Live Stock Report

(By Dunn & Levack, Toronto)

With a heavy run of 4500 cattle for Monday's market trade opened slow and buyers were bidding lower prices. However, by noon hour a better demand developed and sales on good to choice cattle were made at fairly steady prices, while those of medium to good quality, off pasture, sold fully a quarter lower.

A few choice weighty steers brought 8.00, but the bulk of the good to choice ranged from 7.00 to 7.50; fair to good from 6.50 to 7.00. Butcher cattle were from a quarter to thirty-five lower choice from 6.75 to 7.25; fair to good 6.00 to 6.65; common to medium 5.00 to 6.00. Choice baby beeves brought from 7.50 to 8.00, with a few at 8.25, others at lower prices accordingly. Stockers and feeders were in limited demand, best light kind from 4.00 to 4.50; with good breedy feeders from 4.75 to 5.25. The cow trade was easier, choice from 4.50 to 5.00; fair to good from 3.50 to 4.25; canners and cutters 2.50 to 3.00. Choice butcher bulls brought from 4.50 to 5.00; good to choice heavy bulls 4.00 to 4.50; good heavy bologna bulls 4.00 to 4.25; light bolognas 3.50 to 3.75.

Choice lambs sold at 10.50, with those of medium to good quality from 8.00 to 10.00; unfinished lambs were not wanted and it is advisable to keep them on pasture until they are ready for market. The sheep trade was very slow, choice light kind 3.00, others from 1.50 to 2.50. The calf market was lower, choice 7.50, with a few at 8.00; fair to good from 6.50 to 7.25; common to medium 5.00 to 6.50; grass calves 4.00 to 4.50.

The hog market showed considerable strength on Monday, sales being made at 11.15 for truck deliveries. Prospects for the balance of the week are favorable.

It costs Toronto folk over a million and a quarter dollars a year for water and that seems large until you compare it with what they spend for beer.

AMAEMIA

A person is anaemic when the blood is deficient in quantity or quality. When a considerable amount of blood has been lost through bleeding, then there is anaemia due to a deficiency in quantity, and this condition gradually corrects itself as the body mechanism makes good the loss. The anaemia due to poor quality generally means that there are not enough red cells in the blood, or that the important substance called haemoglobin found in the red cells is deficient in quantity. The chief function of the red cells is to carry oxygen by means of its haemoglobin to all the tissues of the body. It can be readily understood that any interference with this vital function, due to a lack of red cells or of haemoglobin, will affect every tissue of the body. This may be expressed in another way by saying that if the tissues of the body are to be kept in a healthy condition it is necessary that the quality of the blood supplying the tissues of the body is maintained.

The quality of the blood is lowered as the result of such general diseases as tuberculosis and cancer. Chronic abnormal conditions of the stomach and other parts of the digestive tract may affect the blood. Without going further into the list of causes it will be evident that the proper treatment of such anaemias is the removal of treatment of the cause of the disturbance. Nothing can be gained by dosing with so-called blood tonics, when what the individual needs is fresh air, sunshine, rest and proper food. A balanced mixed diet supplies the substances necessary for the body to produce a good blood supply. The body cannot do this work if it is suffering from disease, and so the treatment of diseased conditions comes first, followed by proper diet and hygienic living.

Pernicious anaemia is one special form of anaemia. It is a disease that has recently been conquered. The use of liver or liver extracts, according to the directions of a physician, controls this form of anaemia.

AS USUAL

An old German and his wife were given to quarreling. One day after a particularly unpleasant scene, the old woman remarked with a sigh:

"Vel I vish I vas in heaven!"

"I vish I vas in the beer garden," groaned her husband.

"Ach a!" cried the old wife. "Always you pick out the best for yourself!"

NEW GAME

Father: "Now Jane what were you doing last night at the gate?"

Jane: "John and I were playing Kith and Kin."

Father: "Kith and Kin! What do you mean."

Jane: "John said 'Can I kith you?' and I said 'You kin'."

If it were not for liquor Canadian jails could be reduced to half their number and half their size.

Another Defeat

Flesherton took another defeat on the chin last Wednesday evening when Walter's Falls came from behind in the sixth inning to win by 15-13. The game was rather interesting to watch and although all the boys tried hard neither team could control the ball in the in-field on account of the roughness of the field. Dargavel started on the mound for Flesherton with Gorrell receiving and both these fellows did fine until Gorrell was forced to retire with a shiner and Smith and Johnson took over their duties. Dargavel showed signs of being a good pitcher and in the game here Thursday night with Markdale should "go places." Smith banged two homers and Dargavel one, one of Smith's clouts coming with the bases loaded. A good sized crown of fans were on hand to "take in" the game and it is hoped a bigger crowd will visit the fair grounds to-morrow night (Thursday) to see Markdale and Flesherton in action.

Send the Advance to a friend.

NO REASON TO DIE

(Alliston Herald)

Last year in Ontario, according to the accident records of the Department o Highways, 766 people lost their lives, and 12,092 were injured in motor vehicle accidents on the streets and highways of this province. These figures are facts—they do not lie. They cannot be juggled by statisticians to make the picture any better or any worse. But these figures are more than facts. They are people. Thirty-nine of those killed were happy little children of four or less. One hundred and eighteen were elderly people of sixty-five or more. All of them were folk you knew or folk like those who live next door, or down the street, or in the next block. They were children and parents who were loved dearly—people on whom the "sun rose and set" for someone. You can juggle these figures until doomsday, and you will still get exactly the same answer—in 1937, 766 people were killed and 12,092 were injured on Ontario's streets and highways. And the loss of life and limb was completely useless. Those children did not die to advance the cause of science—that other little children might live. Those grown ups did not die to protect their homes and country from a foreign invader—that their children and generations to come might live in peace and security. There was no reason in the world for them to die as they did.

Customer: Look here, butcher, you are giving me a big piece of bone; with meat as high as it is, I don't want all that bone.

Butcher: I'm not giving it to you, mister, you're paying for it.
