## *Find Runaway Dog 660 Miles Away*

G. D. Wills' wandering dog was all ready to come home Friday, to Tyrone, Pa., after an absence of more than a year in which he travelled about 660 miles.

The pedigreed animal disappeared from home, on August 8th, 1936. Last week Wills received a letter from Lester Halverson, of Leland, Ill., advising that Halverson had found the dog, starving on a roadside near Leland.

Wills readily agreed to pay the cost of shipping the animal back to Tyrone.

Towns all over Great Britain have installed automatic machines which dispense twopenny brickets of ice cream.

## A Reducing Diet Based On Bread

**Hamilton Women Conduct Successful Experiment on How to Reduce Without Hunger or Fatigue — Health Experts Will Check on Results.**

How to reduce without hunger or fatigue on a diet that any woman can follow, has been discovered by a group of Hamilton women. Results of an experiment in reducing conducted under the supervision of a physician by 16 women in Hamilton, just announced, show that the women lost in weight, amounts ranging from nine to thirteen pounds each.

Amazing feature of the diet followed by the women in the test was that it was based principally on bread, the one item usually avoided in the ordinary reducing diet.

The Hamilton experiment was conducted under the direction of Mrs. Thomas Taylor, mother of four athletic daughters and energetic exponent of personal health.

**Five Times a Day**

Organizing the group of women to test the bread diet which was already popular in Britain, Mrs. Taylor had the assistance of Dr. J. E. Tilden, Hamilton physician, who supervised the test, examined the women before and after the diet period and recorded their weights before starting and at the end of each week of the diet. Though the British diet popularized by Elizabeth Ann Loring used plain white bread, for the Hamilton experiment the group used a special loaf prepared from a recipe made up by Lloyd Jackson, cereal chemist. This bread was slightly higher in protein and mineral salt content than the ordinary loaf.

The diet consisted of two ordinary slices of bread with butter, five times a day. Twice a day the women drank half a pint of milk with the bread. They also had tomato juice and were allowed tea or coffee. The meals were spaced out during the day at fairly regular intervals.

**Loss In Measurements**

Most interesting feature of the results was the loss in measurements that accompanied the reduction in weight. This reduction in waist, hip or bust measurement tended to occur where it was most needed, according to Dr. Tilden. Losing 13 pounds, one woman lost two and a half inches from the bust, three and a half from the waist and five from the hips. Another dropped ten pounds to reduce her bust two inches, hips one inch and waist seven inches.

In each case, the reduction occurred where it was most needed. Interviewed at the end of the test, Mrs. G. Cremer, who lost 10 pounds, was enthusiastic about the pep she continued to have all through the diet period. Mrs. R. Richmond had a happy experience because a fur coat which had become too small two years before as her weight increased, now fitted her beautifully again.

Results of the test are being studied by dieticians and health experts and may possibly be made the basis of an education health campaign in dieting.

## *"Roosternapping" Is Latest Crime*

Beautificus, a pedigreed rooster, was probably the meaty part of a stew in Dallas, Texas, last week. The deadline for his release of $25 ransom passed and Attorney Maury Tughes, his owner, feared the worst. Hughes had been instructed to place $25 in a tin can at a spot in the residential section. Failure to follow instructions, the ransom demand said, would place Beautificus in a stew pot. Hughes knew the "roosternappers" were on the level—they enclosed two of Beautificus' tail feathers with their note.

## *The Deepest Dive 820 Feet Down*

An Italian naval officer this week descended 820 feet into the waters of the Mediterranean in a newly-invented diving suit weighing 900 lbs. at La Spezia, Italy.

(Previously the greatest depth a human being had ever reached was the dive by Max E. Nohl, of Milwaukee, Wis., who touched the bottom of a valley in Lake Michigan 420 feet below the surface December 1).

Lieut. Notari was sealed inside the diving suit which a crane swung over the side of a barge.

## Sixty-Ninth Annual Meeting Royal Bank of Canada

**Expansion of Foreign Markets for Canadian Wheat Pressing National Problem, Says Morris W. Wilson. — Urges Reciprocal Trade Agreements to Secure Outlets for Staple Commodities. — Drought Problem Reviewed.**

**Bank's Balance Sheet Reflects Satisfactory Year for Business States Sydney G. Dobson. — Looks for Reasonably Good Conditions In 1938. — Answers Alberta Critics.**

The expansion of foreign markets for Canadian wheat by reciprocal trade agreements and a truly national approach to the drought problem were urged by Morris W. Wilson, President and Managing Director, at the Sixty-ninth Annual Meeting of The Royal Bank of Canada.

