WAR MOVEMENTS.

THE GERMANIC CONFEDERATION.

FRANKFORT-ON-THE-MAIN.—An extraordinary sitting of the Federal Diet was held yesterday, at which the Austrian Ambassador explained the reasons which had induced the Emperor to order the advance of his troops into Sardinia.

The Austrian Ambassador's communication was then submitted by the Diet to the committee for the management of military affairs.

AUSTRIA.

TRIESTE, May 3.—No Sardinian mails have arrived at Venice since the 25th, or at Trieste since the 28th of April last.

The Archduchess Charlotte has left for Innspruck.

THE WAR IN ITALY.

The following telegraphic despatches have been received in London:—

TRIESTE, May 2.—The town of Trieste, with the surrounding territory, and the districts of Pisino and Goriza, have been declared in a state of seige.

According to advices from Venice to the 30th ult., General Gyulai has already assumed the functions of Governor General, in the place of the Archduke Maximilian. Venice and Verona have been declared in a state of siege.

The Hereditary Prince of Tuscany has arrived at Venice.

Advices had been received from Milan to the 30th ult.

The official Gazette contains a proclamation addressed by General Gyulai to the Lombardo population, to whom it guarantees 'liberty, honor, security of property, maintenance of the laws, and protection.'

PARMA.

PARIS, May 3.—The Moniteur of to-day contains the following telegram:—

"PARMA, Sunday Evening, May 1.—A public manifestation was yesterday made by the populace before the Royal Palace. The officers, in the name of the army, demanded the union of their troops with the Piedmontese forces.

"The Duchess quitted Parma, after having appointed a Council of Regency composed of her Ministers. The Princes have also left this morning.

"Public order has not been disturbed."

SARDINIA.

TURIN, May 2.—General Gyulai has imposed on the town of Novara the demand of a heavy contribution of provisions and forage, under pain, in case of non-compliance, of a fine of five times the value of the supply required.

The Austrians have occupied Vercelli.

PRUSSIA.

Berlin, May 2.—In to-day's sitting of the Chamber of Deputies the Minister of War made the following statement:—

'Government on the 28th of March last explained the point of the view which persuaded them to the necessity of ordering three corps d'armee of the Federal Contingent to be placed on a war footing. Since that date political affairs have assumed such a form that government have deemed it their duty to extend the same measures to the remaining six corps d'armee, and the necessary instructions have been already sent to the different quarters. Although government have for the present communicated this intelligence to the Chambers, they have reserved a more detailed statement of the position of political affairs, which will, however, be made to the House with the shortest possible delay.'

The Minister's speech was followed by the applause of the Chambers.

THE MARCH OF THE FRENCH ARMY OVER THE ALPS, AS DESCRIBED BY AN EYE WITNESS.

A writer in the London Times gives the following interesting description of the French army met by him crossing the Alps:—

On the evening of the 26th I crossed Mount Cenis, where there were reports of slaughter, the previous evening, of a large portion of the Sardinian army by the Austrians, and of the rapid advance of the latter upon Turin. These reports were contradicted when I reached Susa, the morning of the 27th; indeed, it appeared to be generally doubted whether the Austrians had as yet crossed the Ticino in any force.

I found at that town the advanced guard of the French army—some 2000 men—consisting of Chasseurs de Vincennes and infantry of the line—ready to be pushed on by rail to Turin. Tickets were only issued to passengers for the 6 o'clock evening train. The same day, as I recrossed Mont Cenis I met two battalions of infantry; and again, on the 28th, I passed, at different stages of the route, between Lanslebourg on the Savoy side of the mountain, and Culoz on the French frontier, not less than 17,000 troops,—including three regiments of light and one of heavy cavalry, a large body of Chasseurs, and 16 brass field pieces; three regiments of infantry were marching briskly along the line of rail within a few miles of each other, while others were being conveyed in the train.

I was struck with the disproportion both of cavalry and artillery to the whole of the above-mentioned force,—as the road from St. Jean Maurienne, where the railway terminates, to the foot of the Cenis Pass, is excellent. 60,000 is said to be the number of troops about to be transported along this route. The guns were all rifled, quite new, and very light, drawn by four horses, which appeared to my eye to want a little more blood. The cavalry were well mounted, and the infantry had the appearance of being admirably efficient, both in discipline and condition—active, sturdy little fellows.

