DOWNY LITTLE THINGS . . . not long out of their shells . . . how much they must depend on you for the things they need to live and get big. They need a feed filled with nourishment. A feed which will build bones quickly . . . building muscles strong . . . change fuzz to feathers in a hurry . . . all this they demand . . . and yet their little crops can handle only one tiny thimbleful of feed a day! What a job for feed!

Consider Purina Chick Startena (mash) for this job! In every thimbleful are twelve ingredients! Cod-liver oil . . . dried buttermilk . . . alfalfa flour . . . granulated meat . . . these and eight others are there . . . each one with a real job to do. Purina Startena is mixed over and over again . . . 960 times just to be thorough! And you will find the same care taken with Baby Chick Chow (scratch) . . . to be fed with Startena.

Your chicks . . . what they do for themselves . . . what they do for you . . . is entirely in your hands. They eat so little . . . yet it counts so much . . . that you can afford to do only one thing . . . feed Purina Chick Startena!

Jas. A. Stewart, Flesherton