Canada was a fortunate country stated Mr. Wilson. The high level of national well-being reached by the phenomenal recovery of 1936 was maintained in 1937 and the activity in most lines of business compared not unfavourably with the record year of 1929.

A tragic exception to the general improvement was experienced in the Prairie Provinces. Obviously the need which exists is acute, the situation could not be handled by the Province, and the Federal Government is to be commended for having shouldered the greater part of the burden.

The immediate problems created by the drought require emergency measures; but a situation has also been brought to a head which has been unsatisfactory for years and requires treatment on a national basis.

Large areas, ordinarily unsuitable for the purpose, have been planted to grain. Under favourable weather conditions the crop from an area equal to that planted in recent years would furnish serious marketing problems. The efforts towards self-sufficiency in food supplies on the part of many countries, and particularly Germany, France and Italy, have also narrowed the international market for wheat and flour to a point where total overseas sales of the four important non-European exporters have been reduced as follows:

**Exports of Wheat and Wheat Flour**
(Crop years, Aug. 1 to July 31)
**Millions of Bushels**

| | 1923-24 | 1928-29 | 1933-34 | 1936-37 | 1937-* |
|---|---|---|---|---|---|
| Canada .. | 346 | 406 | 194 | 195 | 88 |
| U.S. ..... | 130 | 154 | 29 | nil | 104 |
| Argentina | 173 | 222 | 147 | 162 | 80 |
| Australia | 86 | 109 | 86 | 102 | 104 |
| Total 4 Countries | 735 | 891 | 456 | 459 | 376 |

* Broomhall's estimate of December 15, 1937.

It is a sad commentary that a large crop in Canada, unless accompanied by crop failures in other countries, would bring little more total remuneration to our farmers as a whole than they have secured in the years of drought.

There was no single remedy to bring about improvement, said Mr. Wilson. Diversified agriculture, withdrawal of sub-marginal land from wheat, and more scientific methods would help. But these should be combined with exceptional efforts on the part of the government to open the doors of foreign markets, so that when Canadian farmers again reap a good crop the wheat may be sold to advantage. It is clear that the Prairie Provinces cannot solve this problem alone. This is a task which calls for prolonged, consistent and wholehearted co-operation.

The best possible hope of securing outlets for our grain and other agricultural products is through negotiations with countries which are now growing food crops at an exorbitant cost.

I view with satisfaction the present tendency among democratic countries to break down barriers impeding the natural flow of business.

With the general statement that Canada should admit freely articles not produced within the country there can be little basis for disagreement. But I would go further and say that reduced tariffs should be applied to articles which are made in Canada only on a restricted and uneconomic scale.

The problem is not simple, but studies undertaken by the Tariff Board to determine what concessions should be made to foreign countries in exchange for an important market for our staple commodities, should receive the support and encouragement of experts from the industries directly affected.

**MINING**

The continued growth of mining had contributed materially to the general welfare of the country, said Mr. Wilson. During the past year, he said, production of gold, copper, nickel and zinc, has been between two and two and one-half times the high level of production attained in 1929. It is estimated that in 1937 the expenditures of the mining industry for wages and supplies have been between $225 and $250 million. Of $300 million paid in dividends by Canadian companies in 1937, one-third was paid by the mines.

**FOREIGN AFFAIRS**

The position abroad is complex and difficult but one gets few hints of the tremendous désire for peace which is latent in all parts of Europe. I know of no European country where the mass of the people are sympathetic with the aggressive expressions of some of their leaders. In many countries, desperate economic conditions have created mass fear. Ruthless, cynical and irresponsible leadership is gambling to keep itself in power. Just as there are constructive psychological factors beneath the surface, so there are favourable economic forces at work. Those of us who continue to feel hopeful base our optimism upon the belief that idealism is not dead and that it cannot be long before economic reconstruction gives even those who are most desperate a breathing spell.

**UNITED STATES**

One of the most important questions of the day is whether the United States is merely experiencing an interruption in the long term trend of recovery, or whether the wheel has turned full circle and the country is again facing a major depression. In my opinion, fundamental conditions now and in the period immediately preceding the last depression are not comparable. One would be tempted to say without hesitation that the present setback is merely a temporary recession, were it not for the unfortunate lack of co-operation that exists between Government and business.

It surely cannot be long before a plan for practical co-operation between government, industry and labour will be adopted.

**CONCLUSION:**

Where the recent prosperity in the United States has been dependent mainly upon large-scale government deficits, the Canadian recovery took its origin from foreign trade.

Without doubt, prosperity based upon world demand for Canadian products is more soundly established than that based upon deficit spending. Sixty per cent. of our exports go to countries other than the United States, and even with a substantial decline in exports to that country, total Canadian prosperiy should be only moderately affected.

