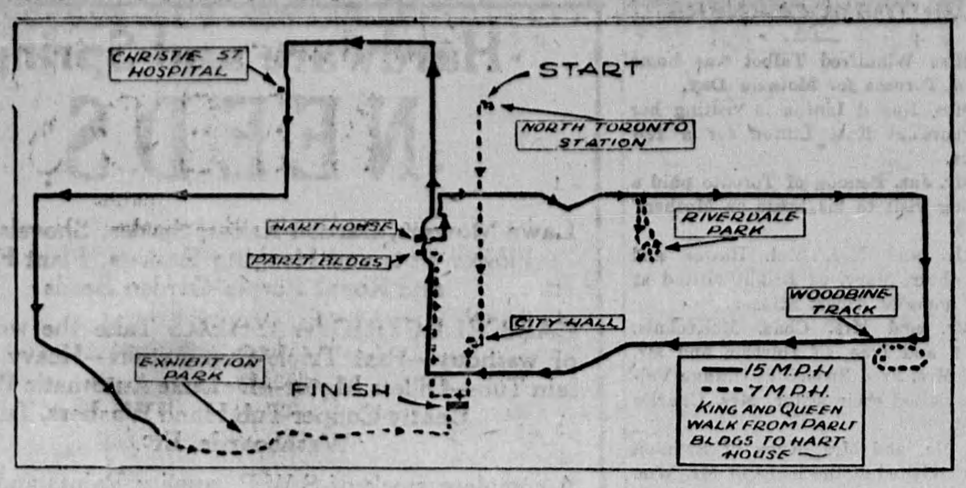
Route the King and Queen Will Take Through Toronto



Following release of various plans and counterplans for the royal visit to Toronto on May 22, the final route for their majesties' trip through the city is announced as shown on the map. Complete details of every moment of the royal visit to Toronto have also been released, even to the speed of the entourage through city streets, which will vary between seven and 15 miles an hour.

Have You Heard ?

Tigers had been ravaging a village and the terror-stricken natives sent for the nearest white man to assist them.

This man was a crack shot and had never been known to miss. His method was to tie a goat to the foot of a tree at dusk, climb the tree, and when the tigers came for the goat, fire at the flash of their eyes. In the morning they would be found dead, shot straight between the eyes.

He followed his usual procedure the first night, but although he fired several shots, when day dawned the goat had gone and there were no dead tigers.

This happened on two succeeding nights. Perturbed, he took a huge torch with him on the fourth night and instead of firing at the flashing eyes, switched on his big torch, and saw, to his amazement, six tigers advancing in pairs each with one eyes shut!

"Good card players have inscrutable features," says a writer. There is always trouble if it is noticed that they are wearing their hearts up their sleeves.

"I suppose you carry a memento of some sort in that locket?" said one woman to another.

"Yes, a lock of my husband's hair."

"But your husband is alive."

"Sure; but his hair is gone."

"Would you like anything else with your dinner, sir?"

"Yes, that little blonde sitting in the corner over there."

Three slightly deaf men were motoring from the north to London in an old noisy car, and hearing was difficult.

As they were nearing London, one asked: "Is this Wembly?"

"No," replied the second, "this is Thursday."

"So am I," put in the third. "So let's stop and have one."

What Science is Doing

TREE RINGS IDEA UPSET

It is now found that telling the age of a tree by the number of its rings is like trying to tell a woman's age by her looks.

The discovery upsets one of man's oldest beliefs that trees put on one ring each year. They are visible when the trunk of a tree is sawed in two.

Trees were discovered in Texas that put on five a year. Hardly any were found that failed to add at least two anually.

TO SOBER UP DRUNKS

To sober up quickly when dead drunk, take an intravenous injection of insulin and of glucose. Discovery that these two "shots" will quickly reduce the alcohol in the blood was reported by Walter Goldfarb, Karl M. Bowman and Samuel Parker, of Bellevue and Kings County Hospitals, New York City.

They tried it on drunks brought to the hospital. The shots convert the alcohol into water and carbon dioxide.

WOULD BANISH ALL PAIN

Medical research workers have discovered a new anaesthetic which they believe will abolish pain all over the body.

The theory is that when body cells are injured they release a powerful substance known as histamine. This substance, it is thought, activates the endings of the nerves which carry pain sensations to and from the brain. The new anaesthetic called thymoxyethyldietlylamine, neutralizes the histamine and so no pain messages are sent to the brain.

MINARD'S GREAT CANADIAN PUBBING LINIMENT

MINARD'S LINIMENT

Modern Etiquette

BY ROBERTA LEE

1. When a young man has been introduced to a girl, and likes her very much, is it all right for him to ask permission to call on her?

2. Isn't it a friendly gesture to hold a person's hand, or place a hand on his arm, while talking with him?

3. What would be a good toast for a host to offer to a guest?

4. Should a business letter always be signed personally by some member of the firm, or is a typewritten signature sufficient?

