HAVE YOU HEARD?

A cannibal, walking through the jungle with a pretty black girl, was met by a missionary, who wished him the time of day and then asked: "Aren't you going to introduce me to the lady?"

"That's no lady," replied the cannibal. "That's my lunch."

—o—

"You have such lovely horses." Why don't you ride them?"

"Well, it's like this: at one end my horses bite, at the other end they kick, and in the middle they are too slippery."

—o—

An enthusiastic gardener was very proud of his crop of monster red currants. Several of his gardener friends, after admiring the fruit, advised him to send an exhibit to the local horticultural show. After considering the matter, he took the advice of his friends and sent a fine plate of the currants.

On judging being completed and the awards announced, the entrant was greatly disappointed to know that his red currants had only secured third prize. He found out afterwards that a mistake had been made. They had been placed in the tomato class.

—o—

First African Woman: "So your husband has left you again?"

Second African Woman: "Yes. He's up to his old treks."

—o—

Father and son were enjoying an afternoon in the country.

"Just fancy, William," said the father, pointing around him, "at one time these fields were covered by the sea, and fish were swimming about on the very spot where we stand."

"Yes, Dad," said little William, suddenly stooping. "Look, here's an empty salmon tin!"

—o—

"Mary, did I see that soldier's arm around you?"

"Oh, Mother, you know you should never discuss the movements of the troops."

—o—

"I have checked up almost '57 varieties' of places for a public speaker to park his hands," writes Dr. John F. Cowan. "In pockets—trousers, coat, vest; upper pockets, lower, rear; hung by thumbs or 'immersed'; hooked in vest armholes; clasped across tummy ditto back; wadding handkerchief and unwadding; clenching lapels of coat; pounding desk; brushing head; slapping (camouflaged) at flies; full-arm gesture, half-arm, finger; pointing at audience; twisting mustache; finger-tips together uplifted; fumbling papers; pulling down vest; snapping, and, when not otherwise emphasizing the truth, sawing imaginary wood in the air."

Telephone subscribers in Sao Paulo, Brazil, are listed in the Red Book under five classifications: name, street address, business or profession, post office box and automobile license number.

German Soldiers, Prisoners in Canada, March To Trains On Arrival Here

The heavy tramp of German boots echoed in the train sheds at Quebec as soldiers, airmen, parachutists and naval prisoners were loaded aboard the waiting trains, following their recent arrival upon our shores.

Modern Etiquette

BY ROBERTA LEE

1. When on vacation at a resort hotel, is it all right to speak to the persons who eat regularly at your table?

2. What salutation should one use in a formal social letter?

3. Is it customary to serve cream with after-dinner coffee?

4. When playing cards for a worth-while prize, and one's partner makes an inexcusable blunder, isn't one justified in showing a certain amount of irritability?

5. When a guest is refusing a certain dish that is passed, isn't it rude for this guest to say, "Beans (or whatever it is) do not agree with me"?

6. Is "Bye-bye" an acceptable form of taking leave?

Answers

1. Yes, by all means do so. Your vacation will not be nearly as enjoyable if you do not. 2. "My dear Mrs. Watson," or, "My dear Mr. Young." This is more formal than "Dear Mrs. Watson," and "Dear Mr. Young." 3. It is not customary to do so. 4. Never. A good sportsman is always self-possessed and patient. 5. Yes, it is both rude and unnecessary. In fact, the guest should take a small portion. 6. "Good-bye" is preferable.

Checkers In Braille

Mr. F. H. Merrick, a blind checkers player, has invented an improved Braille notation to describe the moves of the checkers in correspondence games. It has been published by the British National Institute for the Blind.

Electric Manure

Some plants, like rice and clover, obtain their nitrogen from the air, mainly through lightning. This has made soil experts experiment with electric fertilization. They are trying now to multiply the nitrogen content in the soil and stimulate the growth of bacteria by applying high-tension electric currents to their fields. Previous tests with water having a small nitrate content increased it by 800 per cent. In the fertiliznig experiments now in progress, a small plough is used to turn the soil, and the ordinary voltages used are stepped up to 15,000 volts. It is hoped that in time electric fertilization will eliminate expensive and tedious manuring.

HEALTH TOPICS

CAUSE OF INSOMNIA

It would seem that the matter of sleep and relaxation is now the subject of much thought and conversation because, during the last few years and at present, more and more individuals are finding it difficult to get "sufficient" sleep.

A study of the sleep habits of 50 women who had recovered from slight mental or behavior disturbances and who did not complain of insomnia, were observed for three months in an observation hospital and reported by Dr. Louis J. Karnosh, Cleveland, in the Journal of the American Medical Association.