Although only on the outset of a campaign, every man looked as if he had passed every moment of his existence in the field—healthy, skilful and self-relying. The truth of the matter is, that scarcely a day passes in garrison that the French soldier is not compelled to leave off to go through the bayonet exercise with his comrades until his eye is quickened, his limbs strengthened, and he has become thorough master of his weapon.

GREAT BRITAIN.

The London Times of May 4, gives the following picture of the domestic condition of Great Britain:

In home affairs the prospect is equally cheering. The Ministerial reform bill, which had one principle when first introduced, and three when rejected, has now settled down at two—the increase of the constituent body and the redistribution of seats, things of which everybody must approve. Not a word is said of those unpopular parts of the measure to which it notoriously owed its rejection; and, having disposed of this knotty subject with so little trouble, Mr. Disraeli waxes confident as to the future.

In the first place, the general election is not over, and therefore there is yet room for conjecture. In the next place Government have gained some seats, though this advantage is at present so trivial that even Mr. Disraeli feels he cannot count much upon it. Lastly, government has received, it appears, communication from persons who are not formal, but very substantial, adherents, and willing, to support them in a moment of difficulty like the present. One of the objects for which we were told the dissolution took place was that we might be delivered from this system of political almanac-giving, but that hope, at any rate, seems to be given up.

First, government were to be spared because they were in a minority, and could offer no assurance; then, because they, and they only, were able to preserve the peace of Europe; and now, after that peace has, under their direction and guidance, been scattered to the winds, because they are the people who can put an end to the war. If so, we may as well make up our minds at once to treat the present regime as fixed and indestructible

Lord John Russel on the other hand, anticipates that Lord Derby will gain no strength by the present election; and Mr Sidney Herbert considers that the result contemplated by the tory party is that the Opposition is to dictate legislation, and prevent Parliament so to mold the affairs. Gentlemen, he says, are canvassing the country pledging themselves to the details of Lord John Russell's bill, and at the same time announcing their intention to give an independent support to Lord Derby's government.

These hybrid politicians are, we presume, the persons to whom Mr. Disraeli alludes as having made him offers of support, but he will find that all the support that he can get in this quarter has been carried to his credit already, and that, without reference to their liberal professions, such gentlemen, are uniformly counted for what they undoubtedly are—safe supporters of the Derby Ministry. Between these two contradictory estimates a very few days will decide.

We know enough already to be sure that a Parliamentary majority is quite out of Lord Derby's reach, so that he has already failed in one of the avowed objects of the dissolution. That he will obtain some increase in numbers we do not doubt, though even from this considerable deduction must be made, because among the Liberals who have been unseated are to be found some of the keenest opponents of every possible liberal Government.

The great battle was, as we have said, virtually decided in the elections for the boroughs, and we are disposed to think that neither the present aspect of European affairs, the returns that have hitherto been made, nor the elections which are yet undecided, give any ground for the hope which Mr. Disraeli and Lord Stanley have so confidently expressed, that we shall ever see again in the House of Commons a Tory party consisting of upwards of three hundred members.

TYLER DEMANDED BY THE CANADIAN GOVERNMENT.—The Detroit Advertiser of Saturday says that a telegraph dispatch received the day before yesterday from Washington, states that Deputy Marshal Tyler has been demanded by the Canadian authorities, to stand his trial for the murder of Capt. Jones. This will tend still further to complicate the circumstances which surround him.

Tyler yet remains in jail at St. Clair. A record of the proceedings at the St. Clair Circuit has been filed in the Supreme Court, and argument on the questions reserved for the opinion of the latter tribunal will be heard at its present term.

So far as points of law are concerned, the case has assumed greater importance than at any previous period, and the result will be looked for with very general interest.

