The Back-Seat Driver

We all know of the nuisance who guides the destiny of the automobile from the rear seat, the person who always thinks he could handle the machine much more capable than the driver. He is like the man who stands on the sidelines of the game of life criticizing the actions of those who are doing things, but who fails to get into the battle himself. Every office has one but the boss gets tired and chucks him out.

There are people like this in every community. You know well the man who complains about condit ns, who is always opposed to everything, who does not work because he says there is no work to do and the community is going to the dogs. He stands out in contrast to the person who gets into the fight, makes the best of every condition and when he is not satisfied with conditions makes an honest-to-goodness effort to improve them instead of standing around and whining.

No man can be happy if he is always running away from the problems of life. What can you do to enliven activities in Flesherton and make it a better community in which to live? Start anywhere but do something. Don't leave the work to someone else. Get that community spirit and fight. Every sincere effort at community betterment on your part makes you so much bigger. Boost your community that you may be able to boast it. Have no sympathy for the habitual knocker. Buy your goods in Flesherton. This will mean the success of your merchant and a bigger and better Flesherton.
