They Are Accompanying King George and Queen Elizabeth to Canada

Here are six of the retinue of 30 persons who will accompany the King and Queen to Canada. Officials of Scotland Yard, press representatives and other minor dignitaries have already reached Canada and the United States to arrange the thousand-and-one details in connection with the royal visit. TOP, LEFT to RIGHT: Lady Nunburnholme, who will serve as lady-in-waiting to the Queen; the Earl of Airlie, who will act as Lord Chamberlain; Lady Katherine Seymour, who will also be a lady-in-waiting to her majesty. BOTTOM, LEFT to RIGHT: Lord Eldon, who will serve as lord-in-waiting to the King; the Hon. Piers Legh. equerry to the King and George F. Steward, press officer at No. 10 Downing St.

LEFT THE ARMY WITH RHEUMATISM

Now Fit To Join Again

Twenty years ago, he left the army, constipated and rheumatic. To-day, he is fit and nimble—a merry, romping granddad, 61 years young.

"I came out of the army with rheumatism," he writes. "It was especially bad in my feet. I started taking Kruschen Salts, and in a few months I found relief from my rheumatism. I became nimble on my feet. Now, at 61—weighing 168—I am cheerful, energetic, and always ready to play with my grandchildren."—F.E.B.

Many people grow old long before their time because they neglect one vital ned of health—the need for internal cleanliness. Eventually, they adopt the healthy Kruschen habit. Then, probably for the first time in their lives, they start getting rid every day of waste material from the system. The result is renewed health and vigour. Ailments due to a clogged system vanish, youth returns, and life becomes really worth living.

What Science is Doing

VITAMIN B-1 ENDS PAIN

A new vitamin treatment to eliminate the pain of severe neuralgia of the face has been announced to the U.S. National Academy of Sciences.

The vitamin used is "B-One", the anti-neuritis factor in food. Its lack results in the development of beri-beri and other nerve degeneration diseases.

MEASURE STAR SPEED

An adaptation of the old-fashioned stereopticon is giving science a new instrument for measuring the speed of stars billions of miles away.

By twisting two prisms, or wedges of glass used to break up light into its component colors, it is possible to determine stellar velocities more accurately than heretofore.

CURE FOR PELLAGRA

Nicotine acid, newest of vitamins, a chemical relative of nicotine, can be had from your meat market, it was announced to the American Institute of Nutrition.

Lack of this vitamin causes pellagra, with an estimated 1,000,000 victims in the United States alone, a disease so dreadful in final stages that it runs into insanity.

The richest sources are liver, kidney, lean muscle, brains, yeast and heart meats. Probably an ounce or two of liver a day would give a man all he needs. Kidney is almost equally rich.

Have You Heard ?

An exploration party in the hinterland of Brazil reached a point some hundred miles from Iquitos after a fortnight's hard going, and were unfortunate enough to strike an area of dense jungle and steaming swamps.

During the usual afternoon rest near one of these, one member of the party noticed another pacing up and down, a worried look on his face. He stopped him and asked what was wrong.

"You know," he replied, seriously, "I keep thinking to-day's Thursday!"

A smart man is one who hasn't let a woman pin anything on him since he was a baby.—Winnipeg Free Press.

An inmate of the asylum who was pushing a wheelbarrow upside down was stopped by a visitor who asked: "What's the idea?"

"I'm not crazy," was the retort. "Yesterday they filled it with bricks."

He mumbled a few words in church
And he was married.
He mumbled a fed words in his sleep
And he was divorced.

An Englishman and a Frenchman were arguing over whose country owned the finer navy. They asked the old Irishman in the corner to settle the argument.

"The Irish have the best navy," he said.

"In Heaven's name, where is the Irish navy?" said the other two.

"And what a fool I'd be telling you when you might be a couple of spies," said the Irishman.

"Fifteen minutes after putting on a pair of socks I made a hole in one," wrote an enthusiastic golfer to the sock manufacturer.