Perry Davis' Vegetable Pain Killer is deservedly the most popular family medicine known; no other remedy has been so successful in relieving all kinds of pain. Where other medicines have failed, it has often effected a speedy and complete cure. Sold by druggists generally. 117

PHONOGRAPHY.—"I have always regarded Phonography as an important addition to the educational branches taught in our schools, and I sincerely hope every young man in our community may have an opportunity of learning it."—James S. Wallace, Editor of the Daily Sun. 117

DEAFNESS & SINGING NOISES IN THE EARS, NERVOUS HEAD & MIND COMPLAINTS. AN ENGLISH CERTAIN AND INFALLIBLE CURE. British and Foreign Infirmary for the cure of Deafness, Head and Mind Complaints, 32, Spring Gardens, Charing Cross, London England. Consulting Surgeon, CHARLES HENRY ROGELL SKINNER, Esq. Registered Pursuant to Act of Parliament. Secretary JOHN POWELL, Esq. A new Discovery, being a positive method of self-cure, affording instant and magical relief to sufferers who may have been deaf for 40 or 50 years, by means of a compound medicated vapour applied to the external Ear. When the vapour is passing out, it is held by the sufferer for one minute to the ear affected, and instantly the Patient, who previously was deaf, is enabled to hear common tones of conversation. A few nights use in a similar way will guarantee to cure the most inveterate case of Deafness and Noises in the Head. It is a step to Empiricism and exhorbitant fees. Sufferers extremely deaf, by means of this, can permanently cure themselves, in any distant part of the world, without pain. Thousands have been restored to perfect hearing, and for ever rescued from the snares of the numerous dangerous unqualified pretenders of the present day. Hospital and private testimonials and certificates from the most eminent Physicians and Surgeons in England, to whose presence deaf persons have been cured, and many hundreds of private patients cured can be seen or referred to. Any sufferer on the Continent, or resident in any of the Four Quarters of the Globe, can now be cured, as this discovery can be sent to them with necessary Prescriptions, Preparations, &c. that will enable them positively to cure themselves. £5 5s. is the cost of the means of cure, which must be sent to the Secretary John Powell, Esq., 32, Spring Gardens, Charing Cross, London, England; it can be sent either by Banker's Draft, payable in England, or Notes of the Country. Sufficient to cure 3 cases of most inveterate Deafness and Noises in the Head £10 10s. 1y d&w

The Great Wonder of the Nineteenth Century,

PROFESSOR WOOD'S HAIR RESTORATIVE

Says the St. Louis, (Mo.) Democrat: Below we publish a letter to Dr. Wood, of this city, from a gentleman in Maine, which speaks glowingly of the superior merits of his hair tonic. Such evidence must have its effect, when coming from a reliable source. If certificates are guarantees of truth, the Dr. needs no encomiums, nor unless puffery from the press:

Bath, Maine, Jan. 20, 1858.

Prof. O. J. Wood & Co:

Gentlemen: Having my attention called a few months since to the highly beneficial effects of your hair restorative, I was induced to make application of it upon my own hair, which had become quite gray, probably one third white; my whiskers were of same character. Some three months since I procured a bottle of your hair restorative, and used it. I soon found it was proving what I had wished. I used it about twice a week. I have since procured another bottle, of which I have used some. I can now certify to the world that the gray or white hair has totally disappeared, both on my head and face, and my hair has resumed its natural color, and I believe more soft and glossy than it has been before for twenty-five years. I am now fifty years old; my good wife at the age of fifty-two, has used it with the same effect.

The above notice I deem due to you for your valuable discovery. I am assured that whoever will rightly use it, as per directions, will not occasion to contradict my statements. I am a citizen of this city and a resident here for the last fifteen years, and am known to every one here and adjoining towns. Any use you may make of the above, with my name attached, is at your service, as I wish to preserve the beauties of nature in others as well as myself. I am, truly yours,

A. C. RAYMOND.

Baltimore, Jan. 23, 1858.

WOOD'S HAIR RESTORATIVE

Profes or Wood—Dear Sir: Having had the misfortune to lose the best portion of my hair, from the effects of the yellow fever, in New Orleans in 1851, I was induced to make a trial of your preparation, and found it to answer as the very thing needed. My hair is now thick and glossy, and no words can express my obligations to you in giving to the afflicted such a treasure.

