Record Tonnage in Canadian Canals

Figures for August, 1927, Exceeded by 231,044 Tons

PULPWOOD DOWN

Total Freight Handled This Season — 4,824,050 Tons

Ottawa—Freight transportation in the St. Lawrence Canals in August created a record for all time. The total tonnage amounted to 1,359,561 tons, exceeding the tonnage for Aug., 1927, by 231,044 tons and the tonnage for June, 1927, which was the previous high record by 147,958 tons. Compared with the August, 1927, traffic, wheat was heavier by 147,247 tons, oats by 31,209 tons, rye by 25,755 tons, barley by 11,554 tons, but corn decreased by 10,933 tons. Pulpwood also decreased by 40,552 tons and iron and steel by 24,992 tons. Bituminous coal was heavier by 67,560 tons, iron ore by 13,638 tons and sand by 10,106 tons. The total traffic for the season to Aug. 31 amounted to 4,824,050 tons which was 250,241 tons heavier than for the same period in 1927 and 79 per cent. heavier than for the same period in 1923.

On the Welland Canal the total traffic was heavier than for August, 1927, by 103,830 tons and was exceeded only by the monthly record (1,130,277 tons) made in October last year. Grain traffic was particularly heavy, wheat showing an increase over the August, 1927, traffic of 113,530 tons, oats an increase of 28,574 tons and rye an increase of 22,274 tons.

Total traffic through the Canadian and United States locks at Sault Ste. Marie was heavier than during August last year by 1,959,050 tons. Wheat traffic was more than double the traffic last year and other grains increased by 3,681,695 bushels, or 59 per cent., iron ore increased by 497,386 tons and bituminous coal increased by 839,843 tons.

Many of Canada's leading social and sporting clubs use Red Rose Orange Pekoe Tea exclusively. The added strength and inimitable flavor of Red Rose Orange Pekoe make it last longer, go farther and taste better. Packed in damp-proof aluminum. 13EW

What Will you do

When your Children Cry for It

There is hardly a household that hasn't heard of Castoria! At least five million homes are never without it. If there are children in your family, there's almost daily need of its comfort. And any night may find you very thankful there's a bottle in the house. Just a few drops, and that colic or constipation is relieved; or diarrhoea checked. A vegetable product; a baby remedy meant for young folks. Castoria is about the only thing you have ever heard doctors advise giving to infants. Stronger medicines are dangerous to a tiny baby, however harmless they may be to grown-ups. Good old Castoria! Remember the name, and remember to buy it. It may spare you a sleepless, anxious night. It is always ready, always safe to use; in emergencies, or for everyday ailments. Any hour of the day or night that Baby becomes fretful, or restless. Castoria was never more popular with mothers than it is today. Every druggist has it.

Fletcher's CASTORIA

Industry Expands in South England

Many Factories Springing Up Near London and on North Circular Road

London.—England is rapidly changing. There has been a steady expansion of industry in the South of England as opposed to the closing down and the temporary suspension of work in many of the industrial centres of the north. The new industries, especially around London and the south coast of England, are of a miscellaneous character and provide employment for both men and women in an almost equal proportion.

When statements are made regarding the vast amount of unemployment in Great Britain. It must be remembered that this is partly due to the immense influx of girls and women into paid service of all kinds during the war. They learned then how to earn their own livings, and proved to be sufficiently adaptable to be able to hold their situations after the war. In many of the new industries there are as many women employed as men.

Among the new industries around London are those for the manufacture of motorcar bodies and of hosiery works, india-rubber works and various food factories. In the buildings, for example, occupied by the British Empire Exhibition some years ago there are now manufactured motorcar bodies, collars, ice, Oxygen and oxygen-making plant. As new roads are laid down, so new factories are built. Quite recently on a short stretch of the North Circular Road six new factories have been built.

There are also entirely new industries springing into existence. One of the most important of these is for the manufacture of artificial silk, and factories for this product have been set up in various parts of the country. The number of beet-sugar works also increases.

