FIRE DEPARTMENT.

THIS COMPANY continues to INSURE Buildings and all other descriptions of Property against LOSS or DAMAGE by FIRE, on the MOST FAVORABLE TERMS, and at the LOWEST RATES charged by any good English Company.

All just losses promptly settled, without deduction or discount, and without reference to England.

The large Capital and judicious management of this Company insures the most perfect safety to the assured.

No charge for Policies or Transfers.

LIFE DEPARTMENT:

The following advantages, amongst numerous others, are offered by this Company to parties intending to insure their lives:—

Perfect security for the fulfilment of its engagements to Policy-holders.

Favorable Rates of Premium.

A high reputation for prudence and judgment and the most liberal consideration of all questions connected with the interests of the assured.

Thirty days' grace allowed for payment of renewal premiums, and no forfeiture of Policy from unintentional mistake.

Policies lapsed by non-payment of premiums may be renewed within three months, by paying the premium, with a fine of ten shillings per cent. on the production of satisfactory evidence of the good state of health of the life insured.

Participation of Profits by the assured amounting to two-thirds of its net amount.

Large Bonus declared 1855, amounting to £2 per cent. per annum on the sum assured, being on ages from twenty to forty 80 per cent. on the premium. Next division of profits in 1865.

Stamps and Policies not charged for.

All Medical Fees paid by the Company.

ASSURANCES PAYABLE DURING LIFE.

TABLES have been constructed for the use of persons who may be desirous of effecting a Life Assurance for the benefit of their families, in the event of premature death, for the largest possible amount which their present means will afford; and at the same time secure the advantage of having the sum assured made payable to themselves, in the event of a prolonged life.—The Tables show the Annual Premium required for an assurance of £100 or more, payable to the Assurer himself upon his attaining the age of Fifty, Fifty-Five, Sixty, or Sixty-five, or to his representatives at his death, if that event should happen previously.

Every description of Life Assurance transacted.

Detailed Prospectuses, and every requisite information as to the mode of effecting assurance, may be obtained on application to

THOMAS BRIGGS,
Agent.

ACCIDENTS
To Life or Limb
In the Field, the Streets, or at Home, can be provided for by a Policy in the

NEW YORK
ACCIDENTAL INSURANCE COMPANY.

$5000 in case of Death, and $25 a week while laid up by injury secured by an Annual Payment of from $25 to $30.

$5000 in case of Death, without weekly compensation, for from $15 to $18 per Annum.

Smaller and Larger Sums in Proportion.

Policies written from $500 to $10,000 on one Life.—and from 1 month to 5 years.

INDUCEMENTS.

The Rates of Premium are very low.

The plan is so simple that any one can comprehend all its workings.

No Medical Examination is required, and those who have been rejected by Life Companies, in consequence of hereditary or other diseases, can effect insurance in this Company at a very small cost.

No better or more satisfactory use can be made of so small a sum.

The most popular Monthly in the world.—*New York Observer.*

We must refer in terms of eulogy to the high tone and varied excellences of HARPER'S MAGAZINE—a journal with a monthly circulation of about 120,000 copies—in whose pages are to be found some of the choicest light and general reading of the day. We speak of this work as an evidence of the American People; and the popularity it has acquired is merited. Each Number contains fully 144 pages of reading matter, appropriately illustrated with good wood cuts; and it combines in itself the easy monthly and the more philosophical quarterly, blended with the best features of the daily journal. It has great power in the dissemination of a love of pure literature.—TRUBNER'S *Guide to American Literature, London.*

FLAX, HEMP, JUTE AND RHEEA FIBRE.

Prepared without Scutching

BY

J. Hill Dickson's Patent Portable Machine

To be worked by

HAND, WATER, OR STEAM POWER.

117 Gt. Dover Road Boro, London.

THE advantages and economy gained in converting GREEN FLAX STRAW by Machinery, into Stronger and Finer fibre for being spun, on Cotton, Silk, Worsted, or Flax Spinning Machinery, than if retted by steeping in either Cold or Hot Water (which process frequently by over decomposition produces as much Tow, as long Fibre) arises from the following facts, respecting a system that avoids Tow and Waste.

1st.—The seed bolls or husks can be taken off in the field as the flax is pulled, by turning the side-projecting rollers that are upon the ends to permit of only about six inches of the top or seed ends, to pass down between them to break the seed bolls without crushing or injury to the seed, or taking off any portion of the fibre.

2nd.—The wood inside the fibre is so crushed and ground into dust when laid on the grate-like moving table, which admits of such stuff falling through, that whether the Flax Straw, Retted in the usual way, the woody and dusty substance is entirely got rid of without scutching, and the reeds or (as it is called) hart of the fibre are so preserved from being broken into tow, that they appear like as many narrow ribbons. Flax spinners are certain to appreciate this great improvement in preparing, as L. Tow or Waste can be seen, and as a consequence there is a gain of fully one-third more fibre from a given weight of flax straw then by any other invention or system known, see report of Messrs. Marshall & Co. of Partington & Leeds, taken from the Belfast Flax Society reports and copied at page 214 in the work of Dixon on the Fibre, Plants of India Flax, Hemp, &c., &c.

3rd.—The Flax and Hemp being when free from the wood, covered over with a natural green gum, is made perfectly soft and two-thirds White, by a simple run of Hot Water, as the fibre passes through in a few minutes, the washing part of the invention, and then winding dry at the end, by this means the fibres are stronger and better adapted for the Flax Spinners than any retted flax, and the yarns from it will be nearly white without alkalies or acids to injure the strength, and ready for weaving without bolting.

4th.—If very fine quality be required for Cotton, Silk or Worsted spinning purposes, the cottonizing part of the Machine must be worked and the softening liquid applied and by such means flax equal to the best Courtrai Flax at £100 per ton can be produced, and practical instructions will be given to parties purchasing the machine by the Inventor and Patentee.