FINLEY JOHNSTON,

The undersigned, Rev. J. K. Bragg, is a minister in regular standing, and pastor of the Orthodox Church at Brookfield, Mass. He is a gentleman of great influence and universally beloved.

WM. DYER.

Brookfield, Jan. 12, 1858.

Professor Wood—Dear Sir: Having made trial of your Hair Restorative, it gives me pleasure to say, that its effect has been excellent in removing inflammation, dandruff and a constant tendency to itching with which I have been troubled from my childhood; and has also restored my hair, which was becoming gray, to its original color. I have used no other article with anything like the same pleasure or profit.

Yours truly, J. K. BRAGG.

The Restorative is put up in bottles of 3 sizes, viz: large, medium and small; the small holds half a pint, and retails for one dollar per bottle; the medium holds at least twenty per cent more in proportion than the small, retails for two dollars a bottle; the large holds a quart, 50 per cent more in proportion, and retails for $3 a bottle.

O. J. WOOD & CO. Proprietors, 313, Broadway, New York, (in the great N. Y. Wire Railing Establishment,) and 114 Market St., St. Louis, Mo.

And sold by all good Druggists and Fancy Goods Dealers. 1m-324dw

A new, speedy, and most successful mode of treating Spermatorrhœa, Nervous Debility, and all Urino Genital Diseases.

Seventy Engravings. Price 1s through all Booksellers, or post free from the Author, for 14 postage stamps

THE MEDICAL ADVISER on decay, both mental and physical, arising from excesses, infection, climate, &c.; remarks on the use of the Microscope, and the devices of certain quacks to alarm the too sensitive invalid; observations on Marriage, the prevention and removal of certain disqualifications, rules for self treatment, &c. By Walter De Ross, M. D., of the Ecole de Medecine, Paris; Member of the Royal College of Surgeons London; Licentiate in Midwifery, &c., &c., &c., 10 Berners-street, Oxford-street, London. Hours for personal consultation daily from 7 till 4, Sunday excepted.

Sold in Dublin by Beary, 162 Great Britain street; Edinburgh, Robinson, 11 Greenside st; Glasgow, Love, Bookseller, and by all the Agents

From long practical observation of the treatment pursued in the various Institutions of London and Paris for those diseases referred to in the above work, the Author has had somewhat unusual facilities for acquiring that accuracy of diagnosis, and uniform success, which has characterised his practice for so many years in this country, in which the lamentable neglect of these diseases by medical men generally, and their futile attempts to cure by mercury, copaiba, sarsaparilla, &c., have produced most distressing results. Lasting benefit in such cases can only be reasonably expected at the hands of the legally qualified medical man who devotes his chief attention to their removal, and to him only who can show his possession of the necessary qualifications, can confidence be safely extended. Dr. D'R. refers with pride to the numbers he has been instrumental in restoring to health and happiness, and to those who may be in need of such aid he offers every assurance of speedy restoration.

Persons residing abroad can be successfully treated by correspondence, on sending a full detail of their case, with a Bank note, or Bill on a London house for £5, in order to have a packet of medicine sufficient to meet the exigencies of the case, sent out by next mail, thus avoiding unnecessary loss of valuable time, and much suffering which might otherwise occur.

The Great European Remedy for Nervousness, Relaxation and Exhaustion. Protected by Royal Letters Patent of England, and sanctioned by all the great Continental Colleges of Medicine.

DR. DE ROSS' GUTTÆVITÆ; or LIFE DROPS, are the great remedy for Spermatorrhœa, Exhaustion, Nervousness, Debility, Aversion to and Incapacity for Society, Study or Business, Shaking of the Hands and Limbs, Indigestion, Flatulence, Shortness of Breath, Asthma, Consumptive Habits, Dimness of Sight, Dizziness, Pains in the Head, Eruptions, Sore Throat, Pains in the Bones and all those diseases for which mercury, sarsaparilla &c., are too often employed to the utter destruction of health. Their almost marvellous powers must be felt to be believed. Hundreds of apparently hopeless cases have been cured and thousands almost miraculously relieved, when everything else had failed; and they must sooner or later supersede all those questionable remedies which have hitherto been the sole reliance of English medical men

Price 11s, and four times the quantity at 33s per bottle of the Agents below. The £5 packages containing twelve 11s quantities (by which £1 19s. are saved) will be sent from the Establishment only, on receipt of the amount, per draft on a London house or otherwise.

