"Hughie" has been a valuable employee steadily in this office during the past six years, and is now taking a well-earned vacation, and it is to be hoped that, after renewing the pleasant memories of his childhood environments, he will return West more fully convinced that "this" is the place to live. Mr. Pedlar was accompanied on his trip east as far as Souris, Man., by his wife and infant son and daughter, Alice, who will visit friends there until his return."

Dairying for Profit

Everyone dairying for profit will find that a cream separator is indispensable. It is, therefore, simply a question of which separator will best meet his requirements.

The Dairymaid cream harvester has been designed to meet all demands. It is built of the best material by experienced workmen.

The essential points of the Dairymaid cream harvester are:

Simple construction, Durable construction, Close skimming,
Large capacity, Easy cleaning, Light running.

These, and many others, are valuable features which make a Dairymaid cream harvester best suited to those dairying for profit.

For every up-to-date, well regulated farm, a Dairymaid cream harvester is a necessity. It will save you the inconvenience of hauling your milk to the creamery, and bringing back cold and tainted or sour skim milk.

Use a Dairymaid cream harvester and separate your milk while it is still warm and secure all the butter fat.

Call and examine a Dairymaid cream harvester and secure one of the handsome little booklets telling you more about this separator.
