DEPRESSION STORY

Queerest of all the tales of the depression is this one, from Michigan: In 1929, before the crash, a man had a $280,000 loan at a bank, to cover which he deposited stock, worth, at the market then existing, $400,000. When the stock market went into a tailspin the bank sold him out, getting $320,000 for the stock, and leaving the man with his debt paid and a $50,000 credit in the bank. Then, a little later, the bank collapsed. In a short time it was reorganized, and in the shrinkage that was nivelved the man's credit dwindled to $36,000. Thereupon he drew out $30,000— and bought back all of the securities he had held originally. So now he holds the same stock that he held in 1929, he has wiped out a $280,000 loan and he has $6000 in cash. Has he gained or lost in the depression?

Expect Large Crowd At Civic Holiday Picnic

The Old Home Committee expects a large contingent of old friends from Toronto and other points will spend the Civic Holiday week end in the old town and vicinity. For their benefit on Sunday, July 31st, they have arranged for the regular church services to be held in the morning, as usual, followed by a Vesper Service at 4 p.m. in St. John's United church, and an open air song service in Memorial Park at 8 p.m. The Salvation Army band of Owen Sound will provide the music. Everybody in the entire district are urged to attend these services and also the picnic on Monday.

Sports will be held in the pond on Civic Holiday morning, followed by the box lacrosse game in the skating rink at 1 p.m., between the Durham team and the Runnymedes of Toronto. This will introduce the new box lacrosse game to Flesherton. This will be followed by the picnic in the Memorial Park which will include novelty races, novelty contests, tug-of-wa., races and softball, with everybody picnicing in the evening. The Canadian Field Artillery band of Toronto will provide splendid music all day and evening.

Topping off the big day will be the monster dance in the market square at night when there wil be square and round dancing provided, with the Dory Orchestra and the Calendonian Orchestra from Toronto, led by Mr Wilson, leader of the C.F.A. band.

It is a big day and if the weather is fine should see a monster crowd on hand joining in the festivities. You are all invited to come and have a good time at this picnic.

Motorists who pull up at a friend's house just in time for a meal are known as the eat-and-run variety.

Man in Toronto bought beer on his own permit, placed it on his neighbors ice and now faces a charge of breaking the law. It is necessary to have the beer, the ice, the thirst and the permit all under one roof.

Members of a church in Hamilton split on the choice of a minister. Added to that is a threat to foreclose mortgage on the church because interest on $35,000 is not paid. Perhaps after all the early Christians had the right idea when they met out in the open and at times in caves.

Artemesia Council

Artemesia Council met at Flesherton on July 4, 1932. The members were all present, the Reeve presiding. Minutes read and adopted.

MEN GET $5 A MONTH

That there are ten camps along the trans-Canada highway where there are men working for $5 per month with board, does not speak well for our economic conditions. When men were paid $2.40 per day, during the winter season, they were paid too much, but now they are getting too little. However, as a relief measure is has been more successful than was anticipated. Undoubtedly this is the season when men can do a full day's work on a highway, and one man, working in the summer time, can easily do as much as two men in the winter season. The lumber companies had no difficulty this spring in obtaining men for river driving at $1 per day and board, and if a wage like this were paid we could again have all the camps needed and this work could be rushed. It will be a great misfortune if this highway is allowed to remain in a half-finished condition.—Pembroke Observer.

The town of Vermilion, Alberta, sent its congratulations to Toronto on being 100 years old, although that city does not attain its century mark for two years yet. The Vermilion message is like the chap who arrives early for the party and sits around looking at snap shots and family albums.

From Paris comes word that a bill has been passed which will take five per cent. from the pay of the president and all the members of parliament. The measure is expected to save the treasury $18,400,000 per year. France was one of the last nations to feel the effect of the depression, but recently revenue has been showing a sharp falling off.

Kenneth Fickle of Columbus, O., who said he was a woman hater, met a girl, dated her, proposed, was accepted, got a house and furniture, and was married, all in less than a week. He may have been a little balky at the start, but Ken. knew how to step along when he got out on the track.

The Ontario Safety League is out with another list of hints meant to ensure safer driving on the highways. The league keeps hammering away at this work, and surely is getting some results. But it requires a great deal of energy and patience to protect people from their own folly.

TYPHOID CARRIERS

It is unfortunate that in certain of the communicable diseases, the carrier state develops. The carrier is a person who, although well, harbors the germs of disease and is capable of spreading by passing the germs to others. The carrier is particularly dangerous. The person who is ill with a communicable disease is recognized as a source of infection and is therefore isolated. The discharges from the body of the patient are destroyed so that they may not spread the disease germs which they contain The carrier, very often unaware or not suspecting his condition, goes about his ordinary life taking no special precautions.

Whether or not the typhoid carrier spreads the disease depends upon the habits of the carrier and his occupation. The typhoid germs leave the body of the carrier in the urine or faeces or both. If the carrier would thoroughly scrub his hands after every visit to the toilet he would in general be safe. Failure to do so, or just a casual rinsing of the hands leaves the hands of the carrier contaminated with typhoid germs. It is the careless or uncleanly typhoid carrier who prepares food or particularly the one who is engaged in the milk business who is very likely to spread the disease. The contaminated hands pass the germs on to food or into the milk. Unless the food is cooked later, or the milk pasteurized, the consumer takes into his body the germs which cause typhoid fever.

It is because this danger is a very grave one and because outbreaks of the disease keep occurring which are traced to carriers, that Health Departments, as part of their service for the protection of the public against disease, keep known carriers under supervision.

The carrier state may be intermittent, that is, the germs are only passed out at intervals. The condition may persist for years during which time the carrier continues to be a possible source of the disease. There is no certain way to rid the carrier of the germs which he harbors.

Typhoid fever has been brought under reasonable control where water, milk and food supplies are safeguarded. It seems possible that this disease may be eradicated if, in addition to these measures, carriers are controlled. It is obvious that the Health Department is justified in supervising carriers and borbidding them to engage in any occupation which has to do with the preparation of foods. This type of activity of Health Departments needs to be better understood by the public as essential to the protection of the public so that the public will co-operate with Health Departments in their services.
