French Dry Cleaning

We have put in a French Dry Cleaning Plant and are prepared to do this work on short notice and at reasonable prices.

A method introduced by the French for the purpose of cleaning the finest as well as the heavier garments worn, such as wool, felt, linen, cotton, leather, gloves, fur, feathers, straw, lace and waterproof goods without washing or shrinking them so as not to get them out of shape or fade the most delicate fabric trimming.

The fact is well known that a garment of silk or wool, if steam cleaned or washed, can never be pressed into shape, and it takes all the oil out of the wool; so that goods will never wear or look as well again besides shrinking the goods.

Therefore, figuring the small extra expense of Dry Cleaning, no one can afford to take chances of having their work done otherwise.

Many household articles, such as curtains, table covers, drapes, etc, that would be utterly ruined if washed, can be dry Cleaned, thus restoring them to their former beauty and usefulness and will not cause them to fade or the colors to run.

The Dry Cleaning Process prevents the carrying of contagious diseases on garments thus treated; it is also a disinfectant and moth preventive.
