

On The Main Street

with Ford Moynes

An ex-member of the Lindsay Town Council had this to say of the late W. G. Graham, a former Mayor: "He was an unusual individual who learned how to speak on his feet and he was always thinking of the welfare of the working man. One of the best things he did for Lindsay was to bring about and introduce a system of garbage collection and he worked hard for Lindsay in other matters of importance."

* * *

When Gorman's Soda Water Works purchased the old and well established Lindsay Soda Water Works the intention was to transfer major operations to Peterborough. However, because of obstruction to the Company's plan for expansion on a Peterborough site, it is now possible that the Company will carry on in Lindsay on a larger scale.

The annual Lindsay Central

Exhibition is but four months away and Management and Directors have already discussed a number of ideas and plans for the annual event. A reader of this column has suggested that the plans should include a liberal application of paint, especially in an effort to brighten the exterior of the main building. Last year a decided improvement took place when the Adelaide Street picket fence was replaced by a good wire fence. The suggestion is made that the Board enlist the support of the ten Provinces in Canada and have each Province erect a large 5 by 6 foot highly colorful Coat of Arms and these paintings be placed along the east side of the barren and unattractive west wall of the main building. Perhaps Hon. Leslie Frost as an Honorary Director could be the key contact man.
