## The Late Mrs. Myers

The late Mrs. Geo. Myers, who passed away on December 23rd, 1928, was the youngest daughter of the late John and Catherine Hanley. She was born in Hope Township 78 years ago, and came with her parents to Osprey Township when very young and lived on the Eighth Line until her marriage to her now sorrowing husband 52 years ago, when she went to live on the Twelfth of Osprey. In the spring of 1912 she and her husband moved to Flesherton where they have since resided.

There is left to mourn the loss of a devoted wife and mother, her husband and three sons and one daughter —Will of Kimberley, Sheldon at home and Oscar of Shackleton, Sask., and Mrs. Eli Corbier of Aurora, one son, Albert, predeceased her 18 years ago at the age of 18.]

The remains were laid to rest in the Flesherton cemetery and the Rev. Jos. Harrower of the United Church and Rev. Saunders of the Baptist Church conducted the service at the church and grave. The floral tributes were numerous and beautiful: a pillow from husband and family; spray, Mr. and Mrs. John Kernahan, Maxwell; spray, Mr. and Mrs. Wm. Poole, Lady Bank; spray, Providence Ladies' Aid; spray, Mr. and Mrs. Jas. Caushier, Hagerstown, Md.

Those who attended the funeral from a distance were Mr. and Mrs. Eli Corbier, Aurora, Mr. Arthur Brooks, Owen Sound; Mr. Clarence Semple and Fred Semple Islington;

The pallbearers were Dr. Jos. Ottewell, Wm. Inkster, Jos. Duncan, H. Down, Robt. Ferris and R. Porteous.

Flower bearers were: Clarence, Fred and Percy Semple, Clarence, Cecil and Earl Alexander.

The sympathy of the community goes out to the bereaved ones.

## The Late Mrs. Harrison

In the death of Isobella Stewart, beloved wife of Alfred Harrison, a a highly respected member of this community passed to her Heavenly Home on December 23rd, 1928.

Mrs. Harrison was born on October 21st, 1856, on the west backline of Artemesia. She was a member of the United Church of Canada, and was for many years a faithful teacher in Chalmer's Sunday School. She leaves to mourn her loss, her husband and two sons, James and Ward.

The funeral service was held in St. John's United Church on Wednesday, December 26th, 1928, interment taking place in Flesherton Cemetery. Rev. Jos. Harrower conducted the services, assisted by Rev. M. Saunders.

Harrison was held in the community, of the high esteem in which Mrs. Harison was held in the community, there being a pillow from the family, spray from Mr. and Mrs. J. L. McMullen, Mr. and Mrs. Alf Whitten, Mr. and Mrs. Wilf. Whitten, Mr. and Mrs. Allen, Bannon family, St. John's Church, Alcox family, and Mr. and Mrs. W. Smith, Mr. and Mrs. Frank Chard, Mrs. E. Ward, Mr. and Mrs. Alex. Stewart and family and wreaths from Mrs. Duncan Stewart, Mr. and Mrs. C. Best and Mrs. Allie Best and from the neighbors.

Among the many friends who came to pay their last respects to the deceased, and to extend their sympathy to the bereaved members of the family were the following: Mr. and Mrs. Alex. Stewart, Olga and Elma from Owen Sound; Mr. and Mrs. Alf Harriston of Sheriden, N.Y.,; Mrs. Kate Jamieson and Mr. Wilf Whitten of Toronto.

### WOLVES IN BRUCE.

A correspondent to the Northwest corner of the Globe says: Local naturalists are unable to account for the unusual variety of wild life being seen and shot close to towns and villages and in well-settled country districts of Bruce and Grey counties this winter. Yesterday Pete Alpaugh and Frank Legge, who live near Chesley, shot a timber wolf in Sullivan township after trailing it for two and a half days. Several deer have been seen. Beavers in Bentinck township are so thick that farmers have protested to the Ontario Government against the flooding which their dams have caused. More than a dozen timber wolves have been reported shot on the Bruce peninsula, and twice as many more seen and heard between Wiarton and Tobermory.

Beatty Bros., of Fergus, have engaged an industrial nurse for their factory in the person of Miss Mary Rutherford. She will not only be on hand to look after the emergency cases at the plant but will be available to visit the homes of the workmen in case her services are required.

