G. B. Power Co. Will Get Release

Reeve McKenzie, Clerk Bellamy, Councillor Alex. Cameron and their solicitor, Mr. Henry, went in Toronto on Wednesday of last week interviewing the Georgian Bay Power Co. to see if something could not be saved for the township out of the change of proprietorship in the Eugenia falls power.

The meeting with the secretary of the company, their solicitor and the president, Mr. Hogg, took place at the office of the Hydro-Electric Commission in the Confederation Life building, and occupied most of Wednesday. The affairs of the company were laid bare to the delegation, and to say the least were not very satisfactory. The company had liabilities to the extent of $140,000, this including a mortgage of $20,000 to one firm. As the sale to the Commission is for less than half the indebtedness, or $60,000, it means that after the mortgage is paid off there will remain but $40,000 left to reimburse the bond holders, representing about 28 or 30 per cent. of their investment. Eugenia was not a money-maker for the bondholders.

Although the township will receive nothing more than this year's taxes and what has already been paid, the officials figure that the township will be considerably in pocket. Previous to taking hold of the development the property involved was assessed at about $5000. For four years past, according to the agreement, the property has been assessed at $40,000.

There has been a delay of several months by the Commission in taking up the option, awaiting a clearance from the township of the covenants entered into by the The Georgian Bay Power Co. This clearance, it is claimed, had never been asked for by the company and the township council was unaware that it was necessary to give such a document.

As a result of the delegation's visit to Toronto the Georgian Bay Power Co. have agreed to pay the taxes on the 1913 assessment amounting to about $540, and clearance papers will be supplied them immediately upon payment of that amount. The matter was discussed at a special meeting of the Council on Saturday and the above offer accepted.

Well, now, what a belching forth of hot air from the Kimberley correspondent? His stature must have been very large before he got rid of that. We hope he got ease right away, for, poor fellow, he must have been in awful pain. We had heard of a place that is warmer than this—now we are convinced there is such a place, having heard from the proprietor. And if we are mistaken, and he is one of the smart boys that we heard so much about, his father ought to appoint his funeral soon and have the corpse ready. He is a lot too smart to live in this world. If his stature now corresponds with his brains he is not knee height to a grasshopper, for he was behind the door when brains were given out and did not get any. We did not intimate in any way that we ever expected Dr. Sproule to overstep the limits of his office as Speaker of the House, and we hope the good Dr. may continue to be the clean politician this hot-air shooter claims him to be now, though we well remember the time when Dr. Sproule himself had a difficult task before him persuading his constituents that his action was of such a type when a certain bill came before the House and his vote gave a helping hand to get it passed.