Another notable change, especially marked on the east coast and in the rural districts of Wales, is the way persons who kept their own little shops are closing up. The small employer in England, as elsewhere, is dropping out of existence, and his place is being taken by highly organized central establishments.

Inquiry into Alleged Dumping of Fruit

Victoria, B.C.—Investigation of the reported dumping of American fruit in the Canadian prairie markets, with a resulting loss to British Columbia growers, has been ordered by the new Government here with a view to action by the Provincial or Federal Government.

Inquiry will be made into reports that the marketing law is being flagrantly violated by a system of secret rebates designed to undercut fruit prices. It is held that present conditions threaten to demoralize the fruit industry, and the removal of the former Canadian dumping duty against American fruit is said to be largely responsible for these difficulties.

Driving Simplified With Clutchless Car

London."A revolution in motoring is indicated by the clutchless, gearless device invented by J. S. Robertson," says the Daily Telegraph. With it motoring is reduced to mere steering and braking, making driving the simplest task.

The right engine ratio according to speed is automatically selected as the driver opens or closes the throttle by an accelerator pedal.

Mrs. Lindbergh Goes To Teach in Turkey

New York.—Mrs. Evangeline Lindbergh, mother of Col. Charles A. Lindbergh, has sailed for Turkey to teach at the Constantinople Woman's College, where she has taken an appointment as visiting teacher of chemistry. She was accompanied by Miss Alice Morrow, sister of Dwight Morrow, American Ambassador to Mexico. Miss Morrow is to be hostess at the college.

In these days when you see silver threads among the gold the hair needs retouching again.

Minard's Liniment for aching joints.

Crops Encourage British Farmers

Unusually Good Yield Being Garnered in All forms of Agriculture

London.—Seldom has any industry experienced such a satisfactory change of outlook as that which has taken place in English agriculture this year. The year 1927 was the poorest year for the English farmer in at least half a century. The present year started out with prospects of a most subdued character, but week after week of the most glorious weather in years has worked wonders and almost every field and meadow in the country seems to have yielded with unhoped-for liberality.

The hay and forage crops were all excellent, oats and wheat have been harvested at less cost than for many years, owing to the absence of storms which lodge the grain, and harvesting is completed to a sufficient extent to assure farmers that appearances have not been deceptive and that the weight of the crops is quite equal to their best expectations.

This excellent result is welcome for a variety of reasons. Many farmers, unable to realize profits during the past two or three seasons, were thinking of leaving the land. They have now been encouraged to remain for the better times which seem inevitable. There is also a great need for new and more modern farm equipment throughout the country. Farmers have been unable to finance the purchase of new machinery, but this year's crop will make it possible for thousands of them to do so, with results which will be beneficially felt in other industries.

A great deal of interest is shown this year in new types of farm machinery. A model which has attracted much attention has been exhibited in Hampshire and is believed to make possible very great farming economies. Drawn by one tractor, it cuts, binds and either plows or disc-harrows the soil in one operation. Although the harvest for all crops is astonishingly early, there has been no difficulty in securing labor to do the work, in fact, been an appreciable factor in giving much desired work to thousands who are unable to find jobs in coal mining and other industries.

HAD NO APPETITE WEAK AND DIZZY

This New Brunswick Woman Restored by Dr. Williams' Pink Pills.

Mrs. James Belyea, Brown's Flat, N.B., says:—"I am writing to tell you the great good I had through the timely use of Dr. Williams' Pink Pills. My health had failed and I was troubled with great weakness. I had no appetite and frequently had dizzy spells. The least exertion would make my heart palpitate violently and I felt tired at all times. I had doctored a great deal without getting much relief, and was feeling greatly discouraged when I finally decided to try Dr. Williams' Pink Pills. The happy results following the use of this medicine can be summed up by saying that I am again perfectly well, able to do my housework and enjoy life once more. I feel it a duty to recommend Dr. Williams' Pink Pills to all weak people."

