness and run-down health Dr. Williams' Pink Pills should be taken. These pills enrich the blood, which tones the nerves, improves the appetite, gives new strength and spirits and makes hitherto despondent people bright and cheerful. Miss Irene Denne, R.R. No. 1, Washago, Ont., tells what Dr. Williams' Pink Pills did for her as follows:—"I suffered for a long time with my nerves and a generally run-down condition. I grew so weak that I had to lie in bed a part of every day. I could not do any work and was taking medicine all the time, trying one medicine after another. I was advised to try Dr. Williams' Pink Pills, and I have reason to be thankful that I acted on this advice, as this was the first medicine that gave me any relief, and in a comparatively short time restored me to the blessing of good health. When I think of the marvellous good these pills did me, I can most highly recommend them to all weak, nervous people."

If you are at all run-down, or weak, you should begin at once to take Dr. Williams' Pink Pills and you will soon be well and strong. These pills are sold by all medicine dealers or will be sent by mail at 50 cent a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Outboard Motors Now Used on Large Boats

Many people still think of the outboard motor as a dinky little tin-can affair that one fastens onto the rear end of an old rowboat and which stalls a few hundred feet out from dock to be puttered with indefinitely. If you are one of these you are due for an awakening, for now large boats are constructed with the use of out board motors in view from the beginning. They are now made with as many as four cylinders, and a twenty-five horsepower motor is fairly common. In the larger boats they are suspended in a well built into the boat. The advantages are that they avoid the troubles of shaft packing and that they can be lifted out of the boat, propeller and all, as one unit, for repairs. They will travel in shallow water, as the motor is made to lift automatically when an obstruction is hit and they will develop speeds up to thirty-five miles an hour. It is expected that 75,000 outboard motors will be built in the United States this year.

Their use is rapidly growing in Canada. Sale records show over 1,000 kere sold during 1927.

Officer on the bridge (much put out)—"Is there a blithering idiot at the end of this tube?" Voice from the engine-room—"Not at this end, sir."

OWL LAFFS

BY O.W.L. (ON WITH LAUGHTER)

EXPERT IN SOME BRANCHES

At mathematics women are
Not thought to be such birds,
And yet a woman is a star
At multiplying words.

The married men's quartet will now sing that popular selection, "My Wife Is An Open Book to Me, But I Cannot Shut Her Up."

"I want a rake—a metal one. That wooden one you sold me last year was no good. It had pyorrhoea!"

"Had pyorrhoea!"

"Yep! All the teeth fell out!"

Times change; and a short skirt when skirts were long is a long skirt when skirts are short.

After the elaborate ceremony the well-wishers were throwing the cutomary rice at the young people. One excited guest button-holed the bride's father and demanded, "Have you any old shoes?"

"Yes," replied the bill-footer patiently, "but sh-h! I'm wearing them."

LAYS AND RELAYS

I long for fame and fortune, too;
I long for duds and diamond rings;
I long for funny things to do—
Oh, gosh, I long for lots of things.

I do not long for gems or gold;
For fickle fame I worry not,
But when it's hot I long for cold,
And when it's cold I long for hot.

I do not long for gold or fame,
All weather I can stand with ease,
But I've a longing just the same
To reprint silly rhymes like these.

If one can curb his longing he
May reap reward two-fold or more;
Our longing's well in hand, you see,
We add this quatrain and count four.

A Scotchman has taken his children out of school because their teacher told him they paid attention.

Hubby, tackling his first meat pie: "Well, well, where did you get this?"

Young Wife: "I made that out of Mrs. Thomas's cook book. It's a—"

"Ah!" he broke in. "This leathery part is the binding, I suppose?"

A mistress of a boarding house hired a young Irish girl who had just arrived in this country. She was somewhat dubious of the girl's ability to wait on the table. So she said, "Norah, do you think you can wait on the table; I have ten boarder, you know?"

Norah: "Sure, and that's all right, ma'am. Why in Ireland I used to feed forty pigs every day."

Money is your servant if you know how to use it; your master if you don't.

Do you remember way back when torchlight parades were features of every political campaign?

There are 112 miles of thread in a pair of ladies' silk hose—and very few blocks of walking.

Every young man is where he is because that is his place.

North Sea Island Milk Contains Iodine Property

Wyk-on-Foehr.—The healing properties of the North Sea air are due to strong emanations of salt, radium and especially iodine, and now a scientist of the Island of Foehr has established the fact that the milk of cows, goats and sheep on the North Sea Islands and the coastlands also contains a surprisingly large amount of iodine. As much as 210 millionths of a gram per liter has been found in cow's milk.

Iodine is the sovereign remedy for hardening of the arteries, and milk with an iodine content is also indicated for various children's diseases. It has long been known that the inhabitants of this part of Germany are almost never afflicted by hardening of the arteries.

The world a-wing follows the world a-wheel.

BABY'S OWN TABLETS THE HOME DOCTOR

Baby's Own Tablets meet all the need that exists in every home where there are young children. They are a laxative, but do not gripe. They are soothing, but do not contain one particle of opiate or other ingredient that can in any way do the slightest harm to the most delicate child.

