CHANGED HER SHOES FIVE TIMES A DAY

Suffered for 20 Years with Rheumatism

Try and picture the life this woman led for twenty years—changing her shoes several times a day in a vain endeavor to attain some relief from the rheumatic pains that were constantly troubling her. Then imagine her joy when she found that Kruschen was driving away the rheumatism. This is what she writes:—

"I have been using Kruschen Salts for four years. For twenty years previously I had suffered with my feet, sometimes changing my shoes five times a day, and frequently sitting without any as the pain was so great. Now I can wear the same pair of shoes all day with comfort. I cannot speak too highly of Kruschen Salts. Only those who had been in constant pain with their feet for years can realize what it is to be free."—(Mrs.) E. A.

It is deposits of excess uric acid, lodging between the joints, which are frequently the cause of rheumatism. Kruschen Salts contain two ingredients—sodium and potassium — which are effective solvents of uric acid.

MINING FLASHES

Horace G. Young, managing director of Wendigo God Mines, currently making a regular inspection of the property, has ordered the removal from above the 100-ft. level of betwee 3,000 and 4,000 tons of ore of ½ oz. grade which procedure, it is officially believed, will improve extraction and boost current monthly gold output. It is expected that work of retimbering the shaft to the present objective of 500 ft. will be completed this month. The next step will be to carry the shaft below that horizon and establish two more levels for further underground operations. The present plant and hoist is considered adequate for this purpose. The mill is stated to be currently running at a daily average approaching 65 tons, treating ore of $15 grade when in mine run of ore.

Following the commencement of drifting operations on the second level at Mooshla Gold Mines property, a wire has been received from D. M. Giachino, resident engineer, to the effect that 73 feet of drifting has been done to date on the vein at this horizon. Fifty-six feet, according to Mr. Giachino, averaged $32.18 across an average width of 31½ inches. The last 17 feet is now being assayed.

E. W. Asselstine, M.E., in charge of operations at the West Shining Tree property of Bilmac Gold Mines, in a report to Toronto officials, states that the vein the 170-ft. horizon has improved in recent work. Development to date reveals that it is six feet wide, and very heavily mineralized. This vein has likewise been encountered on the 400-ft. level, and will be opened up further in the course of additional underground operations.

Previous reports of a highgrade strike made on the Doreva Gold Mines property during trenching operations, resulted in directors sending Lewis A. Dunham, consulting engineer, to the property in Bousquet Township to make a thorough examination of the find. In a wire to Toronto officials, Mr. Dunham states that two pits on No. 2 showing at now down 10 ft with each pit being sunk to develop high-grade stringer in vein, which are wider at the bottom of the pit and show more mineralization. Three drills are in operation, with No. 5 hole south of No. 1 showing completed to 850 ft. The core shows conglomerate is 300 ft. thick and begins 600 ft. south from No. 1 showing. The core is being sampled preparatory to testing.

Ypres Cadillac is located in the heart of a proven mining area, the rich Cadillac field, and is approximately half mile from O'Brien Mines where the sensational discovery last year was made.

The property consists of ten claims, approximately four hundred acres.

Development work is being pushed forward, aggressively, by the management. Harold G. Way, M.A., Ph.D., geologist, is in charge of work on the property, and crews have recently been increased, to facilitate operations.

"I am very enthusiastic about the chances of your property," Dr. Way recently stated in a letter dated December 2, 1936, to the officials of the company.

From a standpoint of future operations, the property is very favourably situated. The road has been completed into it from Kewagama, and the new Canadian National Railway line to Seneterre, passes through the middle of the property itself. Electric power lines are within half mile.

At a meeting of unitholders of Rebair Gold Syndicate held recently, J. M. Baird, manager, reported that finances are in good shape, with arrangements made for large interests to assume the final financing upon completion of present development work. Arrangements for additional equipment, including diamond drilling, have been completed. L. W. Reed, mine manager, states that the ore bodies were increasing in size as development work progressed. At present the main ore body has been proven to be over 1,000 ft. long and 6 to 20 ft. in width and from 25 channel samples taken an average value of $20 per ton was secured.

