The annual huckleberry picking excitment is becoming very infectious as every, Tom Dick and Harry, Mary Ann and Sue are desirous of gathering in their share of the sweet and mellow goods, which we are informed is of an exceptionaly large, juicy variety this season in the marsh, north-east of Riverdale. An excruciatingly joyous time is anticipated during the next four weeks. Strangers as welcome as the flowers in May. Refreshments served in the wild cat park, adjacent to the marsh, if you you bring them with you. Come along and have a roaring time.

We are somewhat depressed and a trifle harassed to notice in a recent issue of The Advance that the able and optimistic editor of this bright, breezy and effulgent journal was in favor of the Priceville and Riverdale cor's. "smoking the hatchett and burying the pipe of peace." While this distorted maxim was surely an appropriate suggestion, we feel it our duty to state that it was as unnecessary as it was uncalled for as a foot note to the Riverdale happenings. If the urbane Mr. Advance editor will beat it back to the battle field, he will recall to memory that we were not the originator of the lovely onslaught, in which our dear Priceville reporter has frequently given a glorious demonstration of his nasty yellow streak.

Durham

The horse fair on Thursday last was a great success for the month of July. Thirty-three horses were purchased, and Mayor Black is tickled over the result. Another fair may be held in August, but nothing definite is yet known.

It seems high time that the rebuilding of the Lambton street bridge was under way. The old bridge collapsed with the Easter Sunday flood, and up to the present time no change, beyond the temporary passenger bridge, has been made.

Mayor Black shipped a pair of working horses, and a choice carriage horse to St. Catharines on Monday. The deal was transacted over the phone, and the purchaser paid for the horses without seeing them. This style of doing business is quite common with Mr. Black, as his judgement in the horse is well known to outsiders.—Chronicle

French Dry Cleaning

We have put in a French Dry Cleaning Plant and are prepared to do this work on short notice and at reasonable prices.

A method introduced by the French for the purpose of cleaning the finest as well as the heavier garments worn, such as wool, felt, linen, cotton, leather, gloves, fur, feathers, straw, lace and waterproof goods without washing or shrinking them so as not to get them out of shape or fade the most delicate fabric trimming.

The fact is well known that a garment of silk or wool, if steam cleaned or washed, can never be pressed into shape, and it takes all the oil out of the wool; so that goods will never wear or look as well again besides shrinking the goods.

Therefore, figuring the small extra expense of Dry Cleaning, no one can afford to take chances of having their work done otherwise.

Many household articles, such as curtains, table covers, drapes, etc., that would be utterly ruined if washed, can be dry Cleaned, thus restoring them to their former beauty and usefulness and will not cause them to fade or the colors to run.

The Dry Cleaning Process prevents the carrying of contagious diseases on garments thus treated; it is also a disinfectant and moth preventive.
