Who Are The Happiest?

Who are the happiest people on earth? This question was asked by an English newspaper, and prizes were offered for the best answer. There were four prize-winning answers:—

"A craftsman or artist whistling over a job well done."

"A little child building sand castles."

"A mother after a busy day, bathing her baby."

"A doctor who has finished a difficult and dangerous operation and saved a human life."

No millionaire among these one notices. No kings or emperors. Riches and ranks, no matter how the world strives for them do not make happy lives. A sand castle does that far better than a palace. It would be a sad day on earth if only the great could be happy. But happiness is for everybody, not for a few.—Sunshine magazine.