### BULL FOR SERVICE

Shorthorn bull, Cedardale Duke No. 189,318, for service on lots 134-35, E. Toronto Line, Artemesia. Terms: $2.00; if paid before January 1, 1929, only $1.50.

—ALEX. MILLER,
R. R. No. 5 Markdale.

## Christmas Greetings On Road 11 Years

Dr. Clarence C. Dudgeon of Port Credit, formerly of Flesherton, received some Christmas greetings the other day just eleven years after they had been written by a war-time pal.

In 1917 Dr. Dudgeon was a member of a machine gun unit over there. On Dec. 26 of the present year, amid the peaceful surroundings of his Port Credit home, he received a letter that had been addressed to him in Sussex on Dec. 23, 1917. Just at the time his pal had written from Godalming Surrey: "Dear Dudgeon: A merry Christmas and a happy New Year," his unit had been given the questionable privilege of spending a merry Christmas in France.

In the subsequent wanderings of the letter it acquired such a multiplicity of postage stamps and cancelllations that the address had been retired to a position of minor significance. At least one person during its wanderings contributed to the cost of delivery, as the envelope bore two Canadian two-cent stamps in addition to the English postage.

### QUALITY AND PRICE.

**The Price Difference Is the Stimulus for Improvement.**

The market demands quality, every article of farm produce needs be like every other article of the same grade or class. Buyers demand this and if they do not get it they go where uniformity of grade and quality standards are maintained. On farms where the production is mixed, this is mustard and oats, chickens of all colors and shapes, or pigs of various descriptions, etc., quality products are not in evidence. So the first move toward quality products is either a specialized or diversified type of farming where the elements of production are at least themselves uniform, and capable of producing quality.

Get started right this spring. Use the best grades of the best varieties for seeding, eggs from the best hens for hatching, and live stock of a type that is likely to produce market toppers. High quality goods are always in demand at fair prices.—Dept. of Extension, O. A. College.

**Canadian Apple Excels.**

In the Imperial apple show in England, during years 1922 to 1925, Canadian apples won 64 first places, 73 seconds, 24 thirds and 22 special prizes. In 1925 the British Columbia Jonathan was judged to be the best dessert apple in the British Empire, and the premier cooking apple was the Ontario Rhode Island Greening. In 1924 and 1924 Canadian-grown McIntosh apple was judged to be the best dessert apple in the Empire.

## BUILDING THE GRANARY

### Strength and Convenience Should be Carefully Considered.

**Reinforced Concrete Is Preferable to Timber — It Makes the Granary Safer From Rodents — Roguing Potatoes.**

(Contributed by Ontario Department of Agriculture, Toronto.)

No hard and fast rules can be laid down for the erection of a convenient and efficient granary. Each problem requires a knowledge of local conditions and requirements. Granaries, in the majority of cases, are built-in enclosures on the barn floor, and constructed with too little regard for strength, durability and convenience. These structures should be located immediately over the feed room, each bin having a chute with a controlling slide, or a canvas distributor to convey the grain to the hopper of the grinder; or, if the grain is intended for market, to a sack placed on the scales below the chute ready to receive it. To facilitate emptying the grain, the floor of the bins should be sloping.

**Be Sure the Structure Has Sufficient Strength.**

The important consideration in the construction of granaries and bins for loose grain is to be sure that the structure is designed with sufficient strength to prevent bulging of the sides and springing of the floor; for grain, owing to its enormous outward thrust, corresponding somewhat to that of water, has a tendency to burst the sides unless well braced or supported. Timber construction requires frequent repairs to prevent decay and general depreciation from use. It is always liable to climatic conditions. The boards will crack and shrink in the summer when the bins may be empty, and when the new grain is dumped into the bins an enormous quantity promptly disappears into the cracks and crevices and through mice holes, entailing considerable loss to the farmer, to the consumer and to the nation. Thousands of bushels of grain are, in this way, annually lost to the producers through sheer indifference to the condition of the granary. Yet this profitable waste may be easily remedied and made secure by lining the bins with sheet metal.

**Good Concrete Improves With Age.**

While there is an annual depreciation on a timber structure varying from four to eight per cent., concrete construction grows better as it grows old; hence concrete properly reinforced, is the ideal material for granaries, because it is both dampproof and rat-proof, two very essential factors in the construction of granaries.

