A Toronto despatch says: A prediction that within the near future students at Ontario High Schools and Collegiates will not have to write matriculation examinations, was made here by Premier G. H. Ferguson, acting in his capacity as Minister of Education. The Premier stated a system of recommendation by teachers, based on the entire year's work, is being considered by a special committee, with his approval, and then not only have reported in favor of such a scheme for the pupils obtaining 66 per cent. during examinations of the school year, but their report is receiving favorable consideration by the pupils of the schools concerned.

The Iowa State College has made the finding that it costs 2.37 cents more a mile to drive over rough roads than over good pavements. When a motorist travels 10,000 miles a year over rough roads it costs him just $237 more than if he were going over paved highways. Complaining taxpayers should meditate upon this finding of the Iowa State College.
