On Wednesday evening about 7:30 the people of the valley were horrified to see the barn of Mr. F. Weber in flames. The barn was on the "Hill farm" and none of the family had been to the barn for two days. It looks very much like the work of some evil disposed person and much sympathy is felt for Mr. Weber. The barn was full of feed and his binder and some other implements were in it, with no insurance on the contents.

MAKE THIS 3-MINUTE TEST

IN OUR STORE OR YOUR HOME

Arrange to make this personal test of the 1932 Rogers Superheterodyne Radio *today* —there will be no obligation.

With volume about one-half "on," move station-finder slowly across the entire dial. Then—

1. Count the stations.
2. Notice how "sharply" each one comes in; no interference of one station with another; no "cross talk."
3. Listen to the *quality* of the tone, a weakness in some superheterodyne receivers.

If reception conditions are at all normal, you will be amazed at Rogers sharper selectivity; finer tone fidelity.
