Gyproc *Says*

"KEEP OUT"

to

Fire, Draughts, Rodents

GYPROC Wallboard that *does not burn* is the way of least expense when you desire to make alterations in your home, store, factory or on the farm. Use it for all walls, ceilings and partitions.

Gyproc is made from gypsum rock into sheets 4 to 10 feet long, 4 feet wide and 3/8 of an inch thick. It nails and cuts as easily as lumber with a minimum of waste or muss.

Gyproc is fire-resistant, easily and quickly erected, structurally strong and has insulation value. It is draught and vermin-proof as well as fire-safe.

Because it is ivory-coloured, it does not require decoration (when panelled) yet it is also a suitable base for Alabastine, Gyptex or wallpaper.

Consult your nearest dealer to-day. He will gladly supply you with a direction sheet on Gyproc. Or write for the interesting, free booklet, "Building and Remodelling with GYPROC". 373