Concrete properly made to suit existing conditions, is absolutely impervious to moisture, and can be kept as dry as any structure of wood ever built. The experience of many farmers is that grain mature enough to be placed in storage will not spoil on contact with concrete, nor will corn mold, provided there is good ventilation and the roof is tight. To get rid of rats and mice destroy their nesting place and to this end concrete is pre-eminently the best material and is recommended for all farm structures.

**Reinforced Concrete Pays.**

Under average, present day, conditions a reinforced concrete granary may represent an additional outlay of about 25 per cent. over that required to construct of timber, but the high efficiency distinctive of concrete quickly offsets this increased initial cost. Concrete construction has many, in short, important advantages. The contents are safe from the depredations of rodents, is dampproof, requires neither paint nor repairs, is fireproof, the grain is perfectly preserved under all conditions of climate and temperature, and the resulting structure is practically everlasting.—John Evans, O. A. College, Guelph.

**Roguing Potatoes.**

The average yield of potatoes per acre in the Province of Ontario for the past thirty-six years has been about one hundred and fifteen bushels. The yields vary greatly. In 1917 there were variations in Ontario from twenty-five or less up to seven hundred bushels per acre. People are realizing more and more that for high yields of potatoes conditions must be favorable. It is important to have good fertile soil well cultivated and to plant a liberal supply of seed of the best varieties at the proper time. Seed potatoes somewhat immature which have been produced in a cool climate, and which are comparatively free from disease, are apt to furnish seed of high quality. Even under these conditions it is well to carefully inspect the seed before planting and to thoroughly rogue the growing crop.

A potato field is rogued by removing the undesirable plants. A thorough roguing of the growing crop once or twice during the summer is one of the most effectual ways in ridding the field of a number of the potato diseases. This operation would also insure the immediate removal of the weak and unthrifty plants which are sure to produce undesirable seed. Potato growers sometimes go through their fields and remove all plants which are not true to type. When roguing is done with a double object of eradicating diseases and of purifying the variety decided advantages are sure to follow. Thorough roguing is one of the best methods of securing pure, healthy, seed of high quality. — Dr. C. A. Zavitz, O. A. College, Guelph.

## Mrs. R. M. Henderson, Formerly of Feversham Dies at London, Ont.

Word was received on Wednesday of the death at London, Ont., of a former resident of that village in the person of Mrs. R. M. Henderson. Mrs. Henderson was attacked with the flu and pneumonia then set in from which she did not rally. The late Mrs. Henderson leaves to mourn the loss of a devoted mother three sons and five daughters, all of whom are living. Mrs. Henderson and family had only moved to London a little over a year ago, after having sold the store at Feversham to Mr. G. Eby, who now conducts it. Much sympathy is extedned to the bereaved family in the sad loss they have sustained.

## THE LATE H. WRIGHT

The death of Henry Wright removes a well-known Osprey Township farmer, he having been a resident of the Fouth Line. Mr. Wright had been in failing health for over a year. His parents came from York County, and conducted a grist and saw mill at Wareham. Surviving Mr. Wright are his widow, four sons and one daughter, namely: Elmer, Owen Sound, Kenneth in Detroit, Emerson and Vern at home, and Mrs. Fred Taylor of Mount Zion. Theree brothers, all residents of Toronto, also survive, Rev. R. Walter Wright, Albert and Johnson Wright. The funeral was held on Friday, service being conducted at the home and interment was made in Mount Zion cemetry.

Much sympathy is extended to the sorrowing family.

### MARKDALE NOMINATIONS.

Reeve—T. H. Reburn, Dr. J. A. McArthur, J. H. Johnston. Mr. McArthur retired.

Councillors—G. A. Beeton, E. E. Stewart, G. L. Mercer, A. V. Gilbert, G. Scott, J. Hill, E. Tuck, A. L. Gillespie, N. Henry, A. W. Sproule, R. G. Noble, A. Rusk, R. Down, H. Purvis J. W. Lyons, J. Sutherland, W. Foster, J. C. Mercer.

School Trustees—J. W. Elliott, R. G. Noble, J. W. Lyons, J. Hill, J. S. Richardson, A. V. Gilbert.

C. J. Mickle of the firm of Mickle, Dyment & Son, and his son, Chas. S. Mickle, have donated to Gravenhurst sufficient lakeshore property to make a public park.