Baby's Own Tablets reduce fever, relieve colic, banish constipation and indigestion, check diarrhoea, sweeten the stomach and allay the irritation that accompanies the cutting of teeth. They quiet the nerves and promote health-giving sleep and repose. In fact they are as good as a doctor in the home, and once a mother has used them for her little ones she will use nothing else. Thousands of mothers bear testimony as to this. Among them is Mrs. Hurst, Pine Falls, Man., who says:—"I was told to try Baby's Own Tablets by a friend who had used them for all her little ones and said she could not do without them. After using them for my baby boy I quite agree with her and certainly think they are the finest medicine in the world for little ones."

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

"Even a good looker doesn't always see what she looks at."

Don't Make a Toy Out of Baby

~Babies Have Nerves~

By RUTH BRITTAIN

Much of the nervousness in older children can be traced to the over-stimulation during infancy, caused by regarding baby as a sort of animated toy for the amusement of parents, relatives and friends. Baby may be played with, but not for more than a quarter of an hour to an hour daily. Beyond that, being handled, tickled, caused to laugh or even scream, will sometimes result in vomiting, and invariably causes irritability, crying or sleeplessness.

Fretfulness, crying and sleeplessness from this cause can easily be avoided by treating baby with more consideration, but when you just can't see what is making baby restless or upset, better give him a few drops of pure, harmless Castoria. It's amazing to see how quickly it calms baby's nerves and soothes him to sleep; yet it contains no drugs or opiates. It is purely vegetable—the recipe is on the wrapper. Leading physicians prescribe it for colic, cholera, diarrhea, constipation, gas on stomach and bowels, feverishness, loss of sleep and all other "upets" of babyhood. Over 25 million bottles used a year shows its overwhelming popularity.

With each bottle of Castoria, you get a book on Motherhood, worth its weight in gold. Look for Chas. H. Fletcher's signature on the package so you'll get genuine Castoria. There are many imitations.

How To Insulate House Against Heat and Cold

"There are three general ways by which heat is lost or dissipated in our homes," writes W. A. Foster in the practical magazine "Successful Farming." "First," he explains, "the principle by which we secure heat from the sun—radiation. Secondly, the transfer of heat by air movements such as leakage about doors and windows. And third, by the heat transfer through our constructions, such as glass in our sash, the walls, floors or ceilings. The three principles are not wholly independent but are accumulative, consequently, the total heat loss is the sum of all three.

"In the average home there is considerable heat loss by radiation. Heat radiates from the walls after it passes through the materials used in the wall construction. One of our most familiar examples is the heat radiated from the chimney stack. The chimney closet is always warm due to the heat losses from the chimney itself. In the second principle — convection — heat losses from leakage are usually large in the average construction. While one needs ventilation or fresh air for health and comfort, the heat losses from leakage about loose-fitted sash and doors are usually in excess of the ventilation requirements in the average home.

"In frame construction," the "Successful Farming" article continues, "the dry joint between foundation and sill allows cold air to sift through into the basement, which makes the floor unreasonably cold. Extreme care should be taken to set the sill in a mortar bed and further care must be exercised to have a snug-fitting sheathing and siding, otherwise cold air will pass up through the space between the studding and find its way over ceiling and under flooring. While these methods of conserving heat are important they are often overlooked."

Minard's Liniment for Toothache.

Test Weather in Study of Colds

The common cold is now being attacked in an entirely new and novel manner. At Johns Hopkins University a room has been constructed in which all kinds of weather can be reproduced from fogs to zero temperature. The room is insulated by double doors, triple windows and cork padded walls. The effect of weather conditions on colds is the object of the study.

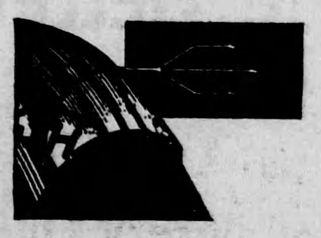
HALLIDAY CO., HAMILTON



Cut away section of a Gum-Dipped Tire showing one cord untwisted into 15 strands. Every fibre of every strand is insulated with rubber.

Why Gum-Dipping Increases Tire Life

A tire in use is being constantly bent backwards and forwards by road action. Such movement generates friction and heat that has a deteriorating effect unless the tire is built to withstand it.

In the carcass of a Gum-Dipped tire there is less friction to generate heat because Gum-Dipping puts a coating of new live rubber around each separate cord that keeps it from rubbing against the cords that lie next to it. It stays cooler and therefore lasts longer.

Your local Firestone Dealer will gladly advise you on your tire problems. See him today.

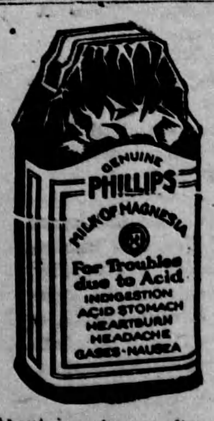
Mrs. Goodkey Tells Her Experience with Pinkham's Compound

Byemoor, Alberta.—"The Change of Life was the trouble with me and I was run-down, thin, and weak and could not sleep, had a poor appetite and could not do much work. I am taking Lydia E. Pinkham's Vegetable Compound now and I feel like a well woman. I saw it advertised in the papers and tried it and Lydia E. Pinkham's Sanative Wash. I have recommended it to a lot of women friends."—MRS. WM. GOODKEY, Byemoor, Alberta.

ISSUE No. 20—'28



When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tastless dose in water. It is pleasant, efficient and harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.
