The act respecting the employment of girls in shops and factories is not one that appears to be well known, and well regarded. It is illegal to employ a child, girl or woman later than six o'clock at night, except on Saturdays or days before a holiday, when the closing hour is 10 o'clock. A failing tiny nerve—no larger than the finest silken thread—takes from the heart its impulse, its power, its regularity. The stomach also has its hidden, or inside nerve. It was Dr. Shoop who first told us it was wrong to drug a weak or failing Stomach, Heart or Kidneys. His prescription—Dr. Shoop's Restorative—is directed straight for the cause of these ailments—these weak and faltering inside nerves. This, no doubt clearly explains why the Restorative has of late grown so rapidly in popularity. Druggists say that those who test the Restorative even for a few days soon become fully convinced of its wonderful merit. Anyway, don't drug the organ. Treating the cause of sickness is the only sensible and successful way. Sold by all dealers.

Hanlan's Point Burned Out

Thousands of Dollars' Damage Done--Young Lady Burned to Death

Special to The Advance

Toronto, Aug. 10—Hanlan's Point, one of Toronto's most popular amusement places was almost totally destroyed by fire to-day. The fire broke out in the Electric Theatre at four p. m., and at six only three small amusement places were left of what a few hours before was a popular, modern resort. The fire was the worst Toronto has had since the great conflagration of 1904, and thousands of dollars damage was done. The ball grounds and grand stand, figure eight, and the hotel Hanlan were among the important structures destroyed. The latter, a fine, large and popular summer hotel was saved in the disastrous fire which swept the same ground in 1903, almost six years ago. There was, as far is known, only one life lost, that of the young lady cashier of the "figure eight," whose bones were found with a few metal parts of her clothing in the ashes. The fierceness of the blaze was due to the large amount of wood used in the construction of the various edifices.

Walkerton

A very serious accident happened to a telephone lineman here on Saturday afternoon. The gang was working north of the river, not far from the foundry, when the accident occurred. One man, Bert Page by name was up near the top of a pole, when without warning it broke off near the bottom. Being strapped to the pole he could not jump, and when the pole struck the earth his face struck the pole, breaking his nose, and fracturing his skull. The wrist of the right hand was also broken. Dr. H. H. Sinclair was at once summoned, and he ordered his patient to be taken to the hospital. The doctor reports that his patient is showing slight signs of improvement, but that the chances of his recovery are not the best. Page is an Englishman, and appears to have no relations in this country.

A colony of wasps had taken up their quarters in the binder twine factory, and when the machinery was started up, it put the wasps into an exceedingly bad temper, and ever since it has been pretty much of a fight, all day long between the wasps and the employees of the mill. It is said that the proper way to fight wasps is to fight them, and then run away. This is not the plan which the people around the twine factory have adopted.

When Mr. S. Irwin of Kinloss commenced to mow last Monday morning his horses in some way became frightened and attempted to get away. The man was drawn down upon the machine when the shaft broke striking him on the thigh inflicting terrible injuries and breaking it in two places. T. Colwell and S. Walsh were just passing at the time and quickly hurried to his assistance. They succeeded in getting the injured man into their buggy and unhitching the horses, left the team with a little son of Mr. Irwin's for him to bring home. They had not gone very far when the lad following with the uneasy horses was unable to manage them and they got away from him overtaking the three men in the buggy ahead. They were all thrown out adding further injuries to Mr. Irwin. Drs. Sinclair and Ferguson were called but the man was beyond their aid and died shortly after their arrival. Mr. Cearley Stephan of Walkerton attended the funeral.

Anthony Schutofski and Conn Zuber came to town last Friday to hear the Gordon trial. They heard it, and later on started for home. They got along all right, until they had reached a point opposite Ben Waechter's farm. Then the horse bolted, jumped the ditch, and flung both of them against Waechter's stone fence. Alex McLennan saw the accident, and after removing them to his house hurried in for the doctor. When the doctor arrived he found them in a pretty bad shape. Both had black eyes and cuts on the head, and Zuber had in addition a broken thumb.—Telescope.

"How to Tickle an Editor," is the title of a new game and can be played with great interest. Take an ordinary scrap of writing paper, pen a few lines suitable for the occasion, then fold it carefully, enclosing in the fold a bank note sufficient to cover all arrears for your subscription and a year in advance, and hand it cheerfully to the editorial chairman. Keep the corner of your eye upon him and if the smile that won't fall off adorns his usual solemn face, the game has been played successfully. It can be played by mail.

The Ontario Government is planning a complete revision of the Provincial fish and game laws and the measure will probably be submitted to the Legislature at its January sitting.
