The Ladies' Aid held their regular monthly meeting, Wednesday, at the home of Mrs. Frank Shortt with not a full staff of members as poor roads prevented some from getting out. The roll call was answered by a verse from Scripture, Peace. It has been the custom for the past few years for each and every member to exchange Christmas gifts, but this year it was decided to present to the oldest and first member and first president of the aid, Mrs. Mary Ottewell, an honorary member with a pair of goloshes as a small token of love and honor to our elderly member. REACHING THE GOAL

Consumption, as tuberculosis of the lungs is commonly called, is a wasting ailment; stubborn to master, requiring treatment and care over a long period of time. It can seldom be cured at home. Then, too, it is a communicable disease, especially dangerous to young children.

This was fully realized by the founders of the National Sanitarium Association, when forty years ago they erected the first hospital in Canada for the treatment of this disease.

This venture met with much opposition and even ridicule, for at that time it was firmly believed that tuberculosis was incurable. It was just one of those things which had to be, so why bother about it.

However, it was not long before the regimen of this small hospital began to show results—people were actually being cured—going home and talking about it.

Such was the small beginning of the Muskoka, the Toronto and the Queen Mary Hospitals for Consumptives, which now provide for more than one thousand patients.

The progress made and the change in outlook is reflected by these and the many other fine sanatoria throughout the Dominion, and by the large number of public and private organizations which to-day are sparing no effort to overcome tuberculosis.

The results have been that thousands upon thousands have been given a chance to get well, who but for hospital treatment, would have been left without hope, and the mortality from this disease has been reduced by 75%.

With tuberculosis ousted from the premier position to seventh place as the cause of death, there is cause for congratulation, but there is also the danger of the feeling of self complacency and the slackening of effort. With the goal in sight, this would indeed be a calamity, for tuberculosis will not halt its advance unless it is forced to do so. This can only be accomplished with the continued co-operation of the public at large.

The Trustees of the Muskoka, the Toronto and the Queen Mary Hospitals for Consumptives are determined that, so far as lies within their power, no one who suffers from tuberculosis shall be denied a chance to get well. If you would help in this great life saving work, please send a gift to National Sanitarium Association, 223 College Street, Toronto.

Night falls, day dawns and winter drifts in.

Angry motorist: "Some of you pedestrians walk along just as if you owned the streets."

Aggrieved pedestrian: "Yes, and some of you motorists drive around just as if you owned the car!"

The visitor called at the village library. "May I have the 'Letters of Charles Lamb'?" he enquired.

"You're in the wrong building, Mr. Lamb," said the new clerk pleasantly. "The post office is just across the street."

"You look worried, Mrs. 'Iggins, What's the matter?"

"My nerves are bad. That woman next door sings all day long in a dreadfully flat voice. What would you do?"

"Do? Simple. Send her a sharp note."
