another cause of "LINE'S BUSY" —business lost

WHEN a call comes for a man at the far end of the office the line is tied up for useless minutes until he reaches the telephone. Anyone else trying to call is told: "Line's Busy", but in reality the line is idle.

An office with only one telephone when it needs two or three, or an office in which telephones are poorly located, is a sure cause of unnecessary "Line's Busy", a sure time-waster, a sure business loser.

"Line's Busy" is the chief cause of the million telephone calls a day in Ontario and Quebec which fail to get through. They mean two million minutes a day wasted — congestion of traffic — constant irritation — a handicap to all business.

We are making every effort to provide the best possible telephone service.* But it takes three people to complete a call. Only through public co-operation can we reach maximum efficiency.

We would be glad at any time to have our experts survey your telephone facilities and submit a report. It will save time — yours and other people's — and it will get business for you which you are now losing through "Line's Busy."

**New telephone plant and service improvements will mean an outlay for 1929 alone, of more than $27,000,000.*