5. Is it correct to refer to draperies as "drapes"?

6. When a man takes a woman in to dinner, should be offer her his right arm or his left?

Answers

1. Yes, after he has been in her company for a reasonable time, but not within the first twenty or thirty minutes. 2. It may be a friendly gesture, but it is very annoying to some people and should be avoided. 3. "To our guest, and our only request is that he be our guest often." 4. Every letter should be signed with pen and ink. 5. No; say "draperies." One might as well refer to curtains as "curts." 6. He should offer his right arm.

How Can I?

BY ANNE ASHLEY

Q.—How can I make a good soap substitute for washing ribbons, and also delicate woollen goods?

A.—Some people claim that two or three potatoes grated into a pan of water will give even better results than soap for this purpose.

Q.—How can I prevent eggs from breaking or sticking to the pan when poaching?

A.—Put a few drops of vinegar into the water. Another method is to grease the pan before putting the water into it.

Q.—What is a good tonic for plants?

A.—The water in which beef has been washed is an excellent tonic treatment for plants, especially for roses and geraniums.

Q.—How can I restore the nap of velvet?

A.—Hold the wrong side of the velvet over a boiling kettle, or rub it across the bottom of a hot flat iron which has been turned upside down.

Q.—How can I soften hard water?

A.—There are several agents that may be used for softening hard water. Among them are lemon juice, borax, or an oatmeal bag.

Q.—How can I increase my weight?

A.—It is said that a wineglass of cream taken after each meal will increase the weight.

SCOUTING

The Boy Scouts of Canada are all ready to play their important part during the visit of Their Majesties King George VI and Queen Elizabeth. At the various stopping places of the royal tour they will assist in lining the streets, and in traffic control. In the larger centres they will maintain mobile first aid units, and will operate lost children bureaus and rest rooms. On incoming highways they will co-operate in the staffing of information booths for the benefit of motorists.

On May 20, the King's official birthday, the Scouts will give the leadership across Canada in the celebration of the day by burning a chain of beacons, accompanied by fireworks, in the evening, as was done so successfully to mark the King's Coronation in 1937.

As a unique international demonstration of Scout neighborliness, during the day, May 20, Canadian and American Scouts will meet at various points along the boundary line, from the Atlantic to the Pacific, for a goodwill ceremony, and the planting of "King's Birthday Trees." Notable gatherings are expected on the historic Niagara border, and at Windsor and Detroit.

As a result of the outstanding success of the recent Toronto Scout Cyclorama—a fair of booths representing over 100 educational features of the Scout training—held in the Canadian National Exhibition Coliseum and adjoining arena, C.N.E. officials discussed the posibility of the Scout show being made a feature of the great fall fair. The Cyclorama was attended by crowds reminding of big days of the "Ex."

One of the features of the Scout Cyclorama was a long street of hobby work by Wolf Cubs and Scouts, displaying literally thousands of items, from art work to airplanes of every known model, and appetizing examples of the culinary efforts of young camp cooks.

GARDENING

CULTIVATION

Aside from the planning and planting, no early job compares with cultivation. Authorities do not ask one to keep the hoe going all Summer, far from it. But they do request that the garden be dug once thoroughly first thing in the Spring, then cultivated once or twice afterwards. With proper tools the work need be no more than healthy exercise. For the purpose, there is nothing better than a little three or five fingered cultivator or a Dutch hoe. Either of these implements will make short work of a vegetable or flower garden. Cultivation serves a double purpose, it keeps down weeds and it conserves moisture.

STONE WALKS

Particularly in the smaller garden where visitors and children soon wear grass thin along the edges of flower beds or between the house and the swing or arbor, regular paths are of very practical value. With a little care they will add beauty to the rest of the garden, too. Most pleasing material of all for this purpose is flagstones. These are broad, flat, thin slabs of any soft stone, usually found in abundance around certain river beds.

They are sunk flush with the ground so that the lawnmower will run over them, and at least an inch and a half of grass left between edges. Sometimes a little sand is placed under the stone for drainage.

Other walk materials are sand, cinder or brick.

WHEN TRANSPLANTING

Experts point out that the secret of successful transplanting is plenty of water, when the job is done and for a week or so afterwards. Of next importance will be shade and stimulant. Moving a plant is something like an operation for a human being, and the larger the specimen the more necessary the attention. With shrubbery and trees often main roots are cut and the shock is severe.

"WORTH COMING OVER FOR!"

Dixie is a grand smoke any way you take it. The tobacco stays fresh and flavourful until you cut it off the plug—and every pipeful lasts longer.

PLUG SMOKING TOBACCO

Eskimos Thrive Without Worry

Because they don't worry about rent, war scares and "age phychology, Eskimos rarely suffer heart disease, blood presure or cancer," Dr. Victor E. Levine, professor of biological chemistry and nutrition of Creighton University Medical School, Omaha, Neb., said in an interview last week.

Dr. Levine declared Eskimos don't keep track of their ages and never celebrate birthdays—"That's why they are young till they die."