Weather Tips By Telephone

New Yorkers anxious to know what the weather is likely to be like and too impatient to wait and see, may dial Weather 6-1212 and hear a phonograph record announce "rain and colder, northeasterly winds, rain and colder, northeasterly winds, rain and cold —" click!

Government forecasts are supplied four or more times daily to the company and an operator records them, the phonograph playing records continuously.

Modern Etiquette

BY ROBERTA LEE

1.—Is it absolutely required that a person give the reason for declining an invitation?

2.—Is it proper for a man to smoke a pipe at some formal affair?

3.—Who usually acts as hostess when a woman's club gives a luncheon party?

4.—When a woman is either standing or seated, talking with a man, and drops her handkerchief, glove, or some such article, and the man does not notice it, should she pick it up?

5.—When the guests at a dinner are few in number, and they are all intimate friends, would it be all right for the place cards to bear only their first names, Mary, Elizabeth, Helen, etc.?

6.—May wedding announcements be mailed a week before the wedding?

Answers

1.—It is not obligatory that one do so, but unless it is a very intimate reason, one should explain why, and with regret. Otherwise the hostess might resent a curt "Sorry I cannot accept." 2.—This is sometimes done, but it cannot be called good form. 3.—The president of the club. 4.—No; merely say, "I believe I dropped my handkerchief." 5.—Yes, when all the guests are close friends. 6.—No; they should be mailed immediately after the wedding.

"INSIDE INFORMATION"

For Indigestion or CONSTIPATION CLEANSE INTERNALLY the tea-cup way. Garfield Tea acts promptly, pleasantly, MILDLY. Not a cure-all, but certainly effective in relieving constipation. At drug-stores—25c and 10c.

Farm Forum

(Conducted by Professor Henry G. Bell of the Ontario Agricultural College, Guelph, with the co-operation of the various departments of the O. A. C.)

QUESTIONS AND ANSWERS

1. I have a lawn that does not look healthy. It has some bare places, and does not get green as early as some others in this locality. Can you suggest early care that I should give it? What special treatment should I give my flowering shrubs to get the best show of color?—J. E. C. Middlesex Co.

LAWN IMPROVEMENT.

In the Spring as soon as possible lawns should be raked and rubbish removed. Rolling should follow if at all possible, but not with an extremely heavy roller except on sandy soils. To help the grass, fertilizer such as Ammonium Sulphate, 1 to 2 ounces to the square yard, mixed with fine earth, sand, or better still leaf mould from the woods, should be spread over the surface somewhat lightly. Or instead of Ammonium Sulphate a complete fertilizer of almost any form can be used either with or without soil. Should bare patches exist new seed should be sown such as Kentucky Blue and Redtop in about equal quantities at the rate of ¾ lb. to the square rod. In about one month or six weeks' time the Ammonium Sulphate and soil treatment can be repeated.

When dry, hot weather is apporaching and during such, if at all possible, the lawn should have a thorough soaking with water to prevent drying out of the soil. During warm, hot days it is not wise to have the grass cut too low—1½ inches is quite low.

2. Will you kindly tell me should lime be applied to the soil immediately previous to planting grain, hay or vegetables, or should it be applied subsequently? Is it advisable to use Lime in conjunction with fertilizers applied at the same time?—"H. N., Peterborough County."

Lime should never be mixed with fertilizers when applying fertilizer to grain, hay or vegetable crops. Mixing Lime with fertilizers tends to revert the Available Phosphoric Acid, or to undo the fertilizer manufacturer's efforts to supply you with soluble foms of Phosphoric Acid. Lime can be supplied at any time during the growth of the crop. It should not be applied without first testing the soil to see if Lime is necesary. If the soil is already Neutral or Alkaline, the addition of Lime will do absolutely no good.

HARNESS AND COLLARS

Farmers Attention — Spring is nearly here. Consult your nearest Harness Shop about Staco Harness Supplies. We sell our goods only through your local Staco Leather Goods dealer. The goods are right, and so are our prices. We manufacture in our factories—Harness, Horse Collars, Sweat Pads, Horse Blankets, and Leather Travelling Goods.
