ARRESTED AS A SWINDLER

A man about forty-six years of age giving the name of Joshua Coppersmith has been arrested in New York for attempting to extort funds from ignorant and superstitious people by exhibiting a device which he says will convey the human voice any distance over metallic wires so that it will be heard by the listener at the other end. He calls the instrument a "telephone," which is obviously intended to imitate the word "telegraph" and win the confidence of those who know the success of the latter instrument without understanding the principles on which it is based. Well-informed people know that it is impossible to transmit the human voice over wires as may be done with dots and dashes and signals of the Morse Code, and that, were it possible to do so, the thing would be of no practical value. The authorities who apprehended this criminal are to be congratulated, and it is hoped that his punishment will be prompt and fitting, so that it may serve as an example to other conscienceless schemers who enrich themselves at the expense of their fellow-men.—Reprinted from a Boston newspaper of 61 years ago.

DUPLICATION IS RIFE

(Alliston Herald)

A stranger stopped at Hunter's garage one evening last week to get a little chore done on his car and while waiting asked if Carleton's bakery was located in Alliston. On being told that it was, the stranger told of seeing a car come out of a farm premises some distance ahead of him and on passing it saw that it was delivering bread for the Alliston bakery. Coming to the gate from which the Alliston car had emerged, was another baker's delivery truck going in. This time it was a Barrie bakery and when about a mile past the place a third truck was met. The stranger observed that it is all the delivery trucks running round the country duplicating the routes that keeps the price of bread up. Many Allistonians will recall that during the election campaign of 1935 when Dr. W. D. Smith was a candidate for the legislature one of his topics when on the platform was the duplication of cream routes in the country. Whether the doctor ever took the matter up in caucus was never made public, but it is the duplication of a lot of things that is responsible for the high prices of numerous commodities.