On the whole, I look forward to 1938 as a year in which—barring some upset in international affairs not presently anticipated—I expect to see an improvement from present levels in the United States, and a further orderly economic reconstruction in many foreign countries. If this proves to be an accurate forecast, we can, I believe, look forward to further substantial progress towards full recovery in Canada.

**GENERAL MANAGER'S ADDRESS**

In reviewing the general Balance Sheet, Mr. S. G. Dobson, General Manager, referred with satisfaction to an increase of $14,000,000 in total assets, a renewal of the upward trend in commercial loans and a growth of 190 million dollars in Royal Bank deposits in less than five years.

Conditions in Canada definitely improved during the year, said Mr. Dobson, the one dark spot being the drought areas in Western Canada.

Referring to the unfair criticism in Alberta, Mr. Dobson said in this campaign of misrepresentation, efforts have been made to stir up resentment against the banks. And yet, during the last five years not in one single instance has any farmer or home owner in Alberta been deprived of his farm or home by this bank through foreclosure.

To demonstrate the wide diversity of services banks provide, Mr. Dobson took occasion to analyze certain of the bank's figures. At the end of the year, the bank had on its books loans to farmers totalling $16,000,000, to retail merchants $21,000,000, to professional men and other private individuals $51,000,000. As a further example of the extent to which we facilitate the affairs of what might be termed the "smaller client", I may say we had loans outstanding to 61,000 borrowers whose liability to the bank did not exceed $500 each.

In conclusion, Mr. Dobson said that a profitable year for business was clearly reflected in the Bank's own balance sheet for 1937.

STOP Itching
TORTURE *In A Minute*
For quick relief from the itching of eczema, blotches, pimples, athlete's foot, scales, rashes and other skin eruptions, apply Dr. Dennis' pure, cooling, antiseptic, liquid D. D. D. PRESCRIPTION. Its gentle oils soothe the irritated skin. Clear, greaseless and stainless—dries fast. Stops the most intense itching instantly. A 35c trial bottle, at drug stores proves it—or money back. Ask for D. D. D. PRESCRIPTION.

## *Elephant Tusks Sold For $4,000*

MOMBASA, Kenya Conoly, Africa.—A pair of elephant tusks, claimed to be the heaviest in the Kenya Colony, has been sold to American interests for between $3,000 and $4,000. The tusks, weighing 178 and 187 pounds respectively, were believed destined for a New York museum, possibly the American Museum of Natural History. They were seized from two men who were fined for illegal possion because the colony's game laws forbid the retaining of ivory from the interior.

**New U.S. Ambassador**

WASHINGTON. — The Senate has confirmed President Roosevelt's nomination of Joseph P. Kennedy to be United States Ambassador to Great Britain.

Kennedy, long one of the Administration's principal business advisers, will succeed the late Robert Worth Bingham.

CARRY YOUR ALKALIZER WITH YOU

*The fastest way to "alkalize" is to carry your alkalizer with you.* That's what thousands do now that genuine Phillips' comes in tiny, peppermint flavored tablets—in a flat tin for pocket or purse. Then you are always ready.

Use it this way. Take 2 Phillips' tablets—equal in "alkalizing" effect to 2 teaspoonfuls of liquid Phillips' from the bottle. At once you feel "gas," nausea, "over-crowding" from hyper-acidity begin to ease. "Acid headaches," "acid breath," over-acid stomach are corrected at the source. This is the quick way to ease your own distress—avoid offense to others.

MADE IN CANADA

DISTURBED AT NIGHT?

A DIURETIC stimulant such as Dr. Pierce's A-uric is often indicated and usually it is sufficient to relieve minor kidney irregularities. These A-uric Tablets put up by Dr. Pierce and sold by druggists are of value in relieving the burning and soreness, and the desire for frequent urination caused by or associated with excess acid, and they tend to ease the flow of urine. Read this: Ronald Spooner, 132 Brock St., Brantford, Ont., said: "In the morning I would be so stiff and sore that I could hardly stoop over to tie my shoes. Then again my kidneys gave me trouble, the secretions passed very often and burned in passage. I took Dr. Pierce's A-uric Tablets and was relieved of my misery." Price, 65 cents.

DO YOU FEEL SLUGGISH?
Maybe you need more bile

When you feel you haven't a friend in the world and life is not worth a cent—that's the time your liver is getting you down. Don't fall for it. Make your liver behave.

Tanol Tablets will do the job. They act directly on the liver, stimulating the liver's production of bile. Comprising a special blend of certain laxatives Tanol Tablets include a small proportion of calomel, probably the most effective liver stimulant known. In a day or two your liver is at work again as well as ever and you feel at friends with the wide, wide world. All druggists have Tanol Tablets, 50c.