If you have any, or all, of the symptoms above noted, do not delay, begin treatment at once with Dr. Williams' Pink Pills. You will be surprised to note the improvement in your condition after a few weeks. You can get these pills through any dealer in medicine or by mail at 50 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont. If you will send your name and address a little booklet, "Building Up the Blood," will be sent free.

Cheer 'Em Up

London Paints Black Bridge Gay Color to Balk Suicides

London.—Authorities are trying to dissuade would-be suicides from jumping into the Thames from Blackfriars Bridge by psychology.

Alarmed at the increasing number of persons taking their lives at this old Roman river landing, they have painted the former somber, "sad" black in a "happy" combination of light green, trimmed with bright yellow.

107-Year-Old Indian Serves Still in Argentine Army

Buenos Aires.—One hundred per cent. Argentine-Indian and 107 years old, Senor Jose Cruz Gomez is still on active service or liable to be called up in case of emergency. Gomez is not only liable for duty, but is perfectly fit physically and mentally to serve with the Argentine colors.

He appears to be only 50 years of age, but has served under commanders whose swords have rusted these many years, but he is still sound in limb. He has no fads or rules for living to a great age; he just lives normally and appears likely to do so for many years.

When you give, take to yourself no credit for generosity, unless you deny yourself something in order that you may give.—Sir Henry Taylor.

A Good Man

Rain was pouring down as I awakened this morning, and my first thought was, "What a dreary day!" Immediately, I heard a cheery whistle, accompanied by the rattle of garbage cans. The garbage-man was at work. As I listened the thought came to me, "Surely he is a good man," for I well knew the happiness expressed by the whistle came from within.

On going to the window, I observed that his horse, fat and sleek, was protected from the rain by a heavy blanket When the cans had been placed in the wagon, the horse was given an apple and an encouraging pat on the nose.

My opinion of the man was confirmed, for are we not told, "A good man is merciful to his beast"?

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the Newborn Babe or the Growing Child.

There is no other medicine to equal Baby's Own Tablets for little ones—whether it be for the newborn babe or the growing child the Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother can always feel safe in using them.

Concerning the Tablets, Mrs. John Armour, R.R. 1, South Monaghan, Ont., says:—"We have three fine, healthy children, to whom, when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fever and make teething easy. They are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

France Honors Inventor Of Sparkle in Champagne

Epernay, France.—Dom Pedignon, be monk who put the first sparkle in champagne wine 200 years ago, lives in the hearts of his countrymen. Great religious celebrations, under the direction of Mgr. Neveux, Auxiliary Bishp of Rheims, have been held in honor of the man who put champagne on the gastronomic map.

Wine growers from all the countryside around Rheims and Epernay flocked here for the celebrations, and many a bottle of champagne hoarded in dusty cellars was oponed in honor of its inventor. Dom Perignon was the cellarist of the wine cellar of Hautvilliers Abbey.

Mrs. Oldman: Don't you find reading a cook book awfully stupid?

Mrs. Newman: On the contrary, I find it has a good many stirring passages!

Smoking Prohibited For Peiping Youth

Peiping (Peking)—The Peiping municipal government has just issued a series of regulations prohibiting youths under 20 years of age from smoking or drinking wine. Posters with the porclamation printed in full have been pasted up all over the city.

Fines amounting to $5 for each offense are to be imposed on any boy or girl caught drinking or smoking, unless the culprit is less than 13 years old, in which case the parents will be warned and fined. Dealers who sell cigarettes to young people are also liable under the new law.

Veterinaries use Minard's Liniment.

THE LURE OF CANADA'S MINERALIZED REGIONS

Unparalleled Activity in Areas Underlain by Precambrian Shield—Vast Sums Being Expended*

This year 1928 will undoubtedly be a record one in the history of Canadian mining. The search for mineral deposits has been unequalled both for its intensiveness and for its breadth of activity. Never in any one year has so much money been spent in exploration as will have been spent this year. The operations are Dominion-wide, but by far the most important are those that are directed to areas underlain by the Precambrian rocks of the northern parts of the provinces of Quebec, Ontario, Manitoba and Saskachewan, and of the Northwest Territories.

