Ask your druggist for a 75c Kruschen Giant Package. It contains a regular bottle and a trial size bottle. Use the trial size first and if not satisfied return the regular bottle unopened. Your money will be cheerfully refunded.

Youth And Music

The way to have a musical people is to have people make music. A good deal is talked about the educative effect of listening to radio and phonographic records, and there is something in it (albeit most for those who know music already), but to make an actor you do not sit and watch plays.

In Springfield the hotels are full of especially appetizing guests. Who should they be but 600 boys and girls musicians in the orchestras and bands from High schools in New England towns and cities? And all rehearsing like a house afire for the festival on Saturday afternoon. The public schools are the life-savers of American music from the drowning of too much passive listening at radio and the asphyxiation of vulgarian jazz. Here children are taught to know the noble music from rubbish that is often filthy and vile, and being taught to love the good. As for their rehearsals and concerts here in this bosom is nothing but the most whole-hearted envy of their good time, for if anything has ever been found that is more fun for a musical child than a Spring Festival of amateur players no one knows what it is.

A family party at the villa of Dr. Jean Sibelius in Finland, was debating this question—whether passive listening to radio and phonograph will sterilize music-making. One of the composer's daughters, a pianist, said, "I like both preserved fruit and fresh fruit. Each has its distinctive flavor." But her father spoke as composer and with austerity.

"The dilettanti will continue to listen to machines and the great talents will continue to create."

During the last 10 years, the population of Southwark, London, Eng., has decreased by 22,764.

ASK YOUR DOCTOR FIRST, MOTHER

Before You Give Your Child an Unknown Remedy to Take

Every day, unthinkingly, mothers take the advice of unqualified persons — instead of their doctors' — on remedies for their children.

If they knew what the scientists know, they would *never* take this chance.

Doctors Say PHILLIPS' For Your Child

When it comes to the frequently-used "milk of magnesia," doctors, for over 50 years, have said "PHILLIPS' Milk of Magnesia — the safe remedy for your child."

Remember this — And *Always* Say "*Phillips*'" When You *Buy*. Your child deserves it; for your own peace of mind, see that you get it — Genuine *Phillips*' Milk of Magnesia.

Also in Tablet Form:

Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

MRS. SMALL

Has Cure Of Cancer Been Discovered?

Instances Cited as Proof of Serum's Results. — Hopeless Cases are Aided.

Dr. J. E. Hett, of 607 Sherbourne St., Toronto, and 223 King Street E., Kitchener, Ontario, who has been interested in cancer since his graduation in medicine from the University of Toronto, in 1891, has devoted nearly all of his spare time to research work and intensive study of this great problem.

He toured Europe on different occasions and visited the laboratories and cancer clinics in London, Paris, Berlin, Heidelberg, Vienna, Prague, Padua, Bolonga and Rome.

For years in his own laboratory in Kitchener he worked away quietly, taking no time off for sports or other diversions but devoting every spare moment, after the hard day's work at his profession of medicine and surgery. On many occasions he worked throughout the night. Eventually he became convinced that germs were the actual cause of cancer and that irritation alone was not sufficient. He pursued this theory steadily and four and one-half years ago reached the conclusion that he had developed a serum, which, if given intravenously would obtain the long looked for results.

At first his patients were very few but gradually they have increased in numbers so that now he is very busy treating patients every week in Toronto, Kitchener, London and Windsor. For some months past, records have been compiled of a large number of cases. These records are scientifically prepared with the clinical histories and biopsies (pathological reports of sections removed for diagnosis). As time goes on more and more records are added and progress noted.

In the Toronto Evening Telegram of November 16th last, the following appeared:

Doctors Surprised

"A number of very prominent medical men have examined these records and are very greatly surprised at the results. The profession as a whole, however, knows but little of this work which has been going on so quietly. Dr. Hett up to the present time has not given his formulae to the profession and for that reason there has been but little publicity.

Dr. Hett declares that it is his intention to give his secret to the profession when the time comes.

"I am entirely convinced myself, but I do not wish to be considered premature and declaring it. I have a number of cases that have been cured one, two, three and four years who had been given but a few months or weeks to live," he told the Telegram. "And the remarkable part of it is that these patients have kept well and added more weight than a year ago, and are carrying on their usual occupations, some of them the heavy burdens that fall on farmers' wives.

"There was no selection of these cases and a large percentage of them were looked on as hopeless, and the only thing that could be done for them was the administration of morphine to relieve their pain. I am no longer experimenting; that stage of the treatment was passed four years ago. I am now obtaining results such as have never been obtained before anywhere," he says.