Nay ob Gold Mines, Porcupine gold area, has been aggressively concentrating operations on the 300 and 700-ft. levels with excellent results, according to Hallin B. Hatch, geologist. This is in line with the general plan of development previously decided upon. Upon completion of the present campaign definite production plans can be formulated. Mr. Hatch declares. Approximately 150,000 tons of ore averaging $5 per ton has already been blocked out on 3 sides above the 700-ft. level. The 300-ft. level drift (west face) is at present in good grade ore, with consistent values ranging from $2 to $10 throughout the whole length of the drift widths. Crosscutting near the west face to the hanging wall of the vein structure definitely disclosed that the vein structure is 45 ft. wide, with sampling of 39 ft. on the hanging wall side yielding value of $8.75 over this width, while 9 ft. averaged $21.90 per ton. No 1 vein has been driven on for 600 ft. east and west on the 300 and 700-ft. levels.

Immediate development at depth of the indicated orebody on the Denison Nickel Mines property in Denison Township, Sudbury mining division, is planned by company officials. It is proposed to install a mining plant, sink a 3-compartment shaft to 250 ft. and carry out later work on that horizon. Drilling has indicated a consistent nickel-copper ore zone, cut at depths ranging from 175 to 1125 ft., with an average width of 28 feet. An ore length of 400 ft. was shown on surface, while a length of 500 ft. was indicated on the 1,000-ft. level. The grade averaged 1.05% copper, .81% nickel and $3 platinum and gold. Allan Anderson, M.E., has been appointed consulting engineer in charge of operations. A crew of men has already started clearing for the shaft site and a mining plant for sinking has been ordered.

Wave of Modesty Strikes Varsity

Fair Co-eds At Winnipeg Won't Let Venus Shiver This Winter

WINNIPEG.—A reformist wave seized co-eds at the University of Manitoba here last week and draped a statue of Venus De Milo under a curtain of modesty.

The life-sized figure that for many years has occupied a prominent place in the students' union office met disapproval of the women's association.

The girls demanded the fair eytherea be attired in a manner more becoming to a lady. So today Venus appeared with a few cubits of cheese cloth as a drape to protect her perfect figure from the public gaze.

Colleges Recognize The Co-ed's Right to Smoke

CHICAGO—Mid-western universities have reached the point of recognizing the co-ed's desire for a cigarette. All co-ed's do not smoke, of course, but for those wishing to light up between classes, it depends upon whose campus she treads.

Washington University at St. Louis has a faculty ruling prohibiting the co-ed to smoke in front of Brookings Hall, in the women's building or any other place on the quadrangle. At the University of Chicago the co-ed is considered old enough to use her own judgment as to where she smokes. The same rule prevails at Northwestern University.

De Paul University and Loyola University forbid girls smoking on the campus. Loyola, however, has provided a special room for this purpose in its downtown building.

"Education is not just preparation for life, but is part of life itself—a continuous part."—Henry Ford.

Alleged WIT

Theres not so much difference after all between a "slicker" and a "slacker."

Ascetic Person—Do you expect to spend your whole life in the wicked pursuit of riches?

Brisk IndividualNo. If I'm not rich by the time I reach fifty years of age, I shall consider myself an ignoble failure.

Post Office Clerk—This letter's overweight, madam. You'll have to put another three-cent stamp on it.

Woman—Well, of all things! Here I've mailed dozens of letters that were underweight. And now you want to charge me three cents because I'm sending one that's just a teeny-bit over the limit. That's terrible. And right at our own post office, too!

At the Turn of the Road

At the turn of the road is a picture that comes to my mind like a dream.

'Tis the little white house of my neighbor that stands by the side of the stream.

If you are loaded for bear, don't waste your ammunition on chipmunk.

A distinguished professor of a noted university was delivering an address before a group of business men. At its conclusion a manufacturer joined issue with him.

Manufacturer—Natural science is of no benefit to me.

Professor—What is your business?

When a wife dies a husband says: "I would be a better husband if I had it to do over again." But when a husband dies his wife says: "Well, I did my duty by him."

Diner—I can't eat this soup.

Waiter—I'll call the manager.

Diner (when manager arrives) — This soup, I can't eat it.

Manager—I regret that, sir. I'll fetch the chef.

Diner (when chef arrives)— I can't eat this soup.

Chef—What's the matter with it?

Diner—Nothing; I ain't got a spoon.

This might, in some cases, prove a bar to identification:—

Friend—How did you manage to evade the photographers who have taken so many pictures of you?

Movie Actress—I threw away my lipstick and washed my face.

