A Few Dollars A Month

saved, instead of being carelessly spent, does not look very formidable. But these few dollars deposited regularly in the Standard Bank of Canada, with Interest Compounded, will amount in a few years to a fair competence.

It may mean a little self-denial, especially at first, but it also means a great deal of solid satisfaction, and the habit is easily acquired.

A lady writing from Hopeville asks us for the whereabouts of a man named Marshall, who was in the Toronto General hospital last January. There was a little trouble on the train Monday evening between Dudalk and Flesherton, when two men named Todd and Agnew got into an altercation. The former failed to produce a ticket and the conductor had him arrested at Flesherton station on arrival of the train here. Todd put in the night in the station house with bracelets on his wrists. Tuesday morning Magistrate R. McGill let him go, as no charge was preferred against him.

A gentleman informs us that an Osprey farmer engaged four immigrants to assist him. The men found that their hours of work were from 4 a. m. to 11 p. m. and being unable to stand it threw up the job. What could these men wish for! Didn't they get enough to eat? And wasn't the pay sufficient to keep them in clothes? What is the world coming to, anyway, when men refuse to work nineteen hours out of the 24! Farmers as a rule do not expect more than twelve hours labor from their hired help, and nineteen is piling it on a little too thick and the four strikers have the moral support of many sympathisers.

Sam Morkigovitch is a Russian Jew and has been doing a rag time business here for the past few days. Recently a warrant was received here for Sam's apprehension and committal on a charge of contempt of court in neglecting to liquidate a little judgment of $35, held by an Owen Sound man. Bailiff John Wright surprised Sam on Tuesday while industriously plying his honored occupation of rag gathering and invited him to get ready for a trip to the county bastile. At first Mr. Morky, etc., denied his identity but later decided that trick was useless with our eagle-eyed bailiff. He therefore fished up ten dollars, all the money he had but quite sufficient for purchasing a stock of rags, and left his horse and wagon in charge of the bailiff, while he took the night train for Owen Sound to draw on his friends for the little balance of $25. And thus another judgment will doubtless be satisfied.

Mr. John Young of Thornbury died on Tuesday night of last week at the age of 82 years. The deceased gentleman was an uncle of Mrs. W. H. Thurston, Flesherton. He was born in Ireland on May 26th, 1827, and when a lad of 16 left his native land for some time, coming to Thornbury 43 years ago entering into the hardware business, carrying on that business until about ten years ago, living retired ever since. The business integrity of the deceased gentleman is spoken of in the highest terms by those who have known him for many years and he had the confidence of the citizens to a very large extent, having served as councillor in Thornbury for some time. The late Mr. Young was not a demonstrative man, but was true to his professions. In religion he was a Methodist, being a member of the church for many years of his life. In politics he was a staunch Liberal of the old school. His wife predeceased him about 20 years ago. He leaves one son, Hartley, in Seattle, Wash., and two daughters, Mrs. W. W. Bradley in British Columbia and Mrs. J. E. Hutton in Thornbury.

Rev. M. M. Goldberg, a former rector of Christ Church, Markdale, and who had been an invalid from paralysis for over two years, died at his home in Woodstock.

Amatite Roofing

As soon as a practical man sees Amatite, he recognize its superiority. The wearing quality of a good roof depends upon its weight. A thin flimsy fabric cannot wear as long as a thick heavy one. Amatite weighs twice as much as any other roofing at its price.

Another important thing it has a real mineral surface of Amatite. This preparation protects roof against the rain and wind. Most roofings have to be painted twice or three times in five years, with this it requires no painting. If you are contemplating on good roof investigate and you will see the Amatite's superiority. Call and get samples and circulars giving full information.

Steel Range Problem

We are very sorry to see our intelligent farmers being taken in by some dealers, who go through the country demonstrating the better qualities of their stoves and are selling them right and left at nearly double the price which we ask. Why buy a stove that when requiring repairs, you are sure of getting them, not of a stove that probably might be out of existence in a few years? These qualities they call better are only a talking point, you know what the malleable iron top does and why not be satisfied and not pay from $35 to $40 more for an article which is no better.

Garden Seeds

We are head quarters for (Simmers) first quality Garden and Root seeds, including Carrots, Sugar Beets, Turnips and Mangels, Corns, Crompton's Early, and N. Dakota White Flint, Millets and Dwarf Essex Rape. All at popular prises, also Red Clover and Alsike, Timothy seeds.

Now Contracting for Season's Sugars

We have just started a scheme which has met with the approval of all, who we have been talking to. We agree to supply you with sugar at a certain price 4 months, or the sugar season. If sugar raises, which it does around preserving time, you will get it at the contract price, and if it goes lower, you get the reduced price on the sugar purchases at the time of the drop, this insuring you against the sugar famine which is likely to take place this season. Now is your time to come in, only a certain amount we are going to put on the market in this way. All we ask you to do is to say you want it. We Don't ask any money until you get the sugar, and get it lower in this way. Call at once and investigate. If not clear come in and we will make it clear.

Rolled Over Embankment

John Schier had a thrilling and somewhat painful experience whilst driving a livery rig loaded with six commercial trunks from Owen Sound to Meaford on Friday afteanoon. The accident occurred as the team was ascending the hill at the second rock after leaving Owen Sound. It happened so suddenly and unexpectedly that Schier was unable for the time being to accurately understand just what did take place. Being alone, he naturally was at a loss to know what was best to do under the circumstances, and even now he has no distinct recollection of what caused the overturn. So far as he can judge, however, the team slipped whilst making the steepest part of the grade, with the result that the wagon overturned, and the next moment horses, driver, vehicle and trunks were lying in a promiscuous heap at the bottom of the declivity. Unfortunately the freshet had converted a small stream which flows at the base of the hill into quite a body of water, and into this one of the horses fell sideways. The poor animal died of suffocation before the driver could do anything for its release. The other horse was extricated from its perilous position by cutting the harness.

As soon as the driver could secure assistance he had things straightened up, then made his way as best he could to Woodford, where he remained under the care of a physician until Saturday afternoon. On reaching Meaford by the evening stage Dr. Drummond was called, when an examination showed that the young man was terribly shaken up, though fortunately he is not thought to be seriously injured internally. Sydenham council will pay for the damage.—Meaford Mirror.