Remarkable Results

During the past four years Dr. Hett has carefully watched each patient, and has acquired considerable new knowledge. The subject of cancer is still a very great problem, and there are different forms of malignancy. Some cases are slow in growth—and others very rapid. His serum gives a definite reaction when first administered, and during all the times he has used it not a single accident has happened to a patient, and he has treated some with very high blood pressure; in others, a very low blood pressure with heart disease and other complications. He has discovered that where cancers are slow growing, he cannot obtain a high degree of reaction, whilst with those of rapid growth the reaction is very strong.

Some of these patients are living in Toronto and others outside. The Telegram last year, and early this year had the opportunity of seeing several of them, and recently checked up on their progress following the apparent cure. Records recently made show remarkable gains in weight and added strength by some; and the others continue in good health.

Curability of Cancer

In 1927 the Department of Health of Detroit established a cancer division as a registry of the cancer cases treated in all the Detroit hospitals. The attempt has been made to follow the cases treated there surgically or otherwise in 1927, '28, '29, for five years. No case was included unless the pathological diagnosis was recorded, but the attempt was made to include all cases treated in 13 hospitals. The result is an exhibition of the work in attempting to cure cancer in the hospitals of a large city.

The figures show the terrible mortality of the disease, despite all that has been accomplished to date by surgery or radium or other treatment.

Organ	Total cases	Living at end of five yrs.
Stomach	356	1
Intestine	90	5
Rectum	86	6
Uterus	178	34
Breast	385	93

Dr. Hett's Success

A comparison of these records with the records that Dr. Hett has at this time would certainly give the medical profession an idea of the remarkable results obtained in the treatment of the disease similarly located by Dr. Hett with his serum.

The records were examined by the Telegram, and they are available to members of the medical profession who desire to examine them.

The doctor says he realizes the many difficulties which can arise before the medical world can be convinced. A number of local medical men who have attended his clinic and examined his records have declared themselves convinced that his proof is ample, but he declares some time must elapse before he lays his cards all on the table. Four years ago, when he had only a few patients to show, he was urged to announce what he had, but he declined on the grounds that it would be unwise to create any false hope if such should be the case.

"Time is always needed and essential to prove permanency of results," he says, "but I can now say that my studies and observations of many patients prove to me beyond the shadow of doubt that permanency will be proven."

Dr. Hett is not opposed to surgery, X-rays and radium. He claims these all have their places, but a very large number of patients are not amenable to these treatments or have failed to respond to them. Whilst he has been successful in advanced cases of cancer, he has also been successful in cases of sarcoma. He believes also that his serum will prevent cancer, but he has not given it in a single case for the reason that it would be impossible to absolutely prove it. He states that the time will certainly come when people will be immunized against cancer, but that will not come until the profession will recognize that the cure of cancer has been discovered.

Dr. Hett was the first physician in the world to treat an internal fibroid growth by X-rays. He obtained a complete cure and published his results in the Journal of Advanced Therapeutics in September, 1904. He discontinued using X-rays since then, as he did not get any results with X-rays in cancer.

Dr. Hett takes no holidays and he works seven days a week. He is at present travelling some 800 miles every week, covering the province westerly as far as Windsor, in an endeavor to meet the demands of patients who are unable to come to Toronto. He declares the strain is a heavy one for a man of his age."

Dr. Hett states that he has had quite a number of patients, some of them bedridden, who had been considered hopeless cases and who are now carrying on normal life again. In fact states the Doctor, "the most of the cases I have treated were far advanced."

The case of Mrs. Small, 930 Manning Ave., Toronto, is the most remarkable. Dr. Hett said that he has not read of such a remarkable case anywhere in medical literature, and that medical men who have seen and examined her hold the same opinion.

"Mrs. Small was told in June 1934, that her case was hopeless and nothing was left but morphine to ease her. Her family was told three months previously that there was no hope for her whatever. She had a part of the bowel removed in the Women's College Hospital in November 1932 and the finding pronounced by microscopical examination was adeno carcinoma. X-rays and radium were later given. A number of outstanding medical men and surgeons had given her up in the beginning of 1934 and it was not until July 27, 1934, that Dr. Hett saw her. At that time she was very low. She was in terrible distress and weighed less than 100 pounds. She had a recurrence and a large mass of cancer in the pelvis, also cancer in the bladder and was taking as much as 19 one-half grain tablets of morphine daily. On January 15, 1935, she took the last dose of morphine and has not taken any since. After treatment with the serum she has gradually improved and leads a normal life again and has been doing all her household work for a considerable time. Her weight is now 146 pounds, the same as it has been the past year and she is the picture of health as her photograph taken January 24, 1936, shows."