The period of sleep varied from 6½ to 8 hours. Age, temperament and diet did not seem to influence the amount or degree of sleep.

"On the other hand, excitement due to visits by relatives, arguments or disagreements with other patients or atendants, and holidays with the emotion or excitement that occurs at these times, were definitely to blame for breaking the regular rhytnms of sleep."

Mentality "Can't Take It"

This shows that it is the nervous or mental side of us that just "can't take it," blows or disturbances and not so much the physical disturbances that prevent us from sleeping.

What is the best method of bringing on sleep? A good bed, a quiet room, and muscular relaxation — keeping arms and legs in a half-bent position — are most important.

How Can I?

BY ANNE ASHLEY

Q. How can I keep my needles shiny and free of rust in a damp climate?

A. Keep the needles in an emery needle cushion.

Q. How can I remove iodine stains from fabrics?

A. Rub the stains with kerosene and then with naphtha soap. Allow to stand for twenty minutes, and then wash in the usual manner with more naphtha soap.

Q. How can I make dark hair still darker?

A. Massage the scalp every night with olive oil. Persistent treatment is required for the best results.

Q. How can I cool an oven that has become too hot while baking?

A. Merely set a pan of cold water on the lowest shelf of the oven.

Q. How can I wash chamois gloves?

A. Adding a few drops of olive oil to the water when washing chamois gloves will prevent their becoming hard and stiff. The oil also helps to preserve the leather.

Q. How can I prevent mold from forming on jelly?

A. A few cloves put on top of the jelly will prevent mold from forming. A bowl of lime in the jelly closet will also prevent mold.

Canada Exceeds Tobacco Records

For the third successive year, Canadian tobacco production in 1939 exceeded all previous records. The revised estimate of 109,846,000 pounds was greater than the 101,394,600 pounds in 1938 by 8,451,400 pounds, or eight per cent, and was more than double the five-year (1933-37) average production of 51,463,800 pounds.

French Algerian Soldier Makes Himself at Home in England

Among the last troops to be safely evacuated from Northern France were a number of French Algerian soldiers, one of whom is shown here drinking tea on arrival in England. Many of these superb fighters are now re-forming under General Charles de Gaulle.

What Science Is Doing

OXYGEN FOR PARACHUTISTS

A pocket oxygen flask to save war fliers from almost certain death when they parachute from 25,000 feet was announced recently to the American Association for the Advancement of Science.

X-RAY MOVIES

X-ray motion pictures have become a possibility with development of an ultra-high speed X-ray tube enabling the photographing of the inner structure of opaque objects moving at an exceedingly rapid rate or reacting to a strong sudden external force or blow.

Developed by Westinghouse engineers, the new glass tube makes possible the taking of pictures with an exposure time of a millionth of a second — less than one-twenty-thousandth of the time required to blink an eye.

COUGHING SPREADS CANCER

Violent coughing and muscle straining may spread cancer and infections throughout the body. The discovery is reported in the official journal of the American College of Surgeons, that apparently localized cancers or abscesses may actually be thrown, even to the brain, through the veins of the spine.

IODINE FOR CHILDBIRTH

A discovery that iodine makes human motherhood easier is reported. Small quantities of iodine were given to expectant mothers at the University of Oregon medical school. Some remarkable results were achieved. The women reported a greater sense of well-being before the babies were born. There were fewer abnormalities of labor during birth.

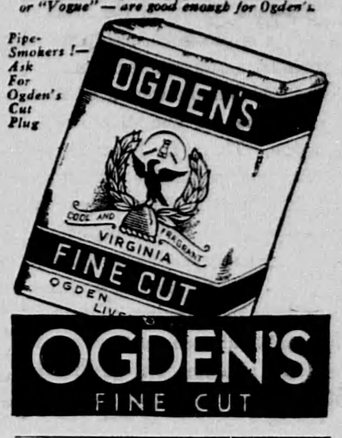
All 89 employes still with the League of Nations before June 30 were notified by Secretary General Joseph Avenol that they must resign. Officials reported he accepted all resignations except "two or three" pending the outcome of the war.

FOCUS ON OGDEN'S

It's a super-satisfying Fine Cut—the star of the cigarette tobacco show! Ogden's gives a pleasure performance all the time. Get yourself a package and you're set for a "reel" close-up of greater enjoyment in rolling your own.

Only the best cigarette papers—"Chantecler" or "Vogue"—are good enough for Ogden's.

Pipe-Smokers!—Ask For Ogden's Cut Plug



Canadian National Railways Revenues

The gross revenues of the all-inclusive Canadian National Railways for the nine-day period June 30, 1940, wer $6,550,140
as compared with 4,816,629
for the same period of 1939, an increase of 1,733,511
or 36%