CAUTION.—Sufferers must guard against the recommendation of spurious or other medicines by unprincipled vendors, who thereby obtain a larger profit. The words "Walter De Ross, London, are printed in white letters on the Stamp affixed to the above, by order of Her Majesty's Honorable Commissioners to protect the public against fraud as without this none can be genuine, and to imitate which is felony.

Palns in the Back Gravel, Lumbago, Rheumatism, Gout, Disease of the Kidneys and Bladder, Stricture, &c.

DR DE ROOS' COMPOUND RENAL PILLS are a well known safe and speedy remedy for the above dangerous complaints, Discharges, and Diseases of the Kidneys and Urinary Organs generally. Possessing tonic properties, they agree with the most delicate stomach, improve the health and in three days effect a cure when copaiba, cubeba, and all such dangerous medicines have utterly failed. 2s 8d, 4s 6d, 11s and 33s per box, of the Agents below, or post free on receipt of the amount by Dr. DE ROOS, 10, Berners Street, Oxford Street, London.

The superiority of these celebrated Pills over every thing of the kind is universally acknowledged and the extraordinary demand for them without precedent.

Many there are, who from natural diffidence, or fear of discovery, would silently pray their affections rather than apply for aid to those from whom they may reasonably expect relief. With the above Pills the sufferer may, without the knowledge of a second person, cure himself speedily, privately, and at the least possible expense

Sold at Langley's Drug Store, Hollis-street, Halifax Nova Scotia; by Huszard Charlottetown, Prince Edward Island; Ward, News Office, Sidney, Cape Breton; Ashton Richardson & Co., Mount Hope Madras; Hulse & Nephew, Agra; Treuttler & Co., Poonah and Kurzchee; Smith & Co., Clark, Romer & Co., Scinde; Dinsworth & Co., Clark, Romer, & Co., and Gawin & Co., Colombo and Candy; Ellman & Co., Montreal; Pestonjee & Co., 1, Military Square, Bombay; R. Ross Lambray, Falmouth and Lawton Advertiser Office, Kingston, Jamaica; Beichmann & Tatt, Port of Spain, Trinidad; Hyggin Weekly Register Office, Antigua; Hayslock, Belize, Honduras; E. H. Parker & Co., Kingston, Canada; Strickland & Co., Mobile, Alabama; Stamps, Constantinople; Paisey & Fryer, 384, George st, Sidney and Ford Chemist Swanston street, Melbourne Australia, of whom also may be had 'THE MEDICAL ADVISER,' or should difficulty arise in procuring any of the above, enclose the amount by draft or otherwise to 10, Berners Street, Oxford street London, and they will be securely packed per return. 70

UNIVERSITY OF TORONTO

THE Annual Convocation for admitting to Matriculation and conferring Degrees will be held on FRIDAY, JUNE 3d.

Every Student intending to present himself at the above Examination must send in to the Registrar, at least three weeks before the commencement of the examination, a notice, according to a printed form which can be obtained from the Registrar, of his intention so to present himself.

Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S

Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this every where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as ERUPTIVE and SKIN DISEASES, ST. ANTHONY'S FIRE, ROSE, or ERYSIPELAS, PIMPLES, PUSTULES, BOTCHES, BLAINS and BOILS, TUMORS, TETTER and SALT RHEUM, SCALD HEAD, RINGWORM, RHEUMATISM, SYPHILITIC and MERCURIAL DISEASES, DROPSY, DYSPEPSIA, DEBILITY, and, indeed, ALL COMPLAINTS ARISING FROM VITIATED OR IMPURE BLOOD. The popular belief in "*impurity of the blood*" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSIC,

are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties search, and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and healing.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanac, containing certificates of their cures and directions for their use in the following complaints: *Costiveness, Heartburn, Headache arising from disordered Stomach, Nausea, Indigestion, Pain in and Morbid Inaction of the Bowels, Flatulency, Loss of Appetite, Jaundice*, and other kindred complaints arising from a low state of the body or obstruction of its functions.

