PRACTICAL JOKER STOPPED THE TRAIN

The special train on Christmas Eve was suddenly brought to a stop about two miles north of Creemore when some practical joker applied the air brakes.

The situation was made humorous because the crew in charge were not familiar with the road and when the stop occurred a brakeman called "Glen Huron." This brought a dozen or more passengers to the exits, but some of these knew the landmarks and advised the crew that the "town" was a couple of miles away. It was then realized what happened but the joker was not identified.—Creemore Star,

THIS SAND ROTS CARROTS

Pigs are pigs and sand is sand, but the fact that there are different kinds of sand was forcibly brought home to a local man recently. This worthy gentleman had a number of luscious carrots that he wished to preserve for local consumption. Lacking a supply of sand, he journeyed to the town's stock pile on Nairn's hill and made off with a box of the precious substance. Unfortunately, he overlooked the fact that liberal quantities of calcium chloride are mixed with this sand, and within a few days the odor emanating from the box acquainted him with the fact that all was not well in the winter larder. Investigation showed that the action of the chemical had rotted the carrots.—Palmerston Observer.

NOTICE

TO RUPTURED PEOPLE

PLEASE DO NOT BE DECEIVED

ANYONE INTERESTED in or how YOU CAN BE FREE FROM TRUSS WEARING in Six Months—Come to the Grand Central Hotel, Dundalk, on WEDNESDAY, JANUARY 19—All Day and Evening.

Consult a noted Rupture Specialist—20 years' experience; two years in operating room. Let HIM demonstrate to you free of charge HOW and WHY there are no curing qualities in a truss. A TRUSS is merely a mechanical support to retain the hernia and keep it in place providing it is properly fitted with an uplift effect directly over the place where the rupture is developing. Also let him demonstrate to you HIS method of treatment for rupture, a treatment which has been approved by a number of medical men throughout Canada, along with the most comfortable fitting appliance that can be obtained in America. This treatment used with a properly fitted appliance has been proven by physicians to be a vast advancement over all former methods, exemplifying instantaneous effects immediately, withstanding any strain or position, no matter the size or location, large or difficult cases, on men, women and children. Consult your doctor after using this treatment. If he can find any rupture apparent your money will be refunded. Don't forget the date—January 19th.

T. B. MUST BE SCIENTIFICALLY TREATED

The most important factor in the care of tuberculosis is rest. If a patient has tuberculosis of a joint, the limb is put to rest by splinting or by some other means. The same method applies to tuberculosis of the lungs. In a certain number of patients the diseased lung can be put at rest by artificial pneumothorax or by other surgical operations.

In most cases, however, the only way to rest the lungs is to rest the entire body. This general rest reduces all muscular action, thereby saving energy with which to fight the disease.

Mental ease is also essential in the treatment of tuberculosis and neither freedom from worry nor proper rest can be had at home.

Hospitals alone can provide the proper environment and scientific treatment necessary to effect a cure and the earlier such treatment is sought by those afflicted, the greater is their chance of recovery.

The Muskoka and the Toronto Hospitals for Consumptives and the Queen Mary Hospital for Consumptive Children are equipped to serve those who are in need. The good they may do and the number they may serve is limited only by their means. This year these hospitals face an operating deficit of $123,000, which large sum must chiefly be raised through voluntary contributions.

If you can give anything to help this great, charitable work, will you please send it to National Sanitarium Association, 223 College Street, Toronto.
