High scorching winds and searing temperature has been in vogue in the West the past few weeks and therefore prospects for a bumper wheat crop are not as bright. With this news the stock market took leaps and bounds and reached one dollar per bushel. Incidentally it cut short the talk at the Economic Conference in London as to the curtailment of wheat acreage in wheat producing countries. Nature accomplished its own end without the aid of man.

* * *

With more people enjoying swimming a larger number of drowning accidents are taking place. Swimmers and bathers cannot be too careful while in the water.

* * *

Garden parties and picnics are now in order and they serve a useful purpose in the contentment of man.

* * *

The stock market has been invaded again by those who were "cured" during the collapse of the market in 1929. The craze for easy money brings many fish to the brook when the bait is offered.

* * *

It appears as though that mythical "corner" has been rounded at last after a lengthy search by the world and progress is being made in the re-employment of the workless. Advancing prices of commodities has resulted in large numbers being taken for work in the factories and other lines of business and the future is very encouraging. With present prices for the wheat crop in the West the farmer, except those whose crops have been burned out with the heat will be able to meet indebtedness incurred during the past few years and be able to lay in some needed equipment, clothing and other items that will result in more employment being given to workers in Eastern Canada. The circle grows, therefore, continually and the more money that is spent the more employment lessens, until everybody is happy and prosperity reigns again.

Recently a local citizen paid a fine for fishing trout after sundown. It appears strange that citizens are picked off for this crime when scores of outsiders come in and do the very same thing and are not caught.

HINTS TO HORTICULTURISTS

The proper time to transplant Oriental Poppies is when they are perfectly dormant, that is, transplant in late July or early August.

Cultivate freely and give Sweet Peas plenty of water or mulch. Keep the flowers picked.

Climbing roses should be pruned immediately after flowering, by removing the oldest wood and simply thinning out each bush.

Cut down Delphiniums as soon as they are through blooming. This forces the plant to send up new growth and flower a second time.

The bearded or German Irises may be divided and transplanted after flowering. As soon as the flowers fade, cut off all stems and give plenty of water for a couple of weeks, then divide and plant shallow.

Four municipalities in Simcoe County—Tiny, Tay, Penetanguishene and Midland — have not paid their county levy for 1933 and an amount exceeding $63,000 is still outstanding.

SCHOOL GRANTS

(By Herb Corbett)

"Only a few years ago, it will be remembered, it was a difficult task for school boards to fill vacancies caused through resignation of teachers, for the reason, that, as a result of very low salaries, the demand was greater than the supply. Through an increase in Legislative grants the salaries soared. As a result of the rise in salaries, the supply of school teachers has by far exceeded the demand. We might now find that, in order to insure themselves of a job, some are bidding for a very low salary—in some cases below the amount of the township grant. We also find some school boards willing to accept teachers at a remuneration that is not encouraging to the teacher, nor at the same time is it saving anything in dollars and cents to the ratepayers of the section. Therefore, would it not be wise for the school boards to try to stabilize the teachers' salaries? In doing so there would be a tendancy to avoid a repetition of past experiences, that is, the demand greater than the supply and vice versa.

Could we not use the following as a scale to arrive at the minimum amount that a board could pay its teacher, without imposing on the ratepayers of the section any additional school tax? We have four sources from which to draw, to arrive at this amount:—

Firstly—The attendance grant, $1 per pupil.

Secondly—The grant on certificate which ranges from $30 to $75 according to the grade.

Thirdly—The township grant, which is set forth in Section 109, Public Schools' Act.

Fourthly—The Legislative grant on teacher's salary, which is based on the equalized assessment of the section.

We might here give one illustration:

(1)	Township Grant	$450
(2)	Grant based on average attendance of 25	25
(3)	Teacher's Certificate, Permanent Second	60
(4)	Legislative Grant on salary (12½ per cent. of teacher's salary)	75
Total	.....	$610

(This 12½ per cent. is taken on a section with $100,000 assessment, and which is paying its teacher $600. We use it as an illustration only.)

It will be remembered that according to recent legislation there is 20 per cent reduction in the three last items, which would mean a reduction in the legislative grants of $32.

The percentage of legislative grant ranges from 5 to 70 per cent. depending on the salary and assessment. This would mean that many school boards would qualify for more than $75, the figure used in the last item of our illustration.

Now if six or seven hundred dollars should be the amount paid our teacher in a public or separate school, what then should our teacher in secondary schools receive?

The salary of a teacher in a continuation school might be expected to be slightly above that of one in a public school.

Teachers holding a degree which qualifies them for high school and collegiate have received an additional four years training, which adds to the cost of their qualifications.

To be fair to the teacher and to the ratepayer of the high schools and collegiates what then should be paid in the way of salary. Assuming that the extra qualifications have cost the holder an additional $3,500 plus four years training, or approximately a $5,000 investment, take six per cent interest on investment. From this we should be able to arrive at, or near, the salaries in our secondary schools.

The officials of our municipal and county councils have been putting forth every effort to reduce taxation, but the question might be asked, "Are the school boards and boards of education reducing to the same extent that expenditure that is within their control?"