Ayer's Cherry Pectoral,

FOR THE RAPID CURE OF

Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease.

So wide is the field of its usefulness and so numerous are the cases of its cures, that almost every section of country abounds in persons positively known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.

PREPARED BY

DR. J. C. AYER & CO.

LOWELL, MASS.

All the [illegible] and all Dealers in Medicine everywhere.

NORTHROP & MOSES,

Newcastle,

General Agents for Canada West.

$25,000 TO THE MOUNT VERNON FUND.

We propose to the medical faculty and manufacturers of medicine throughout the United States, to raise the sum of twenty five thousand dollars for the benefit of the Mount Vernon Fund, by a trial of skill in the curative art under the following stipulations, and to which we pledge ourselves, heirs and assigns to be governed, and honestly discharge the same:

1. We propose to test the qualities, medicinal virtues and curative efficacies of our system of the treatment of disease with our Radway's Ready Relief (Regulating Pills) and Renovating Resolvent, against all other treatments or medicines employed for the cure of the sick, either under the supervision of physicians of the regular practice, or the medication of medicines manufactured as specialties, commonly called patent medicines, in a given number of cases; and if our Ready Relief, Resolvent, and Regulating Pills do not prove the most efficacious and successful in the treatment of the said diseases in which they are employed, and more speedily and effectually cure the patients than the medicines and treatment of our opponents, we will pay over to the Treasurer of the Mount Vernon Fund the sum of twenty-five thousand dollars, on or before the 1st day of January, 1860, on condition that those who accept our challenge will pay the same amount on or before the above date, if our remedies prove victorious in this trial of skill.

We invite all physicians within the United States, either in hospital or private practice, to compete with us, in testing their system of medicinal treatment, against the efficacies of our three remedies—the Ready Relief—Renovating Resolvent and Regulating Pills—and we give to any physician, who declines the trials, to be made in public—the privilege of selecting any hospital in New York, Boston, Philadelphia, Baltimore, Charleston, New Orleans, St. Louis, Cincinnati, or Chicago, in which said hospital one half of the patients are to be given over to our charge, and subject only to the treatment of such of our Three Remedies, as we may deem appropriate for the nature of the disease or sufferings, the remaining half to be under the charge only of any three physicians that may be selected for the same.

2. We invite all pill manufacturers to a test of the curative virtues of their pills against the medical efficacy of RADWAY'S REGULATING PILLS, in the treatment of all diseases for which they recommend their pills, as possessing superior and extraordinary virtues.

There are several spirited, liberal minded and skilful gentlemen, engaged in the manufacture and sale of pills, who have not only realized great wealth, but have been highly successful in curing the sick with their pills. The most successful and popular of these pills, however, are made after the recipe of a gentleman who flourished about 108 years since, and as medical science has progressed rapidly during the present century in other branches, we see no reason why a great revolution and improvement should not take place in the manufacture of pills.

For ourselves, we know that we have made the greatest improvement in the art of compounding pills, and that our Radway's Regulating Pills are the best, most perfect, thorough, mild and effected medicine, in the form of pills, known to the world, and as an evidence of its superiority, we most earnestly invite the learned, skilful and celebrated grandson of the noble patriarch of 1753, as well as other pill manufacturers, to a public test of their medicines against RADWAY'S REGULATING PILLS, pledging ourselves to use only half the number of our Regulating Pills to any disease, however severe, that are used by their opponents.

3. We invite and challenge physicians and all others to produce a lotion, liniment, or other preparation that will relieve or stop pain, and protect those exposed to the malicious influences of malaria against its effects, either in the form of fevers, cholera, dysentery, croup and other diseases, incidental to malarious persons, with the same speed and efficacy as RADWAY'S READY RELIEF. If there is a remedy in the known world that will ease mankind of the excruciating tortures of pain, either acute or inflammatory, or cause by external injuries or internal derangements, as speedily, effectually, and with as much safety to the general health of the system as Radway's Ready Relief, the public are entitled to the information; and if so proved on a fair trial, we will cheerfully withdraw our remedy and pay the forfeit.