Dr. Hett believes this is the most spectacular case recorded. Not only because of the recovery after being so near to death but also because of the breaking off of the habit of taking so much of morphine each day. Dr. Hett believes that no record can be found in any medical journal or other publication of a case that apparently was as hopeless as this and a recovery made.

Dr. Hett is well up in years and recognizes the fact that the time is short for the carrying on of his work. He states that he does not want more patients than he can properly treat and that it is his hope that the time will soon come that it is generally recognized that he has discovered the treatment for cancer for which the whole world has been looking.

Catarrhal Deafness May Be Overcome

If you have catarrhal deafness or head noises go to your druggist and get 1 oz. of Parmint (double strength) and add to it ¼ pint of hot water and a little sugar. Take 1 tablespoonful four times a day.

This will often bring quick relief from the distressing head noises. Clogged nostrils should open, breathing become easy and the mucous stop dropping into the throat. It is easy to prepare, costs little and is pleasant to take. Anyone who has catarrhal deafness or head noises should give this prescription a trial.

WAKE UP YOUR LIVER BILE—
And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

SCOUTING
Here There Everywhere

A brother to every other Scout, without regard to race or creed

That they should stick to scouting until they were eighty years of age was the suggestion to Canadian Boy Scouts contained in a cablegram from Lord Baden-Powell on his recent 79th birthday. The message, sent from Pietermaritzburg, South Africa, read: "Am entering my 80th year, and I urge all my Canadian brother Scouts to stick to Scouting till they reach the same age."

* * *

An appropriate permanent woodcraft reminder of Lord Baden-Powell's visit to Canada last summer is a growing in Gilwell Park, England's famous training camp for Scout leaders. The trees were sent over late last summer.

* * *

The Canadian maple figures is another bond established between Canadian Scouts and those of New Zealand. These are maple seeds sent "down under" for planting in the "International Circle" of New Zealand's training camp for Scouters. The New Zealanders hope ultimately to have trees from every part of the British Empire and from all the other Scouting countries of the world.

* * *

Boy Scouts are inclined to be a little boastful these days over the fact that to them was addressed the first message ever delivered "over the air" by King Edward. As the Prince of Wales he spoke to them by radio in 1922. This also was the first occasion on which a member of the Royal Family faced the microphone.

* * *

Indicating in a tragic way that Scouting is not regarded as a military movement in Japan, came news that Viscount Makoto Saito, the Chief of the Japanese Boy Scouts, was included among the victims of the recent series of assassinations by Japanese army officers. Viscount Saito was appointed Chief Scout for Japan in June last, and had been closely associated with the movement for some years previous. He was greatly beloved by the Japanese Boy Scouts, and was frequently seen amongst them in Scout uniform.

* * *

Master Dewi Jones, the famous Welsh boy soprano who has been touring Canada for the second time, was made an associate member of the 1st Saskatoon Scout Troop. The young singer wore the green and orange troop neckerchief while singing at his Saskatoon concert.

* * *

"When I was Mayor of this city," said ex-mayor W. J. Stewart, C.B.E., at the father and son banquet of the 10th Toronto Troop, "I had occasion from time to time to give voice to the debt of gratitude that the citizens of Toronto owe to the Boy Scouts Association. Tonight, not as mayor, or even as ex-mayor, but as the father of a Scout, do I repeat my tribute, and in this all fathers of Scouts will join. If some of the fathers who do not support their sons in this movement knew one-half of the things that are going on among young people they would quickly change their attitude."

My Winter Garden

The winter world is wrapped in white,
The frost is on the pane,
But on the sill, the flowers in bloom
Defy King Winter's reign.

Geraniums in pink and red
Brighten the quiet room,
And bring a glimpse of summer time
To scatter winter's gloom.

So we may too when sorrow comes
Like winter's dark despair,
Find summertime within the heart
And roses blooming there.

—Helen E. Anderson.

HOW'S YOUR STOMACH?

YOU lose vital nerve force if you allow your stomach to distress you. Acid stomach, indigestion, gas or biliousness and "costiveness" cause the blood to be poisoned and will eventually destroy health and nerve force. This is what Clarence House of 53 Main St., St. Catharines, Ont., said: "I had no pep, had to force myself to eat, and after eating, I would belch gas and suffer from indigestion and heartburn. I had sour stomach quite a bit too. I used Dr. Pierce's Golden Medical Discovery and it toned up my system so that I felt like a different man. The 'Discovery' helped to drive away the stomach distress and gave me an appetite." New size, tablets 50c., liquid $1.00 and $1.35.
