Aaron Birch had a successful barn raising on Monday last.

Edgar Donnelly had his ankle badly sprained, and received a general shaking up by a scaffold on which he was standing, while engaged at his cement work, giving way and giving him a nasty fall to the ground below. We hope for a speedy recovery.

Dundalk

Mr. Alfred Hutchinson of Mount Forest has purchased a ditching machine which he expects to use during the summer in the townships of Proton and Egremont. This should prove a great opportunity for the farmers in the vicinity of Dundalk, as it will enable them to overcome the question of labor, which is one of the great difficulties in connection with drainage work. The usual charges made by all machines are 35c. per rod for a 8 ft. ditch with other depths in proportion.

Thomas Brooks, section man on the C. P. R. here, met with a very painful accident the other day. While helping to unload ties from a car at Corbetton, a number of pieces fell from the pile onto his foot during the shunting of the car. The foot was badly bruised and some of the ligaments were torn. Mr. Brooks will be laid off duty for some time by the unfortunate mishap.

Wm. R. Morrow, of this place, who is employed with a bridge gang on the Muskoka branch of the C. P. R., had a very close call while on duty on Wednesday of last week at Severn Falls, near Bala. There is a sharp curve through a rock cut approaching the bridge on which the gang was at work and they did not notice the Winnipeg Express till it was almost on them. Mr. Morrow had the longest distance to run to safety. In trying to make the end of the bridge he stumbled and fell. His knee-cap was displaced and he was unable to go farther. As his last chance for life he lay on the track outside the steel rail, and let the train pass over him- Fortunately no projection from engine or cars touched him, and he is congratulating himself on his escape from death. His injury was attended to at Bala, and he arrived at his home here on Thursday. He moves around the house with the use of crutches.—Herald.

Mr. Elmer Budd, north of town, had an experience of a very unusual nature, and that might easily have been more disastrous. In fact the real wonder is that he escaped with as little injury as he did. He was driving along in a buggy and leading a horse behind. Mr. F. H. Silk was coming along in his automobile, and the led horse took a notion to get into the buggy with Mr. Budd, who just threw himself to one side in time to avoid having the animal on his head. As it was, the horse's front feet landed on Mr. Budd's legs, bruising them badly, and its hind feet found a resting place on the back of the rig. Mr. Budd lost no time in tumbling out of the buggy to safer surroundings. The vehicle was badly smashed and Mr. Budd is congratulating himself that he came off as safely as he did.—Shelburne Economist.

The Scientific American, summing up an article on the influence of the moon and planets on the weather, says: We have every reason to believe that neither the planets nor the moon can have any appreciable effect on the weather, because they furnish so little heat upon which all weather changes ultimately depend, and this belief is fully supported by weather records. The belief, still to be found in all countries, that the planets and the moon do affect the weather never had any scientific basis whatever; it is only a remnant of the many superstitions generated and fostered by that other and greater superstition, astrology.