The most spectacular explorations are those that are headed into the more remote parts of the country east and west of Hudson Bay. When it was learned last winter that transportation to Flinflon was to be provided, that that large ore-body was finally to be exploited, and that other large ore-bodies in northern Manitoba had been discovered, the Department of Mines at Ottawa was flooded with requests for information regarding that part of the country. Then intest broadened and he possibilities of more remote areas were considered. was felt that the completion of the Hudson Bay railway to Churchill and the increase of boat transportation on the bay would render accessible a great stretch of country that had hithero been regarded as Canada's hinerland. Then came the desire to be on the ground early and secure the best. The result is that a great many prospecting parties have left for these northerly areas. The exploratory work is entrusted to hardy men of experience and knowledge. Some prospectors have gone to Hudson Bay by way of northern Ontario and northern Manitoba, others have left by boat from points on the Atlantic coast. One company alone has sent by boat ten parties of two men each and the necessary supplies. These will be assisted and directed by men sent in by aeroplane.

In the more readily accessible areas and in areas where transportation facilities are of the best, search for more mineral deposits is being prosecuted with feverish intensity. This takes the form of surface prospecting and of underground testing by diamond drilling, shaft sinking and drifting. All this exploratory work has been given a careful impetus by the discoveries centreing on the northern part of the Manitoba-Saskatchewan boundary, the Sudbury, Patricia and other areas of ntario, and it is expected that by the close of the year a very important addition will be made to the known and developed mineral reserves of the country.

*Prepared at the direction of Dr. Charles Camsell, Deputy Minister of Mines, by Mr. Wyatt Malcolm, Geological Survey, Canada.

Low Waters in Rhine Portend Fine Vintage

Coblenz.—The water in the Rhine is so low that the famous "hunger stones" are visible in various places. This means, as the experience of centuries has proved, that the 1928 wines will be unusually good.

One of these stones was last visible in 1911 and 1921, and both these years brought famous vintages, as did the "comet year," 1811, which was also extraordinarily dry.

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

To Clean Dirty Well

Have a 6-inch well with tile casing in which the water has been spoiled by mice falling in and wish to clean it out and purify it so I can use the water.—J. H.

Such cases as this are common, especially when rural schools are opening up and the wells must be cleaned up and the water made safe and palatable. It would be possible by properly treating the water with chloride of lime to make the water safe for drinking without danger of disease, but no one wants to pick pieces of dead mice and rats out of his teeth. So about the only practicable thing is to dose the water heavily to kill any possible disease germs, then clean out and scrub the walls.

First treat the water in the well with chloride of lime to kill any disease germs which might be present. As you do not give the depth of the well, I would suggest that you secure about three pounds of fresh chloride of lime and mix it up in a tub full of water, and pour this into the well, stirring it up carefully. Let this stand a day or so, then pump out the well as completely as you can, remove the pump and wash down the casing with a brush wet with a strong chloride of lime solution, and also wash off the pump pipe. Then before putting back the pump, you ought to clean out the bottom thoroughly by using a sand bucket, which is a heavy bucket, the right size to slip down the well easily and provided with a loose bottom to let the water and mud in. It closes when you lift it up.

Then make a worm-tight cover, which you can do with concrete, put in the pump and make it tight, and you ought not to have any further trouble. The water will probably taste so strong of chloride of lime that you cannot drink it for a few days, but this will soon wear off.—I. W. Dickerson.

The blaze was extinguished before any damage was done by the local fire department.—Lansing (Ill.) paper.

CANCER FREE BOOK Sent on Request

Tells cause of cancer and what to do for pain, bleeding, odor, etc. Write for it to-day, mentioning this paper. Address Indianapolis Cancer Hospital, Indianapolis, Ind.
