TRUTH BEFORE FAVOR—PRINCIPLES, NOT MEN

MENDELISM AND WHEAT

The Mendelian law of species, of which little is known by the general public, is likely to come more to the front during the next few months, owing to the fact that scientists have succeeded through this law in producing two new and important varieties of wheat, that are likely to work a revolution in the wheat producing capabilities of our soil. The law which has been so successful in producing such marvelous results will come in for more extensive investigation than it has in the past. Those who desire to know what Mendelism is can consult a book with this title by R. C. Plunkett, published in the United States last year.

What our readers will be more concerned about, however, than the law discovered by the Austro-Silesian monk, is the result as worked out by experimenters in the growing of two new varieties of wheat, claimed to be rust proof, heavy straw, large yielder, a producer of flour of superior strength, and all round a vast improvement on any known variety. These wheats are being grown on the experimental farms in England this summer, and the full result will be known in a few weeks. The variety which appears to be most popular in England is known as "Little Joss."

In conjunction with the above, chemists have been experimenting with soil possibilities and have discovered that "by the use of manures which do not permit the soil to become acid, it is possible to abandon the rotation of crops and to grow wheat continuously in the same soil."

For these facts we are indebted to a recent article by Prof. C. W. Saleeby of Edinborough university, who is an authority on Mendelism, and whose announcement on the phases referred to will attract wide attention, and probably herald the dawn of a new and intensely important era in the production of the "staff of life."

ATTEMESIA R. H. S.

The Artemesia Rural High School record for 1911 is worth pasting up. In the Entrance to Normal exam. three pupils wrote and two were successful—Clara Binnie and Gertie Bellamy. At the District exam. three wrote, and all three were successful. Of the six pupils of this school who wrote for their Matriculation five were successful. Thus, out of a total of twelve writing, ten were successful, which is a showing of which any school might be proud, and proves that the pains-taking work of the teachers is placing this school on a high plane of efficiency at the very beginning.

It is believed that the coming year will prove even more satisfactory, and pupils will make no mistake in enrolling under the tutelage of Mr. Marcellus and Miss L. M. Philp, B. A., who will constitute a strong team.

THE POTATO BUG MUST GO

It is good news to learn that an enemy of the potato beetle has arrived in Ontario. From various points this insect, which is sure and sudden death to the bug, has been reported, and so important is his advent considered that the agricultural papers are devoting considerable space to a heralding of his advent. The insect was reported from near Shelburne last week. One gentleman in southern Ontario had five acres of potatoes that were kept entirely free of the potato beetle by the new comer. May his appetite never grow less and his numbers increase until the beetles are utterly routed.

There are not so many drowning accidents recorded this year. Their place is taken by auto and flying machine fatalities, which, after all, amount to the same thing.

The city of Boston pays a bounty of ten cents a quart on dead flies. There is a danger that the Bostonese will go into fly raising in place of beans.

Deer Killing Prohibited in Grey

County Clerk John Rutherford has received notice from the Game and Fisheries Department of the Ontario Legislature that deer killing in the county of Grey will be prohibited for three years, the restriction to come into effect on November 1st of this year. At the midsummer session of the county council last year a petition extensively signed by residents of Osprey township was presented to the council asking that the government be memorialized to have the slaying of deer prohibited for three years. A memorial was accordingly forwarded to the department of game and fisheries. Accompanying the notice from the department received by the county clerk, was a copy of the order-in council dealing with the matter, reading thus:—"Upon the recommendation of the honorable, the Minister of Public Works, the committee of the executive council advise that pursuant to the provisions of section 9 (2) of the Ontario Game and Fisheries Act, and in accordance with the resolution passed by the council of Grey, passed on the24th of June, 1910, the taking or killing of deer in the county of Grey be prohibited for a period of three years from the 1st day of November, 1911." The official announcement will appear in the Ontario Gazette.—O. S. Times.

Cutsand bruises may be healed in about one-third the time required by the usual treatment by applying Chamberlain's Liniment. It is an antiseptic and causes such injuries to heal without maturation. This liniment also relieves soreness of the muscles and rheumatic pains. For sale by W. E. Richardson & Son.

Rev. Father Morriscy

Father Morriscy's "No. 11" Cures Stomach Troubles.

When your stomach is working right you never know it is there. But when it feels as heavy as lead—when you have Heartburn, Belching of Wind, Sourness, a gnawing hunger, with distress after eating—when you feel irritable and depressed — then you may know that the digestive fluids in the stomach are not sufficient to digest what you eat.

Father Morriscy's "No. 11" Tablets supply these fluids in concentrated form. Each tablet, dissolved in the stomach, will digest 1¾ pounds of food, which is more than an average meal.

Read what Father Morriscy's treatment did for Mr. Gosline, of Salmon Lake. He writes Nov. 30, 1908:

"I was troubled with indigestion, so severe that I really thought I had cancer of the stomach. I took much doctors' remedies, till I was forced to seek another resource, and this was the Rev. Father Morriscy. His treatments worked miracles, until I have been entirely cured, so that now I do not look to the quality of the diet but to the quantity."