4. We invite all physicians, laymen, and others, to produce a medicine for the effectual cure of chronic, scrofulous and constitutional disease against RADWAY'S RENOVATING RESOLVENT. We care not how long the disease may have been established in the system or through how many generations it may have run—whether the disease is bronchitis, consumption, ulcers, fever sores, scorbutic eruptions, fits, or any other disease transmissable from sire to son—we invite and challenge all inhaling physicians, homopathist, allopathist, and patent medicine manufacturers, to a trial of skill against our renovating Resolvent.

We do not deem it necessary to make an apology in publicly giving out this challenge. It is a well known fact that as a society there is nobody or class of men so illiberal in their sympathies and opinions in medical matters as that obnoxious clique that custom calls regular physicians.'

For these past ten years we have called in vain upon this medical oligarchy to give us a fair trial to test our remedies—in the hospitals and private practice under their supervision—and if our remedies were found worthy to receive their endorsements. As the completion of the Mount Vernon purchase is dear to every American citizen's heart, we make this offer to raise a fund of $25,000 by a trial of skill in the curative art. Other sciences have generously come forward and contributed their share to this glorious enterprise, and we see no reason why the medical fraternity should not make the sacrifice of a little of its false dignity, and test its right in the eye of the people to the position it assumes, and if after due trial, and strict examination it shall be found worthy to occupy its position over the theory we advocate and the treatment we practice with our Ready Relief, Renovating Resolvent and Regulating Pills, then this medical fraternity will have achieved the great and good work of securing to the Mount Vernon Fund the sum of $25,000.

RADWAY & CO.

8 162 Fulton st., New York.

FARMERS, READ THIS.

'The Farmer's Own Paper.'

THE GENESEE FARMER.

A Monthly Journal of Agriculture and Horticulture, (Established in 1831.)

PUBLISHED for Twenty-Eight Years in one of the finest wheat and fruit sections of America, it has attained an unrivalled circulation, and has able and experienced correspondents in every State of the Union and in the British Provinces.

Each volume contains Three Hundred & Eighty-four Pages, and is profusely illustrated with expensive wood cuts. It is sent to any address for FIFTY CENTS A YEAR!

In order to introduce the Farmer into districts where it has few readers, we will take subscriptions to the coming half volume (July to December inclusive) at the following rates. Single subscribers, 25 cents; five copies for $1, and a copy of our beautiful Horticultural Directory, prepared by mail to the person getting up the club; eight copies for $1.50, and a Rural Annual, prepared by mail, to the person getting up the club; sixteen copies for $3, and a Rural Annual and an extra copy of the Farmer for a year, or two for the half volume, to the person getting up the club.

We also offer a liberal list of CASH PREMIUMS as a still greater inducement to form clubs. Full particulars will be found in the paper, and every one interested in the culture of the soil is invited to send for a copy, and, if pleased with the paper, to act as agent. Specimen copies sent free to all applicants.

Belleville, March 1859. 1m-w-53

DR. M'LANE'S

CELEBRATED

VERMIFUGE

AND

LIVER PILLS.

WE beg leave to call the attention of the Trade, and more especially the Physicians of the country, to two of the most popular remedies now before the public. We refer to

Dr. Chas. M'Lane's Celebrated

Vermifuge and Liver Pills.

We do not recommend them as universal Cure-alls, but simply for what their name purports, viz.:

THE VERMIFUGE,

For expelling Worms from the human system. It has also been administered with the most satisfactory results to various Animals subject to Worms.

THE LIVER PILLS,

For the cure of LIVER COMPLAINTS, all BILIOUS DERANGEMENTS, SICK HEAD-ACHE, &c. In cases of

FEVER AND AGUE,

preparatory to or after taking Quinine, they almost invariably make a speedy and permanent cure.

As specifics for the above mentioned diseases, they are Unrivaled, and never known to fail when administered in accordance with the directions.

Their unprecedented popularity has induced the proprietors,

FLEMING BROTHERS,

PITTSBURGH, PA.

to dispose of their Drug business, in which they have been successfully engaged for the last Twenty Years, and they will now give their undivided time and attention to their manufacture. And being determined that Dr. M'Lane's Cel
