The Late W. Kerton

The late Walter Kerton passed away in Collingwood hospital on June 28th, at the early age of 48 years. He was suddenly taken ill while in the west and came as far as Collingwood on his way home, and entered the hospital there, where all efforts to save him frod the fatal disease were in vain.

He was born on his father's farm, near Maxwell, where he resided until seventeen years ago, when he moved to Feversham, where he has since resided. He leaves to mourn his loss two sons, Harry and Bert, both of Feversham, also three brothers, William in the west and Marshall of Flesherton and Charles of Feversham.

The remains were brought to Feversham. and on July 1st were taken to the United church, where a comforting sermon was preached by the pastor, Mr. D. Kendall. Interment took place in the Maxwell cemetery, and he was laid beside his wife, who predeceased him twelve years ago, and whose maiden name was Margaret Moore, a daughter of Mrs. and the late Mr. Hector Moore of McIntyre. The service was conducted by the Orangemen

The pall bearers were Wm. Kaitting, Jas. McKenzie, Wm. Heitman, Andrew Pallister, Chas. Smith and Earnest Brownridge, all members of the Orange order.

Flowers were not large in numbers but were very beautiful, and included a wreath frm the young people of Feversham, spray from Maxwell L. O. L., of which the deceased was a member, wreath from the family.

Friends from a distace were:- Mr. and Mrs. J. Bricknell, Mr. and Mrs. Bricknell (H.) of Toronto and Mr. and Mrs. Albert Morrison of Shelburne and Mrs. Pole of Sarnia.

C. C. James Spoke on Georgian Bay System

At the recent district Hydro meeting the following address was given by Mr. C. C. James, engineer of the Ontario Commission telling of the Georgian Bay System, its past performances, its present production and future plans. Mr. James spoke in practically all the 52 municipalities in the system when they introduced hydro preper through the usual laws. Midland was the first born. Orillia, although not in the hydro system was really a half brother as it was a municipality owned plant. Orillia was also the father of public ownership in Ontario.

Sixteen years ago 130 horse power was being developed in the Georgian Bay System. To-day 20,000 horse power is being developed. Mr. James pointed out that the commission has $286,000,000 invested in plants, etc., and the municipalities of Ontario had $66,000,000. The capital invested in development plants and transmission lines was $5,300,000 to be repaid by the municipalities in 40 years The Georgian Bay system had in reserves for renewals of equipment contingency fund and sinking fund $1,400,000.

Only Four at a Loss

In 1927 only four municipalities of the 52 had run at a loss and of these only a few hundred dollars altogether. The total cost of power supplied in the system was $671,000 and there was a surplus on this sale of $46,000 which will be refunded to the municipalities. The investment of the municipalities in local plants and equipment in the system amounts to $2,150,000 and against that there is only $800,000 debenture debt which is less than one half of the plant values. There are reserves of $447,000 which bings the net debt donw to less than half a million.

Three hundred and fifty thousand of the five millions borrowed have been paid back. There is a depreciation fund of $4,000,000 which is 19 per cent of thec apital. In re-arranging the rates for 1928 the commission did not desire to make a big reduction because of considerable new construction work to be done. They did not want to be in the position of lowering rates and then increase them again. Therefore they did not propose to make a big reduction but rather let the municipalities build up a surplus. In all municipalities, however, there would be reductions equivalent to one month's power bill. In 12 municipalities there would be redpction in street lighting costs.

Growth in Power Use

Mr. James told of the ever increasing load on the Georgian Bay system. In 1927 the peak load was 21,000 horse power. The load was increasing by about 2,000 h.p. a year More generation must be secured, he said. The commission was getting some power from Orillia. A new plant was being built in Muskoka and the old Owen Sound steam plant would be put into operation. "You may this fall be asked to curtail your street lighting," said Mr. James, " but you can rest assured that the Georgian Bay will get all the power it wants. We can hook up with the Niagara or Gatineau lines." Mr. James said that the Eugenia development was not big enough to look after the Eugenia municipalities. It would be necessary shortly to increase the voltage on the Eugenia lines to 40,000.

Mr. James said that the great extension in the next twenty years would be in the rural parts. All the incorporated towns and villages in this district now have the hydro power. The urban municipalities would find it to their advantage to help the rural people get power and light.

Rural Extensions

There was considerable activity now in rural districts near Owen Sound. Wingham, Ripley, Kincardine, Grand Valley and Meaford. "But the Georgian Bay system lags woefully behind the Niagara System with respect to rural power" said Mr. James. "You are also behind Eastern Ontario. Boost rural hydro."