An intricate machine is like a man, it needs "a doctor" at close call, so as to straighten it out when it begins to get sick— and the machine can develop as many ailments as can a human being, which is saying a lot.

The one-ring circus was visiting a town in the hills. The folks there recognized all the instruments of the band except the slide trombone. One settler watched the player for quite some time, then, turning to his son, said: "Don't let on that you're watching him. There's a trick to it; he ain't swallerin that thing!"

Aren't People Queer?

Writes the Detroit Saturday Night:— It's all wrong to raise your eyebrows at the things some people eat — mice, for instance, or army worms.

Foods are not queer; it is people — human beings — who are queer about what they eat, declared Matthew W. Stirling, well-known explorer and chief of the bureau of American Ethnology, in a lecture.

Admitting that he has eaten grasshoppers and grubs only sparingly, as a sort of experimental duty, Mr. Stirling pointed out that we may turn up our noses at a dish of parched grasshoppers served by Indians in Nevada or natives in East Africa, but the natives are just as disgusted at our curious custom of eating eggs.

Above all . . . buy on REPUTATION

If you want seeds that will "come up" to your expectations buy Rydyrs' — the seeds with a 70 years' reputation.

Send for free copy of Rydrs' great new Coronation Year Seed Book, 122 pages packed with unique novelties and old friends. Practical advice. Coloured plates.

Ryders' SEEDS for results

*Write for your copy now to Dept. WP 1 P. O. Box 2454, Montreal.

*Orders for seeds must be sent direct to: Ryder & Son (1920) Ltd., Seed Specialists.) St. Albans, England.

For the 13th consecutive year a coast-to-coast chain of Boy Scout Christmas Repair Shops gathered, reconditioned and distributed many thousands of toys, dolls, and story books to the children of needy families in all parts of the Dominion. Several bulk shipments of toys were sent from eastern shops, including that of London, Ont., to help toy shops in Saskatchewan meet the heavy demand in that province. As usual, the Girl Guides gave splendid help in the doll departments.

* * *

A variety show was staged by the Boy Scouts and Girl Guides of Milton, Ont., in the Princess Theatre, to raise funds for the local Community Christmas Tree.

* * *

Members of the Bowmanville Public School, representatives of various churches, the Canadian Legion and members of the Lions Club were present at an impressive ceremony in the Central School when colours were presented by the Lions Club to the 2nd Bowmanville Boy Scout Troop.

* * *

Rover Scouts of Merritt, B.C., are operating a small hostel to provide beds, warmth and food for destitute transients passing through that town during the winter.

* * *

The Hon. Archibald P. McNab, the new Lieutenant-Governor for Saskatchewan, like his predecessors, has become Provincial Patron of the Boy Scouts Association of the province. In further evidence of his desire to associate himself closely with the Movement, His Honour was invested as a Scout, in a ceremony conducted at Government House, Regina, November 12th, by Provincial Commissioner S. J. Latta. Saskatchewan is again to be congratulated.

Chief Justice Baxter of New Brunswick, whose support and guidance as President of the Provincial Council over a number of years has been an important factor in the steady advance of Scouting in the province, has once again been elected to that office. In his address of acceptance at the Council's annual meeting Chief Justice Baxter warned against any attempt to increase numbers at the expense of lowering the high standard of Scouting that has been achieved in the province.

J. Lyons & Co. (Canada) Ltd. Toronto and Montreal

What $300 Would Have Brought You—

If invested in these stocks recommended by us last year --

In O'BRIEN	Recommended by us on May 2nd at 60 cents	$7,000.00
In Lapa Cadillac	Recommended on Sept. 16th at 45 cents	$ 965.70
In Moneta	Recommended on Oct. 7th at 90 cents	$ 639.36

Our Premier Recommendation for 1937 is YPRES CADILLAC

On the basis of location development and management, this stock is our leading recommendation for 1937. The property is favorably located in the proven Cadillac area — approximately half a mile from the O'Brien shaft.

The character of the management is shown by the way development work is being carried on—additional men were added to the crews last week, working on certain specifically defined areas. Harold G. Way, M.A., Ph.D., well-known Canadian geologist, is in charge of operations. Roads have been constructed and all provision made for facilitating work.

We have followed YPRES CADILLAC closely since last year and strongly recommend purchase at the market immediately. Information and weekly bulletin on development is being sent to registered shareholders, and is available to the public. Write or telephone.
