LIFE ASSURANCE COMPANY

Capital—£1,000,000 Sterling.

No 1 Prince's Street, Bank, LONDON.

Empowered by Special Act of Parliament, 4th Vict. Cap. 9.

ASSURANCES PAYABLE DURING LIFE.

TABLES have been constructed for the use of persons who may be desirous of effecting a Life Assurance for the benefit of their families, in the event of premature death, for the largest possible amount which their present means will afford; and at the same time secure the advantage of having the sum assured made payable to themselves, in the event of a prolonged life.—The Tables show the Annual Premium required for an assurance of £100 or more, payable to the Assurer himself upon his attaining the age of Fifty, Fifty Five, Sixty, or Sixty-five, or to his representatives at his death, if that event should happen previously.

Every description of Life Assurance transacted.

Detailed Prospectuses, and every requisite information as to the mode of effecting assurance, may be obtained on application to

THOMAS BRIGGS,
Agent,

FLAX, HEMP, JUTE AND RHEEA FIBRE,

Prepared without Scutching

BY

J. Hill Dickson's Patent Portable Machine

To be worked by

HAND, WATER, OR STEAM POWER.

117 Gt. Dover Road Boro, London.

THE advantages and economy gained in converting GREEN FLAX STRAW by Machinery, into Stronger and Finer fibre for being spun, on Cotton, Silk, Worsted, or Flax Spinning Machinery, than if retted by steeping in either Cold or Hot Water (which process frequently by over decomposition produces as much Tow as long Fibre) arises from the following facts, respecting a system that avoids Tow and Waste.

1st.—The seed bolls or husks can be taken off in the field as the flax is pulled, by turning the side-projecting rollers that are upon the ends to permit of only about six inches of the top or seed ends, to pass down between them to break the seed bolls without crushing or injury to the seed, or taking off any portion of the fibre.

2nd.—The wood inside the fibre is so crushed and ground into dust when laid on the grate-like moving table, which admits of such stuff falling through, that whether the Flax Straw Retted in the usual way, the woody and dusty substance is entirely got rid of without scutching, and the reeds or (as it is called) hard of the fibres are so preserved from being broken into tow, that they appear like so many narrow ribbons. Flax spinners are certain to appreciate this great improvement in preparing, as no Tow or Waste can be seen, and as a consequence there is a gain of fully one-third more fibre from a given weight of flax straw than by any other invention or system known, see report of Messrs. Marshall & Co., of Partington & Leeds, taken from the Belfast Flax Society reports and copied at page 214 in the work of Dixon on the Fibre, Plants of India Flax, Hemp, &c., &c.

3rd.—The Flax and Hemp being when free from the wood, covered over with a natural Green Gum, is made perfectly soft and two-thirds White, by a simple run of Hot Water, as the fibre passes through in a few minutes, the washing part of the invention, and then wound dry at the end, by this means the fibres are stronger and better adapted for the Flax Spinners than any retted flax, and the yarns from it will be nearly white without alkalies or acids to injure the strength, and ready for weaving without boiling.

4th.—If very fine quality be required for Cotton, Silk or Worsted spinning purposes, the cothonizing part of the Machine must be worked and the soothing liquid applied and by such means flax equal to the Best Courtrae, Flax at £100 to £150 per ton can be produced; and practical instructions will be given to parties purchasing the machine by the Inventor and Patentee.

Mining Company.

CAPITAL $100,000.

IN

SHARES OF FIVE DOLLARS EACH.

THIS Company has been formed for the purpose of working a valuable

Lead Mine

discovered in the Third Concession of the Township of Marmora. Excellent water power on the Lot, (one hundred and twenty-five acres), sufficient to work a crushing mill and to do any pumping required, with an unlimited supply of wood in the immediate neighborhood, give this Company advantages possessed by few Mining Companies in the Province, while the great and increasing demand for Lead ensures the Company large profits on its outlay.

The Company will take out Lead Ore during the Winter and in the Spring, and will erect a Crushing Mill and Furnace, for the purpose of supplying the Province with Pig Lead.

Specimens of the Ore may be seen for a short time at the Office of Thomas Wilson, Esq., opposite the Post Office, Kingston, where Shares may be taken by those wishing to participate in the rich returns confidently anticipated by the Company.

Steinway & Sons'

PIANOS

ARE NOW ACKNOWLEDGED TO BE THE

BEST INSTRUMENTS

IN AMERICA,

AS WELL AS IN EUROPE.

THEY WERE

AWARDED A FIRST PRIZE MEDAL

At the Great International Exhibition of 1862 for

Powerful, Clear, Brilliant and Sympathetic Tone,

As shown in Grand and Square Pianos.

TESTIMONIALS,

FROM THE MOST DISTINGUISHED ARTISTS TO MESSRS. STEINWAY AND SONS.

New York, December, 1864.

THE Piano-Fortes, Grand, Square and Upright, manufactured by Messrs. Steinway & Sons, have established for themselves so world-wide a reputation, that it is hardly possible for us to add anything to their just fame.

Having thoroughly tested and tried these instruments personally for years, both in public and private, it becomes our pleasant duty to express our candid opinion regarding their unquestioned superiority over any other Piano known to us.

Among the chief points of their uniform excellence, are:—Greatest possible depth, richness and volume of tone, combined with a rare brilliancy, clearness and perfect evenness throughout the entire scale; and above all
